*China's Influence and American Interests* Larry Diamond, Orville Schell, 2019-08-01 While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic "discourse war" waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country's ambitions and methods than they do now.

**The Politics of Social Cohesion in Germany, France and the United Kingdom** Jan Dobbernack, 2016-04-30 Across Europe the protection of 'social cohesion' has become an important political objective. This book draws attention to the connection between the cohesive society and the active society. It explores France, Germany and the United Kingdom and challenges the claim that the active conduct of problematic populations can save society from collapse.

*Firm Interests* Cornelia Woll, 2018-07-05 Firms are central to trade policy-making. Some analysts even suggest that they dictate policy on the basis of their material interests. Cornelia Woll counters these assumptions, arguing that firms do not always know what they want. To be sure, firms lobby hard to attain a desired policy once they have defined their goals. Yet material factors are insufficient to account for these preferences. The ways in which firms are embedded in political settings are much more decisive. Woll demonstrates her case by analyzing the surprising evolution of support from large firms for liberalization in telecommunications and international air transport in the United States and Europe. Within less than a decade, former monopolies with important home markets abandoned their earlier calls for subsidies and protectionism and joined competitive multinationals in the demand for global markets. By comparing the complex evolution of firm preferences across sectors and countries, Woll shows that firms may influence policy outcomes, but policies and politics in turn influence business demands. This is particularly true in the European Union, where the constraints of multilevel decision-making encourage firms to pay lip service to liberalization if they want to maintain good working relations with supranational officials. In the United States, firms adjust their sectoral demands to fit the government's agenda. In both contexts, the interaction between government and firm representatives affects not only the strategy but also the content of business lobbying on global trade.

**A New Multilateralism for the 21st Century** Ms. Christine Lagarde, 2014-02-03 This chapter presents the content of the Richard Dumbleby lecture, which has been delivered by an influential business or a political figure every year since 1972. Christine Lagarde, Managing Director of the IMF, delivered the 2014 lecture at Guildhall in London on February 3. The 44 nations gathering at Bretton Woods have been determined to set a new course based on the principle that peace and prosperity flow from the font of cooperation.

Fundamentally, the new multilateralism needs to instil a broader sense of social responsibility on the part of all players in the modern global economy. A renewed commitment to openness and to the mutual benefits of trade and foreign investment is requested. It also requires collective responsibility for managing an international monetary system that has travelled light-years since the old Bretton Woods system. The collective responsibility would translate into all monetary institutions cooperating closely mindful of the potential impact of their policies on others.

**Boards and Shareholders in European Listed Companies** Massimo Belcredi, Guido Ferrarini, 2013-10-10 With contributions by distinguished scholars from legal and financial backgrounds, this collection of essays analyses four main topics in the corporate governance of European listed firms: (i) board structure, composition and functioning and their interaction with ownership structure; (ii) board remuneration; (iii) shareholder activism and (iv) corporate governance disclosure based on the 'comply or explain' approach. The authors provide new comparative evidence and analyse its implications for the policy debate. They challenge the conventional wisdom that corporate governance in European firms was systematically dysfunctional. While proposals aimed at increasing disclosure and accountability are usually well-grounded, caution is suggested when bringing forward regulatory changes with respect to proposals targeting specific governance arrangements, especially in the fields of board composition and shareholder activism. They argue that the 'comply or explain' principle should be retained and further efforts should be exercised to enhance disclosure.

**Islamic Perspectives on Marketing and Consumer Behavior: Planning, Implementation, and Control** Rishi, Bikramjit, 2015-02-28 In today's increasingly connected business world, there is new pressure for local brands to go global, and a need for already global corporations to cater to new audiences that were previously ignored. *Islamic Perspectives on Marketing and Consumer Behavior: Planning, Implementation, and Control* brings together the best practices for entry and expansion of global brands into Islamic countries. This book is an essential reference source for professionals looking to incorporate the laws and practices of Islam into the global presence of their company and presents a cutting edge look at worldwide retail for marketing researchers and academics.

**Constructing the International Economy** Rawi Abdelal, Mark Blyth, Craig Parsons, 2015-10-27 Focusing empirically on how political and economic forces are always mediated and interpreted by agents, both in individual countries and in the international sphere, *Constructing the International Economy* sets out what such constructions and what various forms of constructivism mean, both as ways of understanding the world and as sets of varying methods for achieving that understanding. It rejects the assumption that material interests either linearly or simply determine economic outcomes and demands that analysts consider, as a plausible hypothesis, that economies might vary substantially for nonmaterial reasons that affect both institutions and agents' interests. *Constructing the International Economy* portrays the diversity of models and approaches that exist among constructivists writing on the international political economy. The authors outline and relate several different arguments for why scholars might attend to social construction, inviting the widest possible array of scholars to engage with such approaches. They examine points of terminological or theoretical confusion that create unnecessary barriers to engagement between constructivists and nonconstructivist work and among different types of constructivism. This book provides a tool kit that both constructivists and their critics can use to debate how much and when social construction matters in this deeply important realm. **Youth Participation in Democratic Life** Bart Cammaerts, Michael Bruter, Shakuntala Banaji, Sarah Harrison, Nick Anstead, Whitwell, Byrt, 2016-02-29 This book is concerned with the contexts, nature and quality of the participation of young people in European democratic life. The authors understand democracy broadly as both institutional politics and civic cultures, and a wide range of methods are used to analyse and assess youth participation and attitudes.

*Typology of Knowledge, Skills and Competences* Jonathan Winterton, Françoise Delamare-Le Deist, Emma Stringfellow, 2006 The third in a series of Cedefop publications dealing with technical aspects of the European Qualification Framework and European Credit Transfer System, this book analyses current practice in countries that have made progress with evaluating and defining competence. It proposes a typology of knowledge, skills and competence, to be used not as an instrument of 'harmonisation' between countries, but as a template to enable comparison. The aim is to promote mobility in every sense, bringing work-based learning and knowledge acquired in higher education closer together.

Comparative Corporate Governance Klaus J. Hopt, 1998 This book goes back to a symposium held at the Max Planck Institute for Foreign Private and Private International Law in Hamburg on May 15-17 1997--P. [v].

*Stocks for All: People's Capitalism in the Twenty-First Century* Petri Mäntysaari, 2021-12-31 Public stock markets are too small. This book is an effort to rescue public stock markets in the EU and the US. There should be more companies with publicly-traded shares and more direct share ownership. Anchored in a broad historical study of the regulation of stock markets and companies in Europe and the US, the book proposes ways to create a new regulatory regime designed to help firms and facilitate people's capitalism. Through its comparative and historical study of regulation and legal practices, the book helps to understand the evolution of public stock markets from the nineteenth century to the present day. The book identifies design principles that reflect prior regulation. While continental European company law has produced many enduring design principles, the recent regulation of stock markets in the EU and the US has failed to serve the needs of both firms and retail investors. The book therefore proposes a new set of design principles to serve contemporary societal needs.

**Emerging Systems for Managing Workplace Conflict** David B. Lipsky, Ronald L. Seeber, Richard Fincher, 2003-04-25 Emerging

Systems of Managing Workplace Conflict presents illustrative real-life examples as well as cutting-edge methods and tools for integrating systems of dispute resolution into standard corporate procedures. This vital resource investigates the systems organizations have developed to manage common and costly workplace conflicts involving supervisor-employee relationships; race, age, and gender discrimination complaints; sexual harassment; occupational safety and health; reasonable accommodation of the disabled; and wrongful termination as well as other problems stemming from governmental regulations and court actions. Drawing on the authors' vast research and frontline experience with a wide variety of corporations and organizations, this important book examines successful responses to universal workplace problems and conflicts. In addition, the book is filled with illuminating case examples and stories from organizations, such as Brown and Root, Kaufman and Broad, Warner Brothers, Universal-Studios, Kaiser Permanente, the United States Postal Service, Johnson & Johnson, Shell, Prudential, and others, that have instituted systems of dispute resolution in response to ongoing destructive conflict, expensive litigation, and crippling settlements. This book offers an enormously useful approach for the application of the most up-to-date systems of organizational conflict resolution and shows how this approach can work in specific situations to save time and money.

Obi William Earle,2005-07-27 "Three-Fingered Jack," the protagonist of this 1800 novel, is based on the escaped slave and Jamaican folk hero Jack Mansong, who was believed to have gained his strength from the Afro-Caribbean religion of obeah, or "obi." His story, told in an inventive mix of styles, is a rousing and sympathetic account of an individual's attempt to combat slavery while defending family honour. Historically significant for its portrayal of a slave rebellion and of the practice of obeah, Obi is also a fast-paced and lively novel, blending religion, politics, and romance. This Broadview edition includes a critical introduction and a selection of contemporary documents, including historical and literary treatments of obeah and accounts of an eighteenth-century slave rebellion.

**Who's who in France** ,2016

Populism Around the World Daniel Stockemer,2018-09-20 This book provides a global overview of populist actors and strategies around the globe from a comparative perspective. By presenting six country studies on the United States, France, Poland, Turkey, the Philippines and Argentina, the contributors analyze how parties from both the radical left and right use a populist discourse combining people-centrism, anti-elitism, and the exclusion of certain population cohorts from the national community. They illustrate how populist actors mobilize and persuade citizens by using simple and slogan-based language and charismatic leadership while offering simple solutions to complex problems. Each case study describes the history of populism in the respective country, current populist actors, the strategies these parties and movements employ, and how successful these tactics are within the population. These case studies are embedded within two theoretical chapters that link the cases to the theoretical and empirical literature on populism. This timely book will appeal to anyone interested in understanding the current enormous appeal of populist movements around the globe.

*Enforcement and Corporate Governance* Erik Berglöf,Stijn Claessens,2004 Abstract: Enforcement more than regulations, laws-on-the-books, or voluntary codes is key to effective corporate governance, at least in transition and developing countries. Corporate governance and enforcement mechanisms are intimately linked as they affect firms' ability to commit to their stakeholders, in particular to external investors. Berglof and Claessens provide a framework for understanding these links and how they are shaped by countries'

institutional contexts. When the general enforcement environment is weak and specific enforcement mechanisms function poorly, as in many developing and transition countries, few of the traditional corporate governance mechanisms are effective. The principal consequence in these countries is a large blockholder, but there are important potential costs to this mechanism. A range of private and public enforcement 'tools' can help reduce these costs and reinforce other supplementary corporate governance mechanisms. The limited empirical evidence suggests that private tools are more effective than public forms of enforcement in the typical environment of most developing and transition countries. However, public enforcement is necessary regardless, and private enforcement mechanisms often require public laws to function. Furthermore, in some countries at least, bottom-up, private-led tools preceded and even shaped public laws. Political economy constraints resulting from the intermingling of business and politics, however, often prevent improvements in the general enforcement environment, and adoption and implementation of public laws in these countries. This paper a product of the Global Corporate Governance Forum, Corporate Governance Department is part of a larger effort in the department to help improve the understanding of corporate governance reform in developing countries--World Bank web site.
