Minds on Fire Mark Christopher Carnes,2014-09-15 A Choice Outstanding Academic Title of the Year In Minds on Fire, Mark C. Carnes shows how role-immersion games channel students' competitive (and sometimes mischievous) impulses into transformative learning experiences. His discussion is based on interviews with scores of students and faculty who have used a pedagogy called Reacting to the Past, which features month-long games set during the French Revolution, Galileo's trial, the partition of India, and dozens of other epochal moments in disciplines ranging from art history to the sciences. These games have spread to over three hundred campuses around the world, where many of their benefits defy expectations. "[Minds on Fire is] Carnes's beautifully written apologia for this fascinating and powerful approach to teaching and learning in higher education. If we are willing to open our minds and explore student-centered approaches like Reacting [to the Past], we might just find that the spark of student engagement we have been searching for in higher education's mythical past can catch fire in the classrooms of the present." —James M. Lang, Chronicle of Higher Education "This book is a highly engaging and inspirational study of a 'new' technique that just might change the way educators bring students to learning in the 21st century." —D. D. Bouchard, Choice

Game Frame Aaron Dignan,2011-03-08 Ever wonder why teens can spend entire weekends playing video games but struggle with just one hour of homework? Why we're addicted to certain websites and steal glances at our smartphones under the dinner table? Or why some people are able to find joy in difficult or repetitive jobs while others burn out? It's not the experiences themselves but the way they're structured that matters. All our lives we've been told that games are distractions—playful pastimes, but unrelated to success. In Game Frame, Aaron Dignan shows us that the opposite is true: games produce peak learning conditions and accelerated achievement. Here, the crucial connection between the games we love to play and the everyday tasks, goals, and dreams we have trouble realizing is illuminated. Aaron Dignan is the thirty-something founder of a successful digital strategy firm that studies the transformative power of technology in culture. He and his peers were raised on a steady diet of games and gadgets, ultimately priming them to challenge the status quo of the modern workplace. What they learned from games goes deeper than hand-eye coordination; instead, this generation intrinsically understands the value of adding the elements of games into everyday life. Game Frame is the first prescriptive explanation of what games mean to us, the human psychology behind their magnetic pull, and how we can use the lessons they teach as a framework to achieve our potential in business and beyond. Games are a powerful way to influence and change behavior in any setting. Here, Dignan outlines why games and play are such important trends in culture today, and how our technology, from our iPhones to our hybrid cars, primes us to be instinctive players. Game Frame tackles the challenging task of defining games and the mechanics that make games work from several perspectives, then explores these ideas through the lens of neuroscience. Finally, Dignan provides practical tips for using basic game mechanics in a variety of settings, such as motivating employees at work or encouraging children at home, giving readers the tools to develop their own games to solve problems in their everyday lives. Illuminated throughout with a series of real-world examples and hypothetical scenarios, Game Frame promises a crash course in game design and behavioral psychology that will leave the reader—and, by extension, the world itself—more productive. Revolutionary, visionary, practical, and time-tested, Game Frame will change the way you approach life.

The Diary of a Gatekeeper David Walther,2015-06-10 The events portrayed in The Diary of a Gatekeeper are somewhat other worldly, almost unreal. The question we should ask is not if what is recounted in these pages real, but what do we consider real and unreal? The vulnerable yet indomitable Anya is assailed from all angles from a veritable gamut of dark forces that she can barely comprehend. Some were externally generated and some came from within. She struggled to cope and, in a near state of despair, she stumbled upon someone who could help. Of course, Anya did not find Mark by chance. In the grand design of the universe, all proceeded in karmic synchronicity. Mark and Anya are sent demons, werewolves, and disincarnate earth-bound spirits of all kinds to face. Mark Ash becomes the equilibrium and the force for good against the rising tide of evil. This is his story. What unfolds is his learning. All must be in balance. All must be equal; light and dark, dark and light. The ebb and flow never ceases; the story never ends.
