Today's Universities: Combining Rigour with Relevance Michigan State University,2015-08-05 Last year, the Dubai International Conference in Higher Education considered the global challenge of sustaining success in higher education. This year, we posed the question: 'How do universities combine rigour with relevance?' Once again we have invited all those involved in the higher education community to come together to share insights related to the provision of education that is rigorous and at the same time relevant. The three key premises of the conference are these: 1. Higher education institutions must demonstrate their relevance to the needs of the workforce in a landscape of constant and rapid economic and social change. 2. They must maintain the rigorous academic standards that are the hallmark of a quality institution. 3. With the accelerating power and reach of the web, universities must meet unprecedented challenges as technological innovation disrupts their traditional business model. Unless individual universities prove that they are capable of adapting successfully in the face of these three pressures, their futures may be uncertain.

Teaching and Learning in Saudi Arabia Amani K Hamdan,2015-12-01 Saudi Arabia is witnessing unprecedented progress in the field of higher education. Even though the country opened its first university in 1957, so far there seems to be little English scholarly writing about Saudi education in general and higher education in particular. The current expansion of Saudi Arabia's higher-education system has put a spotlight on this serious gap in the international literature. This book helps to fill this lacuna through the work of 16 scholars who have contributed to the development of the Saudi education system. In so doing, the book reveals areas where more research is required and thus provides a useful starting point for education scholars. This anthology is unique in that it is the first to offer a comprehensive perspective on the current knowledge base pertaining to Saudi higher education as well as to the ongoing efforts to introduce reforms.

Handbook of Theory and Practice of Sustainable Development in Higher Education Walter Leal Filho,Constantina Skanavis,Arminda do Paço,Judy Rogers,Olga Kuznetsova,Paula Castro,2016-11-23 This Handbook approaches sustainable development in higher education from an integrated perspective, addressing the dearth of publications on the subject. It offers a unique overview of what universities around the world are doing to implement sustainable development (i.e. via curriculum innovation, research, activities, or practical projects) and how their efforts relate to education for sustainable development at the university level. The Handbook gathers a wealth of information, ideas, best practices and lessons learned in the context of executing concrete projects, and assesses methodological approaches to integrating the topic of sustainable development in university curricula. Lastly, it documents and disseminates the veritable treasure trove of practical experience currently available on sustainability in higher education.

Higher Education in Saudi Arabia Larry Smith,Abdulrahman Abouammoh,2013-03-14 This book provides the first academically rigorous description and critical analysis of the Higher Education system in the Kingdom of Saudi Arabia, and of the vision, strategies and policy imperatives for the future development of Saudi universities. The government of Saudi Arabia has recognized in both policy and practice the necessity of developing its university system to world-class standard. Significantly increasing access and participation in Higher Education across a range of traditional and non-traditional disciplines is directly relevant to the future social and economic growth of the country. This book addresses the way in which Saudi Arabia is moving to develop a quality university system that balances the need for students to gain the knowledge, skills and 'ways of doing' necessary to operate effectively on the world stage while simultaneously maintaining and demonstrating the fundamental values of the Islamic religion and culture. The book provides a description and critical analysis of the key components of the Saudi Higher Education system, and of system-level responses to the challenges and opportunities facing Saudi universities. It is written by a team of Saudi academics and authors of international standing from non-Saudi universities so as to provide both internal and external perspectives on all issues and to place information and ideas in the context of the international Higher Education scene.

But leadership is rather complex, and as such, it tends to lead to an increased interest within and across different disciplines. This book is an attempt to provide theoretical and empirical framework to better understand leadership challenges in various contexts. The authors cover an array of themes that span from an individual level to an organizational and societal level. In this volume, two sections are presented. The first section based on individual level focuses on different leadership styles and abilities, and the other section provides theories to understand leadership in public administration, in industrial settings and in nonprofit organizations.

Mechcomp2 Antonio J.M. Ferreira, Ana M.A. Neves, Erasmo Viola, Francesco Tornabene, Nicholas Fantuzzi, 2016-05-20 Composites materials have aroused a great interest over the last few decades. Several applications of fibrous composites, functionally graded materials, laminated composites, nano-structured reinforcements, morphing structures, can be found in many engineering fields, such as aerospace, mechanical, naval and civil engineering. The necessity of lightweight structures, smart and adaptive systems, high-level strength, have led both the academic research and the manufacturing development to a recurring employment of these materials. Many journal papers and technical notes have been published extensively over the last seventy years in international scientific journals of different engineering fields. For this reason, the establishment of this second edition of Mechanics of Composites International Conference has appeared appropriate to continue what has been begun during the first edition occurred in 2014 at Stony Brook University (USA). MECHCOMP wants to be an occasion for many researchers from each part of the globe to meet and discuss about the recent advancements regarding the use of composite structures. As a proof of this event, which has taken place in Porto (Portugal), selected plenary and key-note lectures have been collected in the present book.
