Unfixed Jennifer Bajorek, 2020-02-07 In *Unfixed* Jennifer Bajorek traces the relationship between photography and decolonial political imagination in Francophone west Africa in the years immediately leading up to and following independence from French colonial rule in 1960. Focusing on images created by photographers based in Senegal and Benin, Bajorek draws on formal analyses of images and ethnographic fieldwork with photographers to show how photography not only reflected but also actively contributed to social and political change. The proliferation of photographic imagery—through studio portraiture, bureaucratic ID cards, political reportage and photojournalism, magazines, and more—provided the means for west Africans to express their experiences, shape public and political discourse, and reimagine their world. In delineating how west Africans' embrace of photography was associated with and helped spur the democratization of political participation and the development of labor and liberation movements, Bajorek tells a new history of photography in west Africa—one that theorizes photography's capacity for doing decolonial work.

Urban Studio Ashley Elledge, 2009 The Urban Studio summer thesis experience is a group design build studio working towards the construction of a commercial home for teen mothers. The build process of My Sisters' House is a great hands on learning experience, and is also seen as a huge community service project. In addition to the build participation of My Sisters' House, a portion of the thesis experience will be devoted to an individual project. These individual projects range greatly between students, depending on their personal interest. Within this document the realm of furniture design is explored in relation to ergonomics and the expectant mother. A proposed

furniture piece for My Sister's [sic] House is also included.--Container.

Temporary Gardens Raffaella Sini, 2022-05-30 The last 30 years have seen a surge in temporary gardens. The flexibility and new challenges invested in non-permanent landscapes has made them a creative and stimulating testing ground for professionals and impromptu designers. Raffaella Sini examines the historical evolution of the genre, exploring theory, narratives, and strategies informing 80 temporary gardens built in France, Germany, Spain, Portugal, Italy, the United Kingdom, Belgium, Switzerland, Sweden, New Zealand, Canada, Singapore, and the United States. Key topics include: • temporary gardens in 1970s avant-garde art and 1980s public art; • temporary gardens as opportunities to work with live processes, practice inclusion, and explore concepts of social justice and ecology; • temporary gardens to redefine the vocabulary of garden design; and • temporary gardens in tactical urbanism. The book comprehensively decodifies the full range of ephemeral gardens: uprooted, mobile, itinerant, movable, postmodern, installation, exhibited, conceptual, theme, pop-up, guerrilla, grassroots, meanwhile, interim, provisional, activist, community, and parklet. Beyond physical duration, time-focused design in gardens affects the entire process of conceiving, building, experiencing, and managing green spaces; using short-term formats, anyone can invent, trial, and experiment in a condensed experience of landscape. The temporary garden emerges as critical cultural ground for the discourse in landscape architecture, art, ephemeral urbanism, and in urban, landscape, and garden design. It is inspirational reading for designers and students alike.

Edge of Order Daniel Libeskind, Tim McKeough, 2018-11-27 A stunning tour of the work of internationally known architect Daniel Libeskind and an

investigation of a master artist's creative process. Daniel Libeskind is one of the foremost architects of our time, a self-proclaimed rebel celebrated for innovative, site-conscious designs, including the Jewish Museum Berlin and New York's World Trade Center Redevelopment. He has also emerged as one of architecture's most visible public ambassadors. In *Edge of Order*, Libeskind opens the door to his unique creative process, guiding us through a selection of his projects never before collected--both built and unrealized, major commissions and unexpected favorites--and revealing how he arrived at their designs through text and a rich array of visuals, including drawings, plans, and photographs. With a voracious appetite for culture and history, and an encyclopedic memory, Libeskind draws on everything from Greek mythology to Emily Dickinson to the Marx Brothers to explain the way he thinks about buildings and cities. Far more than a monograph, *Edge of Order* is both an essential document of Libeskind's remarkable career and an intimate portrait of an artist that will encourage creative people in any field to discover new points of inspiration.

In Visible Presence Oksana Sarkisova, Olga Shevchenko, 2023-10-03 An absorbing exploration of Soviet-era family photographs that demonstrates the singular power of the photographic image to command attention, resist closure, and complicate the meaning of the past. A faded image of a family gathered at a festively served dinner table, raising their glasses in unison. A group of small children, sitting in orderly rows, with stuffed toys at their feet and a portrait of Lenin looming over their heads. A pensive older woman against a snowy landscape, her gaze directed lovingly at a tombstone. These are a few of the evocative images in *In Visible Presence* by Oksana Sarkisova and Olga Shevchenko, an exquisitely researched book that brings together photographs from Soviet-era family photo archives and investigates their afterlives in Russia. *In Visible Presence* explores the photographic images' singular power to capture a fleeting moment by approaching them as points of contestation and possibility. Drawing on over a decade of fieldwork and interviews, as well as internet ethnography, media analysis, and case studies, *In Visible Presence* offers a rich account of the role of family photography in creating communities of affect, enabling nostalgic longings, and processing memories of suffering, violence, and hardship. Together these photos evoke youthful aspirations, dashed hopes, and moral compromises, as well as the long legacy of silence that was passed down from grandparents to

parents to children. With more than 250 black and white photos, *In Visible Presence* is an astonishing journey into domestic photography, family memory, and the ongoing debate over the meaning of the Soviet past that is as timely and powerful today as it has ever been.

Imaging Culture Candace M. Keller,2021-07-06 *Imaging Culture* is a sociohistorical study of the meaning, function, and aesthetic significance of photography in Mali, West Africa, from the 1930s to the present. Spanning the dynamic periods of colonialism, national independence, socialism, and democracy, its analysis focuses on the studio and documentary work of professional urban photographers, particularly in the capital city of Bamako and in smaller cities such as Mopti and Ségou. Featuring the work of more than twenty-five photographers, it concentrates on those who have been particularly influential for the local development and practice of the medium as well as its international popularization and active participation in the contemporary art market. *Imaging Culture* looks at how local aesthetic ideas are visually communicated in the photographers' art and argues that though these aesthetic arrangements have specific relevance for local consumers, they transcend geographical and cultural boundaries to have value for contemporary global audiences as well. *Imaging Culture* is an important and visually interesting book which will become a standard source for those who

study African photography and its global impact.

My Robot Gets Me Carla Diana, 2021-03-30 Your relationships with your smart products are about to get a lot more personal. Think how commonplace it is now for people to ask Siri for the weather forecast, deploy Roomba to clean their homes, or summon Alexa to turn on the lights. The smart home market will reach well over \$100 billion in the next five years on the promise of products that are truly integrated with our cooking, cleaning, entertainment, security, and hygiene habits. But the reality is, these first-generation smart products aren't very smart-yet. We're clearly seeing only the tip of the iceberg in terms of capability and how such products can enhance our lives. How do we take it to the next level? In a word, design-and more specifically, social design. In this fascinating and instructive book, leading product design expert Carla Diana describes how new technology is allowing designers to humanize consumer products in delightfully subtle ways. Showcasing vivid examples of social design principles such as product presence, object expression, and interaction intelligence, we see how inventive uses of light, sound, and movement can evoke human responses to even the most mundane products. Diana offers clear guidelines and takeaways for conceptualizing, building, and optimizing products using such methods as bodystorming, scenario storyboarding, video prototyping, behavior charting, and more. A Medium Seen Otherwise Roger Hallas, 2023 Having undergone profound material, aesthetic, and institutional transformations since the arrival of digital technologies, photography and film frequently intersect in the processes of convergence (the shared technological basis of diverse media in digital code) and remediation (the mutual reshaping of old and new media). However, the foundational relations between film and photography have a long history extending well back into the nineteenth century. This history includes many acclaimed practitioners who have worked in both media, such as Albert Kahn, Helen Levitt, Agnès Varda, Chris Marker, Robert Frank, Wim Wenders, Abbas Kiarostami, and Fiona Tan, but it also involves a range of intermedial forms that combine elements of both media, such as the film still, the film photonovel, and the photofilm. These hybrid forms were long neglected critically because they were considered marginal forms of paratextuality or deviations from medium specificity—the idea that a medium must be deployed according to its own specific capacities compared to other media--

Filtering Histories Drew A. Thompson, 2021-03-22 Photographers and their images were critical to the making of Mozambique, first as a colony of Portugal and then as independent nation at war with apartheid in South Africa. When the Mozambique Liberation Front came to power, it invested substantial human and financial resources in institutional structures involving photography, and used them to insert the nation into global debates over photography's use. The materiality of the photographs created had effects that neither the colonial nor postcolonial state could have imagined. *Filtering Histories: The Photographic Bureaucracy in Mozambique, 1960 to Recent Times* tells a history of photography alongside state formation to understand the process of decolonization and state development after colonial rule. At the center of analysis are an array of photographic and illustrated materials from Mozambique, South Africa, Portugal, and Italy. Thompson

recreates through oral histories and archival research the procedures and regulations that engulfed the practice and circulation of photography. If photographers and media bureaucracy were proactive in placing images of Mozambique in international news, Mozambicans were agents of self-representation, especially when it came to appearing or disappearing before the camera lens. Drawing attention to the multiple images that one published photograph may conceal, *Filtering Histories* introduces the popular and material formations of portraiture and photojournalism that informed photography's production, circulation, and archiving in a place like Mozambique. The book reveals how the use of photography by the colonial state and the liberation movement overlapped, and the role that photography played in the transition of power from colonialism to independence.

Seizing the Light Robert Hirsch, 2017-04-07 The definitive history of photography book, *Seizing the Light: A Social & Aesthetic History of Photography* delivers the fascinating story of how photography as an art form came into being, and its continued development, maturity, and transformation. Covering the major events, practitioners, works, and social effects of photographic practice, Robert Hirsch provides a concise and discerning chronological account of Western photography. This fundamental starting place shows the diversity of makers, inventors, issues, and applications, exploring the artistic, critical, and social aspects of the creative process. The third edition includes up-to-date information about contemporary photographers like Cindy Sherman and Yang Yongliang, and comprehensive coverage of the digital revolution, including the rise of mobile photography, the citizen as journalist, and the role of social media. Highly illustrated with full-color images and contributions from hundreds of artists around the world, *Seizing*

the Light serves as a gateway to the history of photography. Written in an accessible style, it is perfect for students newly engaging with the practice of photography and for experienced photographers wanting to contextualize their own work.

Street and Studio Tate Modern (Gallery), 2008-09 The photographic portrait has two parallel histories that run side by side, from the birth of photography to the twenty-first century; one of portraits made in the studio, the other of those taken in the street. The advent of small, easily concealed cameos allowed photographers to capture subjects in the street unaware. In contrast, the studio offered the opportunity to present carefully composed images to the world, making use of the elaborate staging and technical devices at the photographer's disposal. With celebrities today expected to pose for the paparazzi in the street, and the studio being used increasingly for informal and intimate shots, these traditions have been subverted. Accompanying a major exhibition at Tate Modern, *Street & Studio* explores the fascinating contrasts, tensions and connections between these two traditions.--BOOK JACKET.

Claiming the City in South African Literature Meg Samuelson, 2021-08-23 This book demonstrates the insights that literature brings to transdisciplinary urban studies, and particularly to the study of cities of the South. Starting from the claim staked by mining capital in the late nineteenth century and its production of extractive and segregated cities, it surveys over a century of writing in search of counterclaims through which the literature reimagines the city as a place of assembly and attachment. Focusing on how the South African city has been designed to funnel gold into the global economy and to service an enclaved minority, the study looks to the literary city to advance

a contrary emphasis on community, conviviality and care. An accessible and informative introduction to literature of the South African city at significant historical junctures, this book will also be of great interest to scholars and students in urban studies and Global South studies.

Urban Narratives: Exploring Identity, Heritage, and Sustainable Development in Cities Mohd Fairuz Shahidan,

Handbook of Research in International Marketing Subhash C. Jain, David A. Griffith, 2011 The global expansion of business has generated a tremendous interest among scholars, but there remains a strong need for theoretical insights into conducting marketing operations abroad. This thoroughly revised edition addresses this lack in the extant literature. The book consists of insights from leading scholars in international marketing, working not only to advance the theoretical underpinnings of today's most important international marketing issues, but also to provide insights for how the field of scholarship and practice of international marketing might develop in the future. The authors, top scholars from around the world, provide useful theoretical insights designed to stimulate contemplation and discussion, and to provide guidelines for future research on international marketing. The volume includes coverage of topics in four main areas: Part I looks at global branding while Part II examines issues of marketing strategy on a world stage. Part III offers chapters on cultural issues and the book closes with a more detailed look at marketing at the bottom of the pyramid in Part IV. Scholars and students in marketing and international business will find much of value in this comprehensive volume.

Urban Mountain Beings Kathleen S. Fine-Dare, 2019-12-04 Urban Mountain Beings is an ethnographic and historically grounded study of recognition strategies and ethnogenesis carried out on the flanks of Mt. Pichincha in Quito, Ecuador. Kathleen S. Fine-Dare employs feminist geographical and Indigenous pedagogical frameworks to illustrate how histories of exclusion have created attitudes and policies that treat Native peoples as "out of place and time" in cities. Fine-Dare concentrates on two overlapping contexts for Indigenous vindication: the Yumbada of Cotacollao, an ancestral performance through which mountain and other spirits are called into the urban plaza; and Casa Kinde (Hummingbird House), a cultural organization that engages in workshops, filmmaking, photography, commerce, community education, and the formation of alliances with anthropologists, activists, filmmakers, engineers, and teachers.
