

Urban World

Charles Tilly

Street World Roger Gastman,Caleb Neelon,Anthony Smyrski,2007-11 Urban subcultures have joined together to become something larger, more powerful, and more pervasive than ever before. Our new global urban culture, street culture at its broadest, is its force. The more than 1,000 photographs featured here together form a journey, a record, and an inspiration. The world's streets are its most vibrant sites of visual creativity, and amid their crush are photographers, documenting, creating, and collectively bringing this book to you. Their stories are the stories of the interconnectedness of global street culture. Travel and exploration are near the essence of street cultures, and the travelers who have used their passions to cross the boundaries of nations are at the heart of the process of cultural exchange.--[from publisher's description].

In The Post-Urban World Tigran Haas,Hans Westlund,2017-10-16 Winner of the Regional Studies Association's Best Book Award 2018. In the last few decades, many global cities and towns have experienced unprecedented economic, social, and spatial structural change. Today, we find ourselves at the juncture between entering a post-urban and a post-political world, both presenting new challenges to our metropolitan regions, municipalities, and cities. Many megacities, declining regions and towns are experiencing an increase in the number of complex problems regarding internal relationships, governance, and external connections. In particular, a growing disparity exists between citizens that are socially excluded within declining physical and economic realms and those situated in thriving geographic areas. This book conveys how forces of structural change shape the urban landscape. In The Post-Urban World is divided into three main sections: Spatial Transformations and the New Geography of Cities and Regions; Urbanization, Knowledge Economies, and Social Structuration; and New Cultures in a Post-Political and Post-Resilient World. One important subject covered in this book, in addition to the spatial and economic forces that shape our regions, cities, and neighbourhoods, is the social, cultural, ecological, and psychological aspects which are also critically involved. Additionally, the urban transformation occurring throughout cities is thoroughly discussed. Written by today's leading experts in urban studies, this book discusses subjects from different theoretical standpoints, as well as various methodological approaches and perspectives; this is alongside the challenges and new solutions for cities and regions in an interconnected world of global economies. This book is aimed at both academic researchers interested in regional development, economic geography and urban studies, as well as practitioners and policy makers in urban development.

The Urban World J. John Palen,1981 This text presents a cross-cultural look at cities and suburbs around the world. It offers an overview of the changing urban scene, covering evolving patterns and the changing nature of urban life. It provides coverage of women in metropolitan areas.

Urban World/global City David Clark,2003 The millennium marked a symbolic transition in the history of human settlement. Over half of the world's six billion people now live in towns and cities. The world is an urban place. This book identifies and accounts for the characteristics of the contemporary city and of urban society. It analyses the distribution and growth of settlements and explores the social and behavioural characteristics of urban living. The latest theoretical and empirical developments and insights are synthesized and presented in an accessible way. Emphasis throughout is placed upon the world scale, urban developments being seen as the geographical consequences of the evolution of capitalism. Individual chapters focus upon populations and places, growth and urbanization, urban development as a global phenomenon, socio-economic consequences of global urban development, urban culture and global urban society, world cities and the urban future. This second edition has been extensively updated and referenced. Each chapter includes sets of learning objectives, annotated readings and topics for discussion.

Cities Raymond Joshua Scannell,2015-12-03 In Cities, Raymond Joshua Scannell examines how dramatic changes in the global economy and technology during the latter half of the twentieth century have radically restructured the city as a lived environment. Beginning with the impacts of globalisation on national and regional economies across the planet, Scannell investigates the rapidly changing and amorphous urban environments in which most people live. Cities traces how the actions of urban dwellers carving out lives for themselves are radically transforming paradigms of urban management and are overturning traditional assumptions about what constitutes urban rule and revolt. This exciting book insists on a new vocabulary for human settlements, one that looks centrally at the sort of behaviour that is often relegated figuratively and literally to the urban margins.

An Urban World Charles Tilly,1974 The concentration of people and their activities in big, concentrated centers make most people vulnerable to the decisions of many. As collective creations, cities impose collective risks and collective responsibilities.

The Transition to a Predominantly Urban World and its Underpinnings David Satterthwaite,2007

Urban Empires Edward Glaeser,Karima Kourtit,Peter Nijkamp,2020-09-23 We live in the ‘urban century’. Cities all over the world – in both developing and developed countries – display complex evolutionary patterns. Urban Empires charts the backgrounds, mechanisms, drivers, and consequences of these radical changes in our contemporary systems from a global perspective and analyses the dominant position of modern cities in the ‘New Urban World’. This volume views the drastic change cities have undergone internationally through a broad perspective and considers their emerging roles in our global network society. Chapters from renowned scholars provide advanced analytical contributions, scaling applied and theoretical perspectives on the competitive profile of urban agglomerations in a globalizing world. Together, the volume traces and investigates the economic and political drivers of network cities in a global context and explores the challenges over governance that are presented by mega-cities. It also identifies and maps out the new geography of the emergent ‘urban century’. With contributions from well-known and influential scholars from around the world, Urban Empires serves as a touchstone for students and researchers keen to explore the scientific and policy needs of cities as they become our age’s global power centers.

Cities of the World Stanley D. Brunn,Maureen Hays-Mitchell,Donald J. Zeigler,2012 Remarkably, more than half of the world's population now lives in cities, and the numbers grow daily as people abandon rural areas. This fully updated and revised fifth edition of the classic text offers readers a comprehensive set of tools for understanding the urban landscape, and, by extension, the world's politics, cultures, and economies. Providing a sweeping overview of world urban geography, a group of noted experts explores the eleven major global regions. Each author presents the region's urban history, economy, culture, and society, as well as urban spatial models and problems and prospects. Environmental, human security, globalization, and cyberspace topics are fully developed as well. Vignettes of seventy-eight key cities give the reader a vivid understanding of daily life and the spirit of place. An introductory chapter presents an overview of key terms and concepts, and a concluding chapter projects the world's urban future. Liberally illustrated with a new selection of photographs, maps, and diagrams, the text also includes a rich array of textboxes

to highlight key topics ranging from gender and the city to Islamic fashion and global warming. Bibliographic sources, websites, and an appendix of UN data provide additional resources for helping students understand more about the urban world. Clearly written and timely, *Cities of the World* will be invaluable for those teaching introductory or advanced classes on global cities, regional geography, and urban studies. Urban Place Peggy F. Barlett,2005 Cross-disciplinary studies find that reconnections to place and to the natural world, which are emerging through urban sustainability efforts, build community and political action and have important medical and psychological health benefits.

Urban World History Luc-Normand Tellier,2019-09-14 This book seeks to deepen readers' understanding of world history by investigating urbanization and the evolution of urban systems, as well as the urban world, from the perspective of historical analysis. The theoretical framework of the approach stems directly from space-economy, and, more generally, from location theory and the theory of urban systems. The author explores a certain logic to be found in world history, and argues that this logic is spatial (in terms of spatial inertia, spatial trends, attractive and repulsive forces, vector fields, etc.) rather than geographical (in terms of climate, precipitation, hydrography). Accordingly, the book puts forward a truly original vision of urban world history, one that will benefit economists, historians, regional scientists, and anyone with a healthy curiosity.

Fragments of the City Colin McFarlane,2021-10-05 Cities are becoming increasingly fragmented materially, socially, and spatially. From broken toilets and everyday things, to art and forms of writing, fragments are signatures of urban worlds and provocations for change. In *Fragments of the City*, Colin McFarlane examines such fragments, what they are and how they come to matter in the experience, politics, and expression of cities. How does the city appear when we look at it through its fragments? For those living on the economic margins, the city is often experienced as a set of fragments. Much of what low-income residents deal with on a daily basis is fragments of stuff, made and remade with and through urban density, social infrastructure, and political practice. In this book, McFarlane explores infrastructure in Mumbai, Kampala, and Cape Town; artistic montages in Los Angeles and Dakar; refugee struggles in Berlin; and the repurposing of fragments in Hong Kong and New York. Fragments surface as material things, as forms of knowledge, as writing strategies. They are used in efforts to politicize the city and in urban writing to capture life and change in the world's major cities. *Fragments of the City* surveys the role of fragments in how urban worlds are understood, revealed, written, and changed.

World City Network Peter J. Taylor,Ben Derudder,2004-06-02 Peter Taylor's compelling insights challenge us to view cities as part of a global network, divorced from the constraints of national or even regional boundaries.

The Urban World and the First Christians Steve Walton,Paul Trebilco,David W. J. Gill,2017 In the tradition of *The First Urban Christians* by Wayne Meeks, this book explores the relationship between the earliest Christians and the city environment. Experts in classics, early Christianity, and human geography analyze the growth, development, and self-understanding of the early Christian movement in urban settings. The book's contributors first look at how the urban physical, cultural, and social environments of the ancient Mediterranean basin affected the ways in which early Christianity progressed. They then turn to how the earliest Christians thought and theologized in their engagement with cities. With a rich variety of expertise and scholarship, *The Urban World and the First Christians* is an important contribution to the understanding of early Christianity.

New Urban Worlds AbdouMaliq Simone,Edgar Pieterse,2018-03-15 It is well known that the world is transitioning to an irrevocable urban future whose epicentre has moved into the cities of Asia and Africa. What is less clear is how this will be managed and deployed as a multi-polar world system is being born. The full implications of this challenge cry out to be understood because city building (and retrofitting) cannot but be an undertaking entangled in profound societal and cultural shifts. In this highly original account, renowned urban sociologists AbdouMaliq Simone and Edgar Pieterse offer a call for action based fundamentally on the detail of people's lives. Urban regions are replete with residents who are compelled to come up with innovative ways to maintain or extend livelihoods, whose makeshift character is rarely institutionalized into a fixed set of practices, locales or organizational forms. This novel analytical approach reveals a more complex relationship between people, the state and other agents than has previously been understood. As the authors argue, we need adequate concepts and practices to grasp the composition and intricacy of these shifting efforts to make visible new political possibilities for action and social justice in cities across Asia and Africa.

Humanism and the Urban World Caspar Pearson,2011 Explores Italian Renaissance writer and architect Leon Battista Alberti's complex and sometimes ambivalent attitudes toward the concept of the city, and relates them to his broader intellectual positions --Provided by publisher.
