Bird Skin Coat Angela Sorby,2009-02-16 Bird Skin Coat is brimming with startling moments of beauty found within a rusty and decayed landscape. With wild lyrical images of ascent and descent–doves and dives, sparrows and slugs, attics and cellars–this collection reflects Sorby’s keen eye for blending images. As they shuttle between the Upper Midwest and the Pacific Northwest, these poems explore how the radical instability of the world is also the source of its energy. Indian Recipes Under 30 Minutes Master Chefs of India,2005 This book compares the beginning of symbolic thought in human infancy with that of our close primate relatives, the chimpanzees. The author investigates the precursors of symbolism by studying the actions and interactions of a small group of these intelligent, non-human primates who live in Singapore Zoo. Drawing upon his years of detailed observations, Matthews offers an in-depth analysis and interpretation of chimp behaviour to present an unprecedented account of the beginnings of symbolic thought. The book shows that the actions the chimpanzees perform have structural and semantic similarities with the actions of emergent expression and representation we find in human infancy. Of great importance is the finding that chimpanzee mark-making activity is not an artefact of human interference, but part of chimpanzee culture. Young chimpanzees seem to be introduced to acts of pretence and imagination by older and more experienced ones and taught the rudiments of expression, representation and symbolism. The implications for our understanding of symbolism, language, art and education are enormous, as are those about our origins and our place within nature. The book is written in an accessible style for both specialist and non-specialist readers, and illustrated with the author s drawings and photographs.
