Knowledge Capture in Financial Regulation Eva Becker,2016-04-12 Eva Becker assesses the US financial crisis as a crisis of regulatory data, information and knowledge. Based on the Financial Crisis Inquiry Commission's interviews as well her own interviews, and drawing on Capture Theory and recent reformulations thereof, she develops "knowledge capture" as a theoretic framework to assess financial regulation under conditions of 21st century complexity.

The New International Financial System Douglas D. E. T. Al EVANOFF,2015-10-27 Ever since the Great Recession, the global financial regulatory system has undergone significant changes. But have these changes been sufficient? Have they created a new problem of over-regulation? Is the system currently in a better position than in the pre-Recession years, or have we not adequately addressed the basic causes of the financial crisis and resulting Great Recession?These were the questions and issues addressed in the seventeenth annual international banking conference held at the Federal Reserve Bank of Chicago in November 2014. In collaboration with the Bank of England, the theme of the conference was to examine the state of the new global financial system as it has evolved in response to significant market changes and regulatory reforms triggered by the global financial crisis. The papers from that conference are collected in this volume, with contributions from an international array of government officials, regulators, industry practitioners and academics.

The Political Economy of Land Mika Hyötyläinen,Robert Beauregard,2022-11-30 Recent years have seen a gathering interest in the importance of real estate development to the growth and development of cities. This has included theoretical work on such topics as land rent and property rights as well as empirical studies on property investments, assetization, securitization, and the effects of changing property values on economic growth and the global status of cities. In the field of urban political economy, attention has turned particularly to the financialization of land and the built environment and to the globalization of property ownership, real estate development, and architectural design. This edited volume brings together a collection of original investigations of the current thinking on three broad themes: the assetization of land and buildings, the relationship of land rent to valuation and speculation in the markets for private and public properties, and the different ways in which land functions as a social relation. In order to ground the discussion, each chapter combines a theoretical perspective with empirical evidence. And, to convey a sense of the global nature of these phenomena, the book includes cases from Finland, India, Spain, Singapore, Hong Kong, Japan, Italy, China, and the United States. Although its prime goal is to solidify and extend the political economy of land, this book is also a celebration of the Finnish scholar Anne Haila who was a major contributor to this literature and, specifically, to the work of this book's authors. Prior to her sudden death in 2019, she was a key figure in the discussions that are at the core of the political economy of land: this book, in part, is a public acknowledgement of her contributions.

Through an international presence, organizations can remain competitive. The Handbook of Research on Global Business Opportunities combines comprehensive viewpoints and research on various business enterprises from around the world in companies of all sizes and models, discussing different aspects and concerns in the global business environment such as corruption, taxation, supply chain management, and economic impacts. This handbook is an essential reference source for business executives from both large and small firms, business scholars, researchers, academics, students,

and professionals.

Creating a Safer Financial System José Vināls,Ceyla Pazarbasioglu,Jay Surti,Aditya Narain,Mrs.Michaela Erbenova,Mr.Julian T. S. Chow,2013-05-14 The U.S., the U.K., and more recently, the E.U., have proposed policy measures directly targeting complexity and business structures of banks. Unlike other, price-based reforms (e.g., Basel 3 and G-SIFI surcharges), these proposals have been developed unilaterally with material differences in scope, design and implementation schedules. This may exacerbate cross-border regulatory arbitrage and put a further burden on consolidated supervision and cross-border resolution. This paper provides an analysis of the potential implications of implementing different structural policy measures. It proposes a pragmatic and coordinated approach to development of these policies to reduce risk of regulatory arbitrage and minimize unintended consequences. In doing so, it also aims to identify a set of common policy measures that countries could adopt to re-scope bank business models and corporate structures.
