Saunders, Maryann Cocca-Leffler, Joan Holub, True

Kelley, 2003-05-12 The kids in Ms. Brandt's class create a special report on the United States of America, with each child doing research on ten states. There's a double-spread map of the whole U.S. and a page for every state jam-packed with trivia, interesting facts, handwritten captions, and jokes. At the end of the book is a map showing how the United States grew over time, a spread on the presidents and what states they hailed from, as well as a bibliography of books the kids used in their research. Written by a team of well-known author/artists, this 64-page Smart About History book is a great guide for kids.

U.S. Total Factor Productivity Slowdown: Evidence from the U.S. States Mr. Roberto Cardarelli, Lusine Lusinyan, 2015-05-28 Total factor productivity (TFP) growth began slowing in the United States in the mid-2000s, before the Great Recession. To many, the main culprit is the fading positive impact of the information technology (IT) revolution that took place in the 1990s. But our estimates of TFP growth across the U.S. states reveal that the slowdown in TFP was quite widespread and not particularly stronger in IT-producing states or in those with a relatively more

intensive usage of IT. An alternative explanation offered in this paper is that the slowdown in U.S. TFP growth reflects a loss of efficiency or market dynamism over the last two decades. Indeed, there are large differences in production efficiency across U.S. states, with the states having better educational attainment and greater investment in R&D being closer to the production “frontier.”

**American Capitals** Christian Montès, 2014-01-10 State capitals are an indelible part of the American psyche, spatial representations of state power and national identity. Learning them by heart is a rite of passage in grade school, a pedagogical exercise that emphasizes the importance of committing place-names to memory. But geographers have yet to analyze state capitals in any depth. In *American Capitals*, Christian Montès takes us on a well-researched journey across America—from Augusta to Sacramento, Albany to Baton Rouge—shedding light along the way on the historical circumstances that led to their appointment, their success or failure, and their evolution over time. While all state capitals have a number of characteristics in common—as symbols of the state, as embodiments of political power and decision making, as public spaces with private interests—Montès does not interpret them through a single lens, in large part because of the differences in their spatial and historical evolutionary patterns. Some have remained small, while others have evolved into bustling metropolises, and Montès explores the dynamics of change and growth. All but eleven state capitals were established in the nineteenth century, thirty-five before 1861, but, rather astonishingly, only eight of the fifty states have maintained their original capitals. Despite their revered status as the most monumental and historical cities in America, capitals come from surprisingly humble beginnings, often plagued by instability, conflict, hostility, and corruption. Montès reminds us of the period in which they came about, “an era of pioneer and idealized territorial vision,” coupled with a still-evolving American citizenry

and democracy.

This book is an educational guide that teaches young readers about America's rich and varied history, geography and culture, and the people and places that stand out.
