Red Light Camera Systems Cynthia Munoz, 2015 Red light running is one of the major causes of crashes, deaths, and injuries at signalised intersections. The Federal Highway Administration (FHWA) and National Highway Traffic Safety Administration (NHTSA) support a comprehensive approach to intersection safety that incorporates engineering, education, and enforcement countermeasures to prevent red light running and improve intersection safety. Red light cameras can be a very effective countermeasure to prevent red light running. There are a number of studies that indicate reduction in crashes at signalised intersections due to red light cameras. The fundamental objective of the research in this book is to determine the effectiveness of RLC systems in reducing crashes. A description of all project efforts is described in this book.

Freeway Traffic State Detection Using CCTV Stationary Images, 2012 Traffic detection and data collection are essential to transportation planning and management. The CCTV (Closed Circuit Television) traffic cameras have been increasingly deployed for traffic surveillance on major roadways by DOT (Department of Transportation) in the U.S. However, the real-time traffic video data is still very limited to be published online because of the large load to the video servers and internet connections. As a result, the traffic snapshots which are clipped from the video data are widely used as an effective approach to publish the real-time traffic conditions through internet. Currently, almost all U.S. states can provide traffic snapshots via DOT or traveler information websites (511 System). These traffic snapshots are published and updated every 1 minute to 5 minutes in different states. They are potential new traffic data source that can be obtained free from internet without additional equipment and instruction cost. They can provide valuable traffic information to analyze traffic flow patterns and congestion status, where no other detectors are available. How to utilize these online CCTV snapshots effectively for traffic detection and data collection would be of practical significance. In this research, a novel traffic state detection model is developed, which could contribute to both academic and industry fields. The primary contribution of this study is to provide an effective solution to detect the traffic state using the CCTV stationary images. Traffic space occupancy is used as a reliable measure for quantitative traffic analysis and congestion estimation. The practical value of the proposed approach is that it turns widely freely available video source from internet into useful traffic information, and this could be done without interfering the existing CCTV system in DOT. The traffic image data used in this study were collected from I-894 freeway corridor in Milwaukee, Wisconsin. I proposed a model to measure the traffic space occupancy, which could not be measured directly in the field. In addition, a perspective transformation method is provided to estimate the traffic parameters without accurate camera calibration. The proposed algorithms and image processing were implemented in MATLAB. The model validation is performed with field loop detector data collected from the same roadway segments. The model performance was evaluated under different traffic status, illumination conditions, and roadway geometry. The validation and evaluation results indicate that the proposed model has a robust detecting capability for traffic status.

The End of Life as We Know It Michael Guillen, 2018-10-16 It's happening this second. Scientists are re-imagining and re-engineering the world forever. With brutal honesty and engaging story-telling, Michael Guillen gives us a clear-eyed look at a future that is already here. Consider this unsettling, brilliantly written, must-read book your official wake up call. -- ERIC METAXAS, #1 national bestselling author of Bonhoeffer: Pastor, Martyr, Prophet, Spy Michael Guillen has tackled an important subject in *The End of Life as We Know It*... This book is a sobering look at where we could be headed. A fascinating read. -- DAVID LIMBAUGH, bestselling author of *Jesus is Risen* and *The True Jesus* In all aspects of life, humans are crossing lines of no return. Modern science is leading us into vast uncharted territory—far beyond the invention of nuclear weapons or taking us to the moon. Today, in labs all over the world, scientists are performing experiments that threaten to fundamentally alter the practical character and ethical color of our everyday lives. In *The End of Life as We Know It: Ominous News from the Frontiers of Science*, bestselling author and Emmy award winning science journalist Michael Guillen takes a penetrating look at how the scientific community is pushing the boundaries of morality, including:

- Scientists who detached the head of a Russian man from his crippled, diseased body, and stitching it onto a healthy new donated body.
- Fertility experiments aimed at allowing designer babies to be conceived with the DNA from three or more biological parents.
- The unprecedented politicization of science – for example, in the global discussion about climate change that is pitting “deniers” against “alarmists” and inspiring Draconian legislation, censorship, and legal prosecutions.
- The integration of Artificial Intelligence into communications and the economy.

The End of Life as We Know It takes us into laboratories and boardrooms where these troubling advances are taking place and asks the question no scientists seem to be asking: What does this mean for the future of humanity? PREVIOUS PRAISE FOR MICHAEL GUILLEN: “Guillen succeeds triumphantly...He writes with extraordinary grace and clarity.” — CHRISTOPHER LEHMANN-HAUPT, *The New York Times* “Guillen knows how to tell a story.” — *Wall Street Journal* “Michael Guillen is ‘Winsomely brilliant.’” — ERIC METAXAS, #1 national bestselling author of *Bonhoeffer: Pastor, Martyr, Prophet, Spy* “Michael Guillen bridges the seeming gap between science and faith better than anyone I know.” — CAL THOMAS, *Syndicated and USA Today columnist/Fox News contributor*

Brain-storm - When the Mind Becomes the Ultimate Weapon David K. Brown, 2016-09-25 Daniel Jefferies was always happy even though he led a challenging life. It was not so much that Danny was bothered by his troubles, rather life was hard on those who loved and cared about him. At a very young age it became clear that Danny was a special person. Whether that was special in a good way or special in a bad way was in the eye of the beholder. Danny was neither a square or round peg so he never fit into the spaces

that were laid out for him. The only thing for sure was that Daniel Jefferies had an unmistakable effect on everyone around him. And since Danny was a happy person it made sense that he would make those around him feel better. But all that changed one day when researchers believed that they could harness his gift. In doing so they unwittingly unleashed Daniel Jefferies to become something that was not meant to be unleashed. Brain-Storm is a story so real that you wonder when, not if it is going to happen!

The Stone Dragon tammi shelton,2010-03-30 Paging Dr. Lilly O'Shea. Paging Dr. Lilly O'Shea. Even through the blissful darkness of sleep, I hear the voice on the intercom calling me. I want to scream, I hear you, I hear you! I jump up from the dingy cot in the doctor's lounge and grab the phone; Dr O'Shea, what do ya need? Dr O'Shea, we got a MVA coming in, multiple vics, this from the operator. Ya, be right there, I reply. I just left the E.R. less than 30 minutes ago, and here I am on my way back. I hate it and I love it. This is the life for me. I chose to become a doctor, and an E.R. doc at that. Did I do it because I love helping people? Nah, not exactly. It was the one profession that would require my complete undivided attention when at work and it's a total opposite of the profession, if that's what you call it, of my crime boss father and his two loyal sons. Yes, my father is what you might call a don. The head of a violent, but successful mafia syndicate. My brothers both work for him; both hoping to succeed him. How my mother deals with it all;

I'll never know. Actually, that's a lie; I know how she deals with it. She simply chooses to ignore it, the whole thing; like it doesn't exist. You would think that my parents would be so proud of me, a doctor. Worked hard, got good grads, graduated from one of the top colleges in the country; and then turned around and graduated magna cum laude from Harvard Medical School; at the top of my class, of course. Funny, but my father, David, actually thought I would follow in his footsteps. Early on I demonstrated a penance for violence; cold blooded, heartless, malicious violence. Just like Daddy; boy was he proud that day. Dr. Lilly O' Shea is successful, wealthy and beautiful. She is also the daughter of David O'Shea; head of the largest Black crime syndicate family on the east coast. What more can she ask for? Well, maybe peace of mind. Journey with her as she fights to stay out of the family business, while battling her own bloodlust for violence, her own stone dragon. Will she win the fight and, unlike her two brothers, stay away from Daddy and his 'family business'. Or will she succumb to the lure of the dark recesses of society, allowing her own penance for violence overcome her? Like a dying man caught in the ocean's riptide; will Dr. Lilly O'Shea, doctor, healer, saver of lives survive?
