*Green Town USA* Thomas J. Fox,2013-07-30 There was never a town with a truer name, though it didn't really discover it till tragedy created an opportunity that residents seized with head and heart! — Bill McKibben, author *Oil and Honey:The Education of an Unlikely Activist* Hope for a greener America . . . from the extraordinary community that made it a reality. Green Town U.S.A. recounts Greensburg's inspiring story of resilience, community, and sustainability which began on the evening of May 4, 2007, when disaster struck the quiet Kansas city. A tornado topping all the scales touched down, and in a matter of minutes, Greensburg, which stood for more than 120 years, was destroyed. Greensburg committed to reconstructing itself from the ground up while embracing green technology and building methods, along with solar and wind energy. The new Greensburg stands testament to the strength and viability of sustainable community redevelopment and energy-efficient living. Green Town U.S.A. is a story of hope and opportunity—even in the face of obstacles and difficulties—and provides a real-world proving ground for sustainable solutions. Green Town U.S.A. takes you through the entire reconstruction process, from Long-Term Community Recovery planning for Greensburg, to the latest advancements in green materials and technology, to the leadership and teambuilding necessary to realize an achievement of this magnitude. Every town can be a “green town.” Any community faced with rebuilding after a natural disaster, planning new municipal buildings or schools, upgrading retail or industrial centers, or building homes can gain valuable insight from the example of Greensburg, Kansas. Green Town U.S.A. is an invaluable handbook for civic leaders, concerned citizens, business owners, and anyone who is a stakeholder in America's sustainable future.

Intraocular Pressure R.N. Weinreb,J.D. Brandt,D. Garway-Heath,F. Medeiros,2007 Intraocular Pressure is the subject for the fourth Consensus report published under the auspices of the AIGS, now renamed as the World Glaucoma Association (WGA). The active participation in our Project Forum e-Room started in January, 2007, by expert members of the various consensus committees. As done with prior reports, the preliminary document was circulated to each of the member societies of the WGA, and additional comments were solicited for the document. Each member Society also was invited to send a representative to attend the consensus meeting that was held in Fort Lauderdale, Florida on May 5, 2007. The report then was discussed extensively during the Consensus Meeting and Consensus Statements were revised following these discussions. Intraocular Pressure is a topic that touches the essence of our subspecialty. Its measurement is a vital aspect of glaucoma diagnosis and treatment. For now, it is the only modifiable risk factor. Measurement of IOP is a relatively recent – one century – addition to our diagnostic armamentarium. Even though the measurement of IOP is relatively simple, it is by no means uncomplicated. The greatest limitation is probably the paucity of measurements that are obtained in practice. Although continuous IOP-measurement is on the horizon, it still is not ready for clinical practice. Arriving at a consensus often can be circuitous and filled with compromises. However, this opportunity is used to critically assess the evidence and develop consensus points. The reader will find this consensus report instructive, practical, and thought-provoking. Moreover, it has great potential to impact patients, both individually and collectively, through both their care and research.

Neuroproteomics Angus C. Nairn,Kenneth R.Williams,2020-02-12 The Neuroproteomics Special Issue overviews the unique challenges that must be addressed to carry out meaningful MS/proteomics analyses on neural tissues and the technologies that are available to meet these challenges. The articles on Alzheimer's disease, addiction, and schizophrenia illustrate how MS/proteomics technologies can be used to improve our ability to diagnose and understand the molecular basis for neurological diseases. Several articles will be of interest to investigators beyond the field of neurological disorders. The review on the discovery of biofluid biomarkers of neurodegenerative dementias will be of interest to investigators searching for other disease biomarkers. Similarly, the review on the role of neuroproteomics in elucidating mechanisms of drug addiction provides an overview of the utility of MS/proteomics approaches for addressing critical questions in addiction neuroscience that should be applicable to investigators involved in virtually any area of biomedical research. Likewise, the article on developing targeted MS approaches for quantifying postsynaptic density proteins will be useful for any investigator who wishes to design targeted assays for virtually any protein. Finally, the peroxidase-mediated proximity labeling technology, described in the article on mapping the proteome of the synaptic cleft, will be of interest to investigators interested in mapping other spatially restricted proteomes.

the moment. A large-format bible of style for architects and interior designers, this book outlines the very latest developments in types of hotel design and then showcases the best on international scene through five themed chapters. It features forty six unusual
