**Law and the Stranger** Austin Sarat, Lawrence Douglas, Martha Merrill Umphrey,2010-07-06 Law calls communities into being and constitutes the world it governs. This act of defining produces an outside as well as an inside, a border whose crossing is guarded, maintaining the identity, coherence,

and integrity of the space and people within. Those wishing to enter must negotiate a complex terrain of defensive mechanisms, expectations, assumptions, and legal proscriptions. Essentially, law enforces the boundary between inside and outside in both physical and epistemological ways. Law and the Stranger explores the ways law identifies and responds to strangers within and across borders. It analyzes the ambiguous place strangers occupy in communities not their own and reflects on how dealing with strangers challenges the laws and communities that invite or parry them. As the book reveals, strangers are made through law, rather than born through accidents of geography.

**Competing for Global Talent** International Labour Office,2006 Global talent has never been more mobile or sought after. A complex phenomenon that takes many forms, the movement of people with skills includes migrants crossing borders for temporary stays abroad as well as settlement, students moving for degrees and temporary and permanent stays, and even tourists and refugees who decide to stay abroad and use their skills. Countries attracting global talent increase their stock of human and technological skills, and in the past decade many have welcomed foreign professionals and students to redress domestic skill shortages and to quicken economic growth. This book includes general and theoretical papers on skilled migration and also papers on the country experiences of Australia, India, Japan, Singapore, the United Kingdom, and the United States. It addresses the socio-economic and cultural challenges created by increased mobility in a world where globalizing and localizing forces are at work simultaneously
