*Bridging the Gap to Solvency* Joel Benner, 2020-12-16 Beginning employment at the USPS, a dubious phenomenon occurred in the work environment that seemed to be stemming from administrative positions. At thirty-two years old and having a poor track record with past endeavors, I knew if there ever came a point in time where I would have to defend my merit, it would be against the word of people who have decades in the postal service, multiple people saying the same thing. With the inclination that I had entered a corrupt environment and the unwillingness to compromise my integrity, I would have to write down in detail every time something happened that affected me and my career negatively. I documented for a full year, and on my first vacation starting 381 days after my start date with the USPS, I began writing a book, returning from my vacation on May 26. I received a predisciplinary interview. I was thirty thousand words into my novel when this happened. Over the course of fourteen days, I received several disciplinary actions, the last one being a seven-day suspension. The same day, I discovered OIG released a report on June 10 that publicly disclosed the findings of a four-year investigation over stamp count analysis stating the amount of offices that exceeded the maximum order shipments from stamp fulfillment services (12,151 offices in 2018) and how offices were able to hide the additional inventory. It was a feature added in retail system software called "excludable stamp stock inventory." It was a storage unit that the USPS devised to move additional stamps during quarter two of the physical year (Merry Christmas). This feature is what's called a gap in internal controls. It's not monitored, and there is no SOP for administrative action. OIG made this discovery by arresting one postmaster who exceeded the stamp ordering from stamp fulfillment services, transferring excess inventory to excludable stamp stock in RSS, and virtually walking them out of the building, selling them to a third party dealer or on eBay (OIG report number FT-AR-19-0008). When this information was released, I had caught up to myself in time, and it gave me the last chapter of my book, *Bridging the Gap to Solvency Fixing the USPS*. It was the broken lightbulb that lit up the entire strand of lights. Louis Dejoy took over command as the PMG the following week, about whom in my book I stated, "He is a Brooklyn Juggernaut, and postal workers will suffer the fate in which we brought upon ourselves. I take full responsibility and maintain my loyalty to the USPS." I submitted the manuscript two weeks later to a few different publishing agencies which all wanted to sign a contract with me the same week PMG Dejoy began his march forward. The book is to enlighten the public so the mass workforce cannot rise up and stop necessary actions that must happen so the postal service can fulfill a universal mandate of delivering the mail. It's done. I did it. I

didn't get assassinated, and I hope it makes a positive difference for those who choose to do the right thing. That's what it's about.

**Augmented Reality** Jon Peddie, 2023-07-29 This book provides an in-depth exploration of the field of augmented reality (AR) in its entirety and sets out to distinguish AR from other inter-related technologies like virtual reality (VR), mixed reality (MR) and extended reality (XR). The author presents AR from its initial philosophies and early developments, and in this updated 2nd edition discusses the latest advances and the ramifications they bring and the impact they have on modern society. He examines the new companies that have entered the field and those that have failed or were acquired giving a complete history of AR progress. He explores the possible future developments providing readers with the tools to understand issues relating to defining, building, and using their perception of what is represented in their perceived reality, and ultimately how we assimilate and react to this information. In *Augmented Reality: Where We Will All Live 2nd Edition*, Jon Peddie has amassed and integrated a corpus of material that is finally in one place. It will serve as a comprehensive guide and provide valuable insights for technologists, marketers, business managers, educators and academics who are interested in the field of augmented reality, its concepts, history, practices, and the science behind this rapidly advancing field of research and development.

*Working For USPS* A. Gregory,2016-06-21 Have you ever thought about being a mail carrier for the USPS? If so, now's the time because the United States Postal Service is hiring like never before. After a job freeze for far too long, full-time employees now retiring, and a growth in packages, the post office needs help delivering the mail like never before. A new position called City Carrier Assistant (CCA) is now open for prospective employees. But before you go to the trouble of jumping through hoops to get the position, only to find it's simply not what you expected, read this book to get more of an idea what you're getting yourself into. The author tried the job, and within these pages is what this one particular person experienced. The conflict of what happens in reality and the proposed practices was so unbelievable to the author, that this book had to be written. This is a first-hand account of what an average person might experience as they go through the process of applications, orientations, training, and finally on the street delivering the mail. We guarantee what you imagined will be nothing like the reality. So don't go in blind to a job you're not familiar with, and quickly become overwhelmed with propaganda and infinite forms to learn. Read this book and at least have a general idea of what to expect by seeing through the eyes of someone who has already done it. Whether you're looking to apply for the position, or just a postal customer who's curious about how their mail gets around from point A to point B, once finished with this book, you'll never look at the mail system the same way again.

*U. S. Postal Service (USPS)* Phil Herr,2010-10 Deteriorating financial conditions and declining mail volume have reinforced the need for the USPS to increase operational efficiency and reduce expenses in its mail processing network (MPN). This network consists of interdependent functions in 600 facilities. USPS developed several initiatives to reduce costs and increase efficiency; however, moving forward on some initiatives has been challenging because of the complexities involved in consolidating operations. This report assessed: (1) the overall status and results of USPS's efforts to realign its MPN; and (2) the extent to which USPS has consistently followed its guidance and applied these criteria in reviewing Area Mail Processing proposals for consolidation since the beginning of FY 2009. **U. S. Postal Service** William B. Shear,2009-12 The U.S. Postal Service (USPS) is facing significant

financial problems as mail volume is declining, 4.5% in FY 2008 and 11% projected for FY 2009. USPS lost \$2.8 billion in FY 2008 and projects a \$6.4 billion loss in FY 2009 (possibly more if it cannot cut \$5.9 billion in costs). As one way to cut costs, USPS is trying to improve the efficiency of mail delivery, which generates close to one-third of USPS's \$78 billion in expenses. Recognizing the sizable impact of delivery on USPS's finances and operations, this report addresses: (1) how USPS monitors delivery efficiency; (2) characteristics of delivery units that affect their efficiency; and (3) the status and results of USPS's actions to improve delivery efficiency, in particular USPS's Flats Sequencing System. *U. S. Postal Service: USPS Has Taken Steps to Strengthen Network Realignment Planning and Accountability and Improve Communication* Phillip Herr, 2009 Reports have been issued on the USPS strategy for realigning its mail processing network and improving delivery performance info. These reports recommended that the USPS: (1) strengthen planning and the overall integration of its realignment efforts, and enhance accountability by establishing measurable targets and evaluating results; (2) improve delivery service standards and performance measures; and (3) improve communication with stakeholders by improving public notice, engagement, and transparency. This testimony discusses USPS's actions toward: (1) strengthening network realignment planning and accountability; (2) improving delivery performance info.; and (3) improving communication with stakeholders.
