Introduction to Interlinguistics Federico

Gobbo, 2020-01-25 Script from the year 2020 in the subject Speech Science / Linguistics, grade: 1.0, University of Amsterdam (ACLC), course: Introduction to Interlinguistics (105218036Y), language: English, abstract: This book is the result of the Lecture Notes produced for the class Introduction to Interlinguistics held at the University of Amsterdam during my first mandate as Special Chair holder there (2014-2019). This means that the intended readers are my students, who may come from the Humanities, such as English Studies or Philosophy, as well as from more formally oriented curricula, such as Logic or Artificial Intelligence. The structure of the volume follows the structure of the class: there are seven chapters that correspond to the seven weeks of contact hours. Thus, the expression in this chapter is equivalent to in this week. The first three chapters form Part I, which gives the theoretical basis, while the second three chapters of Part II apply the theory to major case studies in Interlinguistics. Please note that there is more material than I succeed to cover in the classroom - I am very ambitious - and that I explain in class the content of this book. This means that some sections may be skipped, depending on the specific class. For details, please pay attention to the official communication sent to class members. In studying this book you will acquire the conceptual toolbox of the working interlinguist. Technical terms and important names are indicated in bold and referred to the index by the end of the book, to facilitate students. Readers who do not belong to my students' cohorts may also appreciate, as - to the best of my knowledge - there is no such book published in English yet. Comparable published works in other languages are: first, the book by Barandovska [1995], written for advanced

Esperanto speakers enrolled the programme in Interlinguistics Studies at the Adam Mickiewicz University in Poznań; second, my short textbook in Italian [Gobbo, 2009],

Advertising Education Around the World Jef I.

Richards, Billy I. Ross, American Academy of Advertising, Michigan State University. Department of Advertising & Public Relations, 2014 Advertising resides at the hub of most countries' economy, so advertising education is by necessity, a global experience and practice. There are degree programs, tracks, concentrations, specializations or courses in advertising to be found in almost every corner of the globe. Most of them draw, or drew, from programs in the United States, but each of them has its own unique character and hurdles, and each has learned its own lessons. To advance standards everywhere, the hard-learned experiences of educators in one country must be shared with those in other places. This book is a small step toward building a global network among people who share a common interest: advertising. -- Back cover.

My First Polish Dictionary, 2019-03-05 With colorful, eye-catching illustrations to stimulate imagination and curiosity, this Polish picture dictionary is specially designed for children ages 5 to 12. It contains more than 1,000 everyday words (from colors, animals, household items, foods and more)--each illustrated and translated into Polish with accompanying phonetic pronunciation. The illustrations are arranged alphabetically by English word so even young readers can easily search for words. Each one is labeled with clear, bold type and the commonsense pronunciation makes it easy to begin speaking Polish right away! Recent studies suggest that children should begin learning a foreign language before age 10 for best results. This dictionary is a fun, engaging way for parents or

grandparents to introduce Polish to their young children and grandchildren. Teachers will also find the dictionary useful for students who are learning Polish from KG and up.

Multilingualism and Applied Comparative Linguistics (Volume II) Frank Boers, Jeroen Darquennes, Koen Kerremans, 2009-10-02 In February 2006 the first international conference on Multilingualism and Applied Comparative Linguistics (MACL) was held in Brussels, Belgium. The aim of the MACL conference was to bring together scholars from various branches of applied linguistics with a shared interest in cross-linguistic and cross-cultural communication. The conference thus fostered an exchange of knowledge and expertise among researchers from various disciplines, including educational linguistics, cultural linguistics, terminography, translation studies and studies of specialised languages. The present book is the second of two volumes containing a selection from the approximately 120 papers that were presented at that three-day event. The book comprises five chapters, reflecting different research perspectives on cross-linguistic and cross-cultural communication. The first chapter covers research articles on metaphors and planned languages. The second chapter comprises articles dealing with language attitudes, language proficiency and language practices in cross-linguistic and cross-cultural, communicative contexts. Chapter three features articles in the field of discourse-analysis research. In the fourth chapter research is presented that pertains to terminology and specialised languages. Finally, chapter five deals with translation studies.

Brief Integrated Motivational Intervention Hermine L.

Graham, Alex Copello, Max J. Birchwood, Emma Griffith, 2016-09-01 Brief Integrated Motivational Intervention provides clinicians and specialist practitioners with a brief, evidence-based treatment approach for motivating clients, who have comorbid mental health and alcohol and drug misuse. Combines CBT, motivational interviewing, and the authors' own cognitive-behavioural integrated treatment (C-BIT) to engage clients in meaningful dialogue for change. Utilizes the short 'window of opportunity' when clients are admitted to psychiatric hospital or have recently relapsed, and helps clinicians to maximize the potential of this 'teachable moment' Helpful

tools such as session-specific content, illustrative case material and easy-to-use worksheets facilitate implementation of the approach across a range of settings including inpatient, community, and residential. Developed by an expert team with many years of experience in both research and practice in the fields of psychosis and addiction

Cognitive-Behavior Therapy for Children and Adolescents Eva Szigethy, John R. Weisz, Robert L. Findling, 2012-09-24 *Cognitive-Behavior Therapy for Children and Adolescents* provides readers with the defining fundamentals of CBT in an accessible, down-to-earth style. In addition, a well-integrated, developmentally appropriate approach is detailed for a number of the mental disorders and conditions that are most common among children and adolescents. This unique work provides the following: Explications of innovative CBT techniques in the treatment of children with chronic physical illness and depressive, bipolar, anxiety (including OCD and PTSD), eating, elimination, and disruptive behavior disorders A comprehensive chapter features the clinical implications and applications of combining CBT with psychopharmacological treatment Videos on the

accompanying DVD demonstrate CBT techniques with children or adolescents with depression, anxiety, OCD, eating disorder, medical illness, and disruptive behavior disorder. Guidance for integrating parents and families into the child's treatment is shared for every disorder covered in the book. Extensive case examples, key clinical points, and self-assessment questions and answers will further equip readers to effectively and thoughtfully apply CBT. Useful chapter appendixes include accessible tables of CBT concepts; patient and parent handouts; and clinical exercises, activities, and tools that further augment the text. Finally, because factors such as race, ethnicity, religion, immigration status, and sexual orientation may affect the therapeutic relationship, diagnosis, and treatment of patients, a separate chapter on conducting effective CBT with culturally diverse children and adolescents is provided. Clinicians will gain a robust understanding of CBT practice with children and adolescents -- so that they can also do it - - and do it effectively. This unique, easy-to-use guide is an invaluable and worthy reference for all mental health practitioners who work with children and adolescents. No other text on the subject will match it.

Constructive Adpositional Grammars Marco

Benini, Federico Gobbo, 2011-05-25 This book presents a new paradigm of natural language grammar analysis, based on adposition as the key concept, considered a general connection between two morphemes – or group of morphemes. The adpositional paradigm considers the morpheme as the basic unit to represent morphosyntax, taken as a whole, in terms of constructions, while semantics and pragmatics are treated accordingly. All linguistic observations within the book can be described through the methods and tools of Constructive Mathematics, so that the modelling becomes formally feasible. A full description in

category-theoretic terms of the formal model is provided in the Appendix. A lot of examples taken from natural languages belonging to different typological areas are offered throughout the volume, in order to explain and validate the modeling – with special attention given to ergativity. Finally, a first real-world application of the paradigm is given, i.e., conversational analysis of the transcript of therapeutic settings in terms of constructive speech acts. The main goal of this book is to broaden the scope of Linguistics by including Constructive Mathematics in order to deal with known topics such as grammaticalization, children's speech, language comparison, dependency and valency from a different perspective. It primarily concerns advanced students and researchers in the field of Theoretical and Mathematical Linguistics but the audience can also include scholars interested in applications of Topos Theory in Linguistics.

The volume demonstrates clear-cut yet flexible ways to enhance client engagement, foster metacognitive awareness, facilitate emotional processing, address low self-esteem and fear of uncertainty, and much more. Reproducible handouts and forms are included.

Building Customer-brand Relationships Don E.

Schultz, Beth E. Barnes, Heidi F. Schultz, Marian

Azzaro, 2015-01-28 Almost every advertising, promotion, or

marketing communications textbook is based on an inside-out approach, focusing on what the marketer wants to communicate to customers and prospects. This text takes a different view - that the marketer and the customer build the ongoing brand value together. Rather than the marketer trying to 'sell', the role of the marketer is to help customer buy. To do that, a customer view is vital and customer insight is essential. Customer insights allow the marketer to understand which audiences are important for a product, what delivery forms are appropriate, and what type of content is beneficial. Building Customer-Brand Relationships is themed around the four key elements marketing communicators use in developing programs - audiences, brands, delivery, and content - but provides an innovative approach to marketing communications in the 'push-pull' marketplace that combines traditional outbound communications (advertising, sales promotion, direct marketing, and PR) with the inbound or 'pull' media of Internet, mobile communications, social networks, and more. Its 'customer-centric' media planning approach covers media decision before dealing with creative development, and emphasizes measurement and accountability. The text's concepts have been used successfully around the world, and can be adapted and adjusted to any type of product or service.
