Introduction to Interlinguistics Federico Gobbo,2020-01-25 Script from the year 2020 in the subject Speech Science / Linguistics, grade: 1.0, University of Amsterdam (ACLC), course: Introduction to Interlinguistics (105218036Y), language: English, abstract: This book is the result of the Lecture Notes produced for the class Introduction to Interlinguistics held at the University of Amsterdam during my first mandate as Special Chair holder there (2014-2019). This means that the intended readers are my students, who may come from the Humanities, such as English Studies or Philosophy, as well as from more formally oriented curricula, such as Logic or Artificial Intelligence. The structure of the volume follows the structure of the class: there are seven chapters that correspond to the seven weeks of contact hours. Thus, the expression in this chapter is equivalent to in this week. The first three chapters form Part I, which gives the theoretical basis, while the second three chapters of Part II apply the theory to major case studies in Interlinguistics. Please note that there is more material than I succeed to cover in the classroom - I am very ambitious - and that I explain in class the content of this book. This means that some sections may be skipped, depending on the specific class. For details, please pay attention to the official communication sent to class members. In studying this book you will acquire the conceptual toolbox of the working interlinguist. Technical terms and important names are indicated in bold and referred to the index by the end of the book, to facilitate students. Readers who do not belong to my students' cohorts may also appreciate, as - to the best of my knowledge - there is no such book published in English yet. Comparable published works in other languages are: first, the book by Barandovska [1995], written for advanced Esperanto speakers enrolled the programme in Interlinguistics Studies at the Adam Mickiewicz University in Poznań; second, my short textbook in Italian [Gobbo, 2009],

Advertising Education Around the World Jef I. Richards, Billy I. Ross, American Academy of Advertising, Michigan State University. Department of Advertising & Public Relations, 2014 Advertising resides at the hub of most countries' economy, so advertising education is by necessity, a global experience and practice. There are degree programs, tracks, concentrations, specializations or courses in advertising to be found in almost every corner of the globe. Most of them draw, or drew, from programs in the United States, but each of them has its own unique character and hurdles, and each has learned its own lessons. To advance standards everywhere, the hard-learned experiences of educators in one country must be shared with those in other places. This book is a small step toward building a global network among people who share a common interest: advertising. -- Back cover.

Fluent Forever Gabriel Wyner, 2014-08-05 NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. “A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you’ll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Spanish for Reading Fabiola Franco, Karl C. Sandberg, 1998-03-01 A unique approach to Spanish reading comprehension, Spanish for Reading can be used as a textbook supplement in classrooms or by anybody who is teaching himself Spanish. It begins by demonstrating similarities between words and parts of words in Spanish and English, and proceeds to offer practical instruction that will help readers broaden recognition of words and phrases. Each of the book's fifteen chapters concludes with a reading passage, the first of them quite easy to comprehend, and successive passages increasingly complex and sophisticated. Early passages are simple essays on Spain's and the Spanish-speaking world's language, geography, and culture. Later passages are excerpts from well-known works by world renowned Spanish writers, including Jorge Luis Borges, Pablo Neruda, and Gabriel Garcia-Marquez. Students who use this volume methodically will ultimately be reading and understanding these passages in their original, unedited Spanish, without need to seek outside help. Short of spending time in Spain or Latin America, here is as good an introduction to Spanish culture as a student will be able to find anywhere. Photos and line drawings.
