Advancements in Geotechnical Engineering Hany Shehata, Mona Badr, 2020-11-19

This book intends directly the practical engineers, who will be of great interest in reading the interesting chapters. Earthwork projects are critical components in civil construction and often require detailed management techniques and unique solution methods to address failures. Being earthbound, earthwork is influenced by geomaterial properties at the onset of a project. Hence, an understanding of the in-situ soil properties and all geotechnical aspects is essential. Analytical methods for earth structures remain critical for researchers due to the mechanical complexity of the system. Striving for better earthwork project management, the geotechnical engineering community continues to find improved testing techniques for determining sensitive properties of soil and rock, including stress wave-based, non-destructive testing methods. To minimize failure during earthwork construction, past case studies and data may reveal useful lessons and information to improve project management and minimize economic losses.

Haida Monumental Art George F. MacDonald, 2011-11-01 The Haida of the Queen Charlotte Islands in British Columbia constructed some of the most magnificent houses and erected some of the most beautifully carved totem poles on the Northwest Coast. During the last quarter of the nineteenth-century, images of the Haida's immense cedar houses and soaring totem poles were captured, first on glass plates and later on film, by photographers who travelled to then-remote villages such as Masset and Skidegate to marvel at, and record, what they saw there. Haida Monumental Art, initially published as a limited edition hardcover and finally available in paperback, includes a large number of these remarkable photographs, selected from a collection of over 10,000 original prints and photographic plates. They depict the Haida villages at the height of their glory and record

their tragic deterioration only a few decades later. As well, this edition contains the complete text from the first edition, including site plans and detailed descriptions of fifteen major villages and several smaller sites, which are catalogued by house and pole. By combining archeology and ethnohistory, George MacDonald presents an integrated framework for understanding the physical structure of a Haida village. He explains how the houses and poles are part of a fascinating web of myth, family history and Haida cosmology, which provides a unique insight into Haida culture.

Jack Kennedy Barbara Leaming, 2006 An account of the friendships and forces that shaped JFK's presidency documents how the relationships and rivalries forged during his college years played pivotal roles in American history, in a volume that offers insight into the sources of Kennedy's intellectual beliefs as well as his presidential goals.

How to Build a Dinosaur Jack Horner, James Gorman, 2009-03-19 A world-renowned paleontologist reveals groundbreaking science that trumps science fiction: how to grow a living dinosaur. Over a decade after Jurassic Park, Jack Horner and his colleagues in molecular biology labs are in the process of building the technology to create a real dinosaur. Based on new research in evolutionary developmental biology on how a few select cells grow to create arms, legs, eyes, and brains that function together, Jack Horner takes the science a step further in a plan to reverse evolution and reveals the awesome, even frightening, power being acquired to recreate the prehistoric past. The key is the dinosaur's genetic code that lives on in modern birds- even chickens. From cutting-edge biology labs to field digs underneath the Montana sun, *How to Build a Dinosaur* explains and enlightens an awesome new science.

A Night of Serious Drinking René Daumal, 2003-04-29 The French poet and author of *Mount Analogue* shares a satirical allegory of the absurdities of intellectual society. As in René Daumal's cult classic *Mount Analogue*, *A Night of Serious Drinking* concerns an autobiographical protagonist on a mind-expanding journey. But rather than seeking enlightenment, the anonymous narrator recounts an evening getting drunk with a group of friends. As the party becomes intoxicated and exuberant, the narrator's wandering lead him from seeming paradises to the depths of pure hell. The characters our hero encounters go by absurd titles, such as Anthographers, Fabricators of useless objects, Scienters, Nibblists, and Clarificators. Yet the inhabitants of these strange realms are only too familiar: scientists dissecting an animal in their laboratory, a wise man surrounded by his devotees, politicians angling for influence, and poets expounding their rhetoric. Their hilarious antics and intellectual games reveal incisive social commentary that combines poetic imagination and philosophical depth.

Breaking Robert's Rules Lawrence Susskind, Jeffrey L. Cruikshank, 2006 This edition clearly spells out how any group can work together effectively. After briefly explaining the problems created by Robert's Rules, the guide outlines the five key steps toward consensus building, and addresses the specific problems that often get in the way of a group's progress.
