C++ Toolbox for Verified Computing I Rolf Hammer,Matthias Hocks,Ulrich Kulisch,Dietmar Ratz,2012-12-06 Our aim in writing this book was to provide an extensive set of C++ programs for solving basic numerical problems with verification of the results. This C++ Toolbox for Verified Computing I is the C++ edition of the Numerical Toolbox for Verified Computing l. The programs of the original edition were written in PASCAL-XSC, a PASCAL eXtension for Scientific Computation. Since we published the first edition we have received many requests from readers and users of our tools for a version in C++. We take the view that C++ is growing in importance in the field of numeri cal computing. C++ includes C, but as a typed language and due to its modern concepts, it is superior to C. To obtain the degree of efficiency that PASCAL-XSC provides, we used the C-XSC library. C-XSC is a C++ class library for eXtended Scientific Computing. C++ and the C-XSC library are an adequate alternative to special XSC-Ianguages such as PASCAL-XSC or ACRITH-XSC. A shareware version of the C-XSC library and the sources of the toolbox programs are freely available via anonymous ftp or can be ordered against reimbursement of expenses. The programs of this book do not require a great deal of insight into the features of C++. Particularly, object oriented programming techniques are not required.

V for Vendetta Book & Mask Set ALAN. MOORE,2021-04-27 In a world without political freedom, personal freedom and precious little faith in anything comes a mysterious man in a white porcelain mask who fights political oppressors through terrorism and seemingly absurd acts. It's a gripping tale of the blurred lines between ideological good and evil. The inspiration for the hit 2005 movie starring Natalie Portman and Hugo Weaving, this amazing graphic novel is packaged with a collectable reproduction of the iconic V mask.

Process and Procedure in EU Administration Carol Harlow Harlow KC,Richard Rawlings,2014-11-20 This book is about the administrative procedures of the European Union, which we see as the 'super glue' holding in place the sprawling structures of the EU governance system. The early chapters deal with the structures expansively defined, the diverse functions of administrative procedures in the EU and the values that underpin them, concentrating on the respective contributions of the legislature and administration. A separate chapter deals with the important procedural function of rights protection through the two Community Courts and the contribution of the European Ombudsman. We then turn to 'horizontal' or general procedures, dealing with executive law-making, transparency and the regulation of government contracting. A study of Commission enforcement procedure ends the section. 'Vertical' or sector-specific studies in significant areas of EU administration follow, including competition policy, cohesion policy (structural funds) and financial services regulation. Separate chapters deal with policing cooperation through Europol and with the interplay of international and EU institutions in the fields of environmental procedure and human rights. The final chapter contains the authors' reflections on current proposals for codification but ends with a general evaluation of the role and contribution of

administrative procedure in the construction of the EU.
