Particle Accelerator Design: Computer Programs John Colonias,2012-12-02 Particle Accelerator Design: Computer Programs describes some of the most important computer programs applicable to the design of particle accelerators. Computer programs that calculate magnetic and electric fields are considered, along with programs that calculate orbits of particles in a magnetic and/or electric field. Some representative programs useful in the design of linear accelerator-type cavities are also discussed. This book is comprised of six chapters and begins with a review of two-dimensional magnetostatic programs, including TRIM, LINDA, NUTCRACKER, MAREC, GRACY, and COILS. The University of Colorado's magnet program is also examined. The next chapter is devoted to programs capable of solving problems relating to the calculation of electrostatic fields in two-dimensional geometries. The reader is also introduced to programs that perform calculations of three-dimensional linear and nonlinear problems, along with programs that employ matrix formalism and integration of equations of motion. The final chapter looks at programs for linear accelerator-type cavities, including CURE, JESSY, MESSYMESH, and AZTEC. This monograph will be a useful resource for physical scientists, engineers, and computer programmers.

Judicial Acts and Investment Treaty Arbitration Berk Demirkol,2018-01-11 Judicial acts of states are becoming increasingly subjected to international investment claims. This book focuses on distinctive particularities of these claims. Although there are no special responsibility regimes for different functions of the state, the application of investment treaty standards and the threshold for their breach may vary depending on the function involved. Accordingly, in order for the state to incur responsibility for a wrongful act committed in the exercise of its judicial function, there are some specific conditions that should be met: the investor must establish that the state is responsible for a breach attributable to the state; the investment tribunal has jurisdiction over the particular dispute; and the damage that the investor has suffered is a result of the particular breach. Berk Demirkol addresses questions in relation to the substance, jurisdiction, admissibility, and remedies in cases where state responsibility arises from a wrongful judicial act.
