Dayr Al-Barshā Harco Willems, Lies op de Beeck, 2007 This is the first volume of the final reports of the Mission of the K.U. Leuven in Dayr al-Barsha (Middle Egypt). It contains the publication (in colour photographs and line drawings in colour) of three small tombs probably dated immediately after the Unification of Egypt in the reign of pharaoh Mentuhotep II (XIth Dynasty). After an introduction on the long-term research strategy of the Dayr al-Barsha project it first offers an account of the setting of the tombs and of earlier research carried out there. This is followed by a detailed account of each of the three monuments, including a detailed philological commentary of the texts. These include two autobiographical inscriptions, of which one has received little attention, while the other is here published in full for the first time. The scant archaeological remains found in the tombs are also dealt with in detail. The two tombs are contemporary with that of the nomarch Ahanakht I, and offers a rare insight into the functioning of a nomarchal court in the early Middle Kingdom. The last chapter offers an analysis of this, and also advances a hypothesis on the way king Mentuhotep succeeded in integrating the Middle Egyptian provincial elites into the newly united kingdom.

The Fissured Workplace David Weil,2014-02-17 In the twentieth century, large companies employing many workers formed the bedrock of the U.S. economy. Today, on the list of big business's priorities, sustaining the employer-worker relationship ranks far below building a devoted customer base and delivering value to investors. As David Weil's groundbreaking analysis shows, large corporations have shed their role as direct employers of the people responsible for their products, in favor of outsourcing work to small companies that compete fiercely with one another. The result has been declining wages, eroding benefits, inadequate health and safety protections, and ever-widening income inequality. From the perspectives of CEOs and investors, fissuring--splitting off functions that were once managed internally--has been phenomenally successful. Despite giving up direct control to subcontractors and franchises, these large companies have figured out how to maintain the quality of brand-name products and services, without the cost of maintaining an expensive workforce. But from the perspective of workers, this strategy has meant stagnation in wages and benefits and a lower standard of living. Weil proposes ways to modernize regulatory policies so that employers can meet their obligations to workers while allowing companies to keep

the beneficial aspects of this business strategy.
