Vaishno Devi Aruna Balakrishna Singh,1971-04-01 Bhoodevi, the earth, was being ravaged by evil asuras. She turned to the gods for aid but even the powerful trinity of Brahma, Vishnu and Shiva, were helpless. Concerned by the events, their consorts, Saraswati, Lakshmi and Parvati combined their powers and created Vaishnavi, a woman of unsurpassed strength. Vaishnavi fought and destroyed the asuras but the goddesses asked her to stay on and not return to heaven. Though Vaishnavi did not realize it, her story was only just beginning. Amar Chitra Katha tells the story of Vaishnavi's transformation into the meditating goddess, Vaishno Devi, whose abode in the Himalayas is visited by millions of pilgrims every year.

Cultivation and Utilization of Aromatic Plants H. Panda,2005-10-05 Aroma has played a vital role, directly as well as indirectly, in the life of human beings since its appearance on the earth as a result of evolution. India, Egypt and Persia were amongst the first countries to have conceived the process of distillation of essential oils. Aromatic plants have essential or aromatic oils naturally occurring in them. They help heal mental ailments and other diseases. India is endowed with a rich wealth of medicinal plants. Aromatic (Aroma Producing) plants are those plants which produce a certain type of aroma. Their aroma is due to the presence of some kind of essential oil with chemical constituents that contain at least one benzene ring in their chemical configuration. These plants have made a good contribution to the development of ancient Indian material medica. In recent years, there has been a tremendous growth of interest in plant based drugs, pharmaceuticals, perfumery products, cosmetics and aroma compounds used in food flavors and fragrances and natural colors in the world. The chemical nature of these aromatic substances may be due to a variety of complex chemical compounds. There is a definite trend to adopt plant based products due to the cumulative derogatory effects resulting from the use of antibiotic and synthetics and except for a few cultivated crops, the availability of plant based material is mainly from the natural sources like forests and wastelands. There is a need to introduce these crops into the cropping system of the county, which, besides meeting the demands of the industry, will also help to maintain the standards on quality, potency and chemical composition. During the past decade, demand for aromatic plants and its products has attracted the worldwide interest, India being the treasure house of biodiversity, accounts for thousands of species which are used in herbal drugs. 90% of herbal industry requirement of raw material is taken out from the forests. This book basically deals with cultivation of matricaria chamomilla, present agro production technology status of celery, cultivation of ocimum gratissimum linn. var clocimum, the production and perfume potential of jasminum collections, chemical modification of turmeric oil to more value added products, biologically active compounds from turpentine oil, folk medicinal uses of indigenous aromatic plants in nepal , traditional uses of selected aromatic plants of bhutan and their cultivation prospects, blending aspects of perfumes with turpentine constituents, the chemistry of mint flavour, essential oils of cinnamomum species, citral containing cymbopogon species etc. The aim of publishing this book is to provide multidisciplinary information on aromatic plants. The book covers method of cultivation and utilization of various aromatic plants. This is very useful book for farmers, technocrats, agriculture universities, libraries, new entrepreneurs etc.

Understanding Culture and Society in India Abha Chauhan,2021-06-26 This book is an in-depth account of people's cultural and religious life in the Jammu region of Jammu and Kashmir, India. It brings out the significance of Sufi and deity shrines as alternative places of worship that give meaning and purpose to people's lives. It includes sites and practices commonly associated with Islam/Sufism and Hinduism as spaces of shared culture. Most of the existing literature of Jammu and Kashmir is on Kashmir focusing mostly on topics such as politics, state, identity, conflict or violence. This book proposes to go beyond these works by delimiting the focus and area of the study to culture, society and religion. It explores the sites of religious pluralism and tolerance in the violence-ridden territory of Jammu and Kashmir. The chapters are mainly based on ethnographic data collected through qualitative methods like observation - participant and non-participant, case studies, in-depth interviews and oral history. The book is of interest to researchers, both faculty and graduate students, in the areas of sociology of religion, social anthropology, religious studies, cultural studies, Sufism, shrines and deity worship in South Asia.

Biodiversity of the Himalaya: Jammu and Kashmir State Ghulam Hassan Dar,Anzar A. Khuroo,2020-02-26 The Himalaya, a global biodiversity hotspot, sustains about one-fifth of the humankind. Nestled within the north-western mountain ranges of the Himalaya, the Jammu and Kashmir (J&K) State harbours more than half of the biodiversity found in the Indian Himalaya. The wide expanse of State, spread across the subtropical Jammu, through the temperate Kashmir valley, to the cold arid Ladakh, is typical representative of the extensive elevational and topographical diversity encountered in the entire Himalaya. This book, the most comprehensive and

updated synthesis ever made available on biodiversity of the J&K State, is a valuable addition to the biodiversity literature with global and regional relevance. The book, arranged into 7 parts, comprises of 42 chapters contributed by 87 researchers, each of whom is an expert in his/her own field of research. The precious baseline data contained in the book would form the foundation for assessing current status of knowledge about the bioresources, identify the knowledge gaps, and help prioritization of conservation strategies to steer the sustainable use of biodiversity in this Himalayan region. Given the breadth of topics covered under the banner of biodiversity in this book, it can surely serve as a model for documentation of biodiversity in other regions of the world. The book will be of immense value to all those who, directly or indirectly, have to deal with biodiversity, including students, teachers, researchers, naturalists, environmentalists, resource managers, planners, government agencies, NGOs and the general public at large.
