Teaching IFRS Richard M.S. Wilson,Ralph W. Adler,2013-09-13 The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of, and insights into, the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those courses. This book was originally published as a special issue of Accounting Education: An international journal.

Competentie-ontwikkeld Onderwijs ,2008 In debatten over de vernieuwingen in onderwijs zijn competentiegericht onderwijs en competentie-ontwikkeld onderwijs vaak en graag gebruikte begrippen. In het beroepsgericht secundair onderwijs, het deeltijds onderwijs, het volwassenonderwijs en het hoger onderwijs lopen al projecten en programma's om te werken met competenties. Maar over de precieze inhoud van deze begrippen bestaat in de Vlaamse onderwijswereld geen duidelijkheid. Daarom organiseerde de Vlor hierover een probleemverkenning. Raadsleden, praktijkdeskundigen en academici zochten, elk vanuit hun specifieke kennis en invalshoek, naar antwoorden op vragen als: Wat betekent het begrip competentie nu precies? En wat is competentie-ontwikkeld onderwijs?Welke meerwaarde heeft competentie-ontwikkeld onderwijs en wat zijn de valkuilen Is competentie-ontwikkeld onderwijs meer aangewezen in bepaalde onderwijsniveaus of -sectoren dan in andere? Welke systeemvoorwaarden zijn onmisbaar om competentie-ontwikkeld onderwijs te kunnen organiseren? Deze publicatie bundelt de bijdragen van de verschillende deskundigen en sluit af met een synthesesetkst.

A People's Court ? Jos Hoevenaars,2018 Each year the European Court of Justice delivers over a thousand decisions on the basis of EU law that affect the Member States as well as the lives of their citizens. Most of these decisions are the result of requests for a preliminary ruling sent by national courts and tribunals seeking an interpretation of EU law. While this procedure is seen as central to the transformation of Europe, significant ambiguity remains on why it is used, and who is primarily responsible for its success. The current book examines the practice of the preliminary reference procedure. By approaching it from the perspective of those who participate in it, the study takes on prevalent assumptions about the how

and why of national court cases that reach the European Court of Justice through a request for a preliminary ruling. This empirical research will appeal to scholars engaged in the relationship between law and European integration as well as practitioners and litigants interested in the practice of the preliminary reference procedure. Life Cycle Assessment in the Agri-food Sector Bruno Notarnicola, Roberta Salomone, Luigia Petti, Pietro A. Renzulli, Rocco Roma, Alessandro K. Cerutti, 2015-01-06 The book presents an overview of the International practices and state-of-the-art of LCA studies in the agri-food sector, both in terms of adopted methodologies and application to particular products; the final purpose is to characterise and put order within the methodological issues connected to some important agri-food products (wine, olive oil, cereals and derived products, meat and fruit) and also defining practical guidelines for the implementation of LCAs in this particular sector. The first chapter entails an overview of the application of LCA to the food sector, the role of the different actors of the food supply chain and the methodological issues at a general level. The other chapters, each with a particular reference to the main foods of the five sectors under study, have a common structure which entails the review of LCA case studies of such agri-food products, the methodological issues, the ways with which they have been faced and the suggestion of practical guidelines.

Purpose & Practice Denis Burke, 2013-01-03 Purpose & Practice lays out tools of incalculable value to anyone interested in getting really good at what they do, whatever that may be. These are tools, some little known, of mental approach from the art, science and philosophy of Aikido. This book reveals some revolutionary ideas behind the art and the links between its extraordinary physical results and practices of Mind, all of which adds up to a blueprint as applicable to organisations as it is for individuals. Aikido is often justifiably seen as one of the most impenetrable martial arts, largely because people so often experience it, even for many years, without knowing some of its core elements, which have all too often been forgotten, obscured or unknown. Purpose & Practice is a challenging book that fills in some of these essential gaps while helping the reader accelerate his or her progress and development.

The Ethics of Bankruptcy Jukka Kilpi, 2002-01-08 The fundamental ethical problem in bankruptcy is that insolvents have promised to pay their debts but can not keep their promise. The Ethics of Bankruptcy examines the morality of bankruptcy. The author compares and contrasts the Humean doctrine of promises as useful conventions with the Kantian view of autonomous agency constituting promissory obligations; he explores ethical concerns raised by forgiveness, utilitarianism and distributive justice and the moral aspects of insolvents' contractual, fiduciary, tortious and criminal liability. Finally, the author assesses recent bankruptcy law reforms. Bankruptcies severely hurt creditors and society. For the insolvents and their families the experience is painful and stigmatising, yet philosophers have paid little attention to the moral aspects of this violent social phenomenon. The Ethics of Bankruptcy is the first comprehensive study that employs the tools of ethics to examine the controversies surrounding insolvency, which makes valuable and sometimes controversial reading in a decade recovering from the Recession.
