Networks of Outrage and Hope Manuel Castells, 2015-06-04 Networks of Outrage and Hope is an exploration of the new forms of social movements and protests that are erupting in the world today, from the Arab uprisings to the indignadas movement in Spain, from the Occupy Wall Street movement to the social protests in Turkey, Brazil and elsewhere. While these and similar social movements differ in many important ways, there is one thing they share in common: they are all interwoven inextricably with the creation of autonomous communication networks supported by the Internet and wireless communication. In this new edition of his timely and important book, Manuel Castells examines the social, cultural and political roots of these new social movements, studies their innovative forms of self-organization, assesses the precise role of technology in the dynamics of the movements, suggests the reasons for the support they have found in large segments of society, and probes their capacity to induce political change by influencing people's minds. Two new chapters bring the analysis up-to-date and draw out the implications of these social movements and protests for understanding the new forms of social change and political democracy in the global network society.

**European Perceptions of China and Perspectives on the Belt and Road Initiative** Stephen Rowley, 2021-10-05 European Perceptions of China and Perspectives on the Belt and Road Initiative is a collection of fourteen essays on the way China is perceived in Europe today. These perceptions – and they are multiple – are particularly important to the People's Republic of China as the country grapples with its increasingly prominent role on the international stage, and equally important to Europe as it attempts to come to terms with the technological, social and economic advances of the Belt and Road Initiative. The authors are, on the whole, senior academics specializing in such topics as International Relations and Security, Public Diplomacy, Media and Cultural Studies, and Philosophy and Religion from more than a dozen different European countries and are involved in various international projects focussed on Europe-China relations.

**Urban Growth and the Circular Economy** S. Syngellakis, J. Melgarejo, 2018-08-29 Presented at the 1st International Conference on Urban Growth and the Circular Economy that was held in Alicante, Spain the papers included in this book focus on the continuing and rapid growth of cities and their regions of influence and how that has led to the need to find new solutions which allow for promoting their sustainable development. The quest for the Sustainable City has until recently focused on the efficient use of resources with the application of technical advances giving rise to the definition of SMART Cities. The economic model emphasised however is still “linear” in the sense that the design and consumption follows the pattern of extraction of natural resources, manufacturing, product usage and waste disposal. The continuous growth of urban population has recently given rise to the emergence of a new model which responds better to the challenges of natural resource depletion as well as waste management. This model has been called the “circular economy”. The circular economy is a recent concept based on the reuse of what up to now has been considered wastes, reintroducing them into the productive cycle. The objective of the circular economy is to reduce consumption and achieve savings in terms of raw materials, water and

energy, thus contributing to the preservation of resources in order to reach sustainable development. One of the most important of these resources is water which is becoming a scarce commodity in an ever expanding world whose population demands a better standard of living. Water is required for agricultural purposes as well as by industry, in addition to its use by the general population. The recycling of water is an essential component of the circular economy. There is no possibility for the success of a long term economic policy without addressing the problems of natural resources and environmental pollution, which will affect the reuse of materials and products. The current market economy based on a linear model from resource extraction, manufacturing, consumption and waste disposal, has not proved a long term suitable solution, in spite of the substantial efforts made in reducing its environmental impacts. This is largely due to the continuous population growth, in a society that demands high standards of living, thus requiring an ever increasing share of natural resources.

**Wind Energy for Power Generation** K. R. Rao, 2019-10-17 This far-reaching resource covers a full spectrum of multi-faceted considerations critical for energy generation decision makers considering the adoption or expansion of wind power facilities. It contextualizes pivotal technical information within the real complexities of economic, environmental, practical and socio-economic parameters. This matrix of coverage includes case studies and analysis from developed and developing regions, including North America and Europe, Asia, Latin America, the Middle-East and Africa. Crucial issues to power generation professionals and utilities such as: capacity credits; fuel saving; intermittency; penetration limits; relative cost of electricity by generation source; growth and cost trends; incentives; and wind integration issues are addressed. Other economic issues succinctly discussed inform financial commitment to a project, including investment matrices, strategies for economic evaluations, econometrics of wind energy, cost comparisons of various investment strategies, and cost comparisons with other energy sources. Due to its encompassing scope, this reference will be of distinct interest to practicing engineers, policy and decision makers, project planners, investors and students working in the area of wind energy for power generation.

**The New Latin America** Fernando Calderón, Manuel Castells, 2020-08-04 Latin America has experienced a profound transformation in the first two decades of the 21st century: it has been fully incorporated into the global economy, while excluding regions and populations devalued by the logic of capitalism. Technological modernization has gone hand-in-hand with the reshaping of old identities and the emergence of new ones. The transformation of Latin America has been shaped by social movements and political conflicts. The neoliberal model that dominated the first stage of the transformation induced widespread inequality and poverty, and triggered social explosions that led to its own collapse. A new model, neo-developmentalism, emerged from these crises as national populist movements were elected to government in several countries. The more the state intervened in the economy, the more it became vulnerable to corruption, until the rampant criminal economy came to penetrate state institutions. Upper middle classes defending their privileges and citizens indignant because of corruption of the political elites revolted against the new regimes, undermining the model of neo-developmentalism. In the midst of political disaffection and public despair, new social movements, women, youth, indigenous people, workers, peasants, opened up avenues of hope against the background of darkness invading the continent. This book, written by two leading scholars of Latin America, provides a comprehensive and up-to-date account of the new Latin America that is in the process of taking shape today. It will be an indispensable text for students and scholars in Latin American Studies, sociology, politics and media and communication studies, and anyone interested in Latin America today.

**Empowering citizenship through journalism, information, and entertainment in Iberoamerica** ,2009

Los hispanos en los Estados Unidos ,2004

**Illiberal Liberal States** Elspeth Guild,Kees Groenendijk,2016-05-13 Understanding the dynamics of the illiberal practices of liberal states is increasingly important in Europe today. This book examines the changing relationship between immigration, citizenship and integration at the European and national arenas. It studies some of the main effects and questions the comprehensiveness of the exchange and coordination of public responses to the inclusion of third country nationals in Europe, as well as their compatibility with a common European immigration policy driven by a rights-based approach and the respect of the principles of fair and equal treatment of third country nationals. The volume reviews key national experiences of immigration and citizenship laws, the use of integration and the 'moving of ideas' between national arenas. The framing of integration in immigration and citizenship law and the ways in which policy convergence is being achieved through the EU framework on integration raises a number of conceptual dilemmas and a set of definitional premises in need of reflection and consideration.

Tackling Legal Impediments to Women's Economic Empowerment Katharine Christopherson,Audrey Yiadom,Juliet Johnson,Francisca Fernando,Hanan Yazid,Clara Thiemann,2022-02-18 It is well established that a wide range of legal impediments in countries' domestic laws have prevented women from achieving full economic empowerment, which in turn has negative macroeconomic implications. In many countries, laws often reflect and perpetuate gender norms that limit women's economic participation, and removal of these impediments through legal reform has been shown to be an effective method to catalyze greater participation of women in the economy—along with the related macroeconomic benefits. Once legal barriers are removed and provisions for more equal treatment under the law are embedded, the law can also be employed as a powerful tool to incentivize women to pursue equal opportunities, change mindsets regarding the role of women, and hold institutions and individuals accountable for achieving results. Accordingly, it is imperative for countries to focus on eliminating existing legal impediments and designing appropriate incentives to increase women's participation in the economy. This paper goes beyond previous Fund work by categorizing the key sources of laws that impede women's economic empowerment, as well as ways in which the law can be used as a tool to create behavioral changes and shifts in perceptions of women in the economy. Case studies of six countries (Iceland, Peru, Rwanda, The Philippines, Tunisia, and the United States) that rank high in gender equality in their respective regions demonstrate how legal reforms have been implemented in differing contexts to help achieve women's economic empowerment. Given the relevance to the Fund's mandate, the paper also notes the case for a stepped-up role for the IMF in advising on legal reforms that remove barriers to, and incentivize, women's economic empowerment. Although this paper highlights dominant belief systems and cultural norms that have contributed to limiting the economic empowerment of women, it does not intend to render any judgment on these systems or norms.

**Centenary of the Russian Revolution (1917-2017)** Andreu Mayayo i Artal,Antoni Segura i

Mas,2019-01-08 This collection of essays provides an historical, plural and original analysis of the Russian Revolution to mark its first centenary. It focuses on both regional aspects – such as the impact of the

Revolution in Spain and Latin America – and major events, ideas and phenomena, including the importance of World War I, the birth of the Communist International and the definition of revolution and counterrevolution. The book will mainly appeal to academic audiences, as well as non-specialized readers interested in the major issues of the contemporary world. It offers new insights into an event that contributed to the shaping of the twentieth century and that is still fundamental to understanding the world of today.

*The Oxford Handbook of Space Security* Saadia M. Pekkanen, 2024 The Oxford Handbook of Space Security focuses on the interaction between space technology and international and national security processes. Saadia M. Pekkanen and P.J. Blount have gathered a group of key scholars who bring a range of analytical and theoretical perspectives to take an analytically-eclectic approach to assessing space security from an international relations (IR) theory perspective. Bringing together scholarship from a group of leading experts, this volume explains how these contemporary changes will affect future security in, from, and through space.

*Global Governance from Regional Perspectives* Anna Triandafyllidou, 2017-06-09 Global Governance from Regional Perspectives argues that the academic debate on global governance has neglected the combination of power with value constellations/culture. Both input and output legitimacy, for instance, or the exercise of control and influence are inextricably related to culture, worldviews, and values. The book questions theoretically the Western hegemonic and hence 'invisible' definition of governance and related concepts, as well as the Western hegemony over global governance institutions. It looks from the ground up whether, and how, alternative practices, institutions/networks, and concepts/norms of global governance are emerging in relation to emerging powers and regional integration systems. Global Governance from Regional Perspectives starts with a critical reading of global governance from multi-disciplinary views and engages with two important and under-studied aspects, notably how global governance can be measured and what lies behind such measurements, and questions the democratic deficit of global governance. The book provides a series of regional and country perspectives on global governance which engage with a specific example of an institution, process, or issue that is used to highlight why and how the western hegemonic views and practices of global governance are (or not) contested. The book offers a mapping of global governance phenomena in different regions of the world and a critical readings of those. As such this volume is different from all international relations or political science collections on global governance and also opens up a new field of study that has been hitherto neglected in sociological or cultural studies.

Fostering Self-Regulated Learning through ICT Dettori, Giuliana, Persico, Donatella, 2010-09-30 This book presents the relationship between SRL and ICTs from several standpoints, addressing both theoretical and applicative issues, providing examples from a range of disciplinary fields and educational settings-- Provided by publisher.

**Globalisation and Migration** Ronaldo Munck, 2013-09-13 This book critically examines the new issues and new politics regarding migration in the era of globalisation from a majority world perspective. It examines the current shifts in the global political economy and the effects it has, for example, in relation to rural displacement. When and how does this lead to national and/or transnational migration? We need to examine the ways in which migration is cut across and impacts on the generation of racism and xenophobia in the west. The issue of remittances by migrants to the 'developing' nations needs careful study as does the controversial issue of 'brain drain' versus 'brain gain' through migration. The growing importance of trafficking for forced labour has now been taken up by various international bodies but is it the new

normality or simply an unfortunate side effect of globalisation to be overcome through legislation? Migration is becoming increasingly gendered in its composition and flows but also in the receiving countries where men and women do very different jobs. We can predict the increasing racialization and gendering of migration but how will the state and society respond to these shifts? This book was published as a special issue of *Third World Quarterly*.

*Rethinking State Politics in India* Ashutosh Kumar, 2012-03-12 Focusing on the twin issues of identity and development that are often signifiers of the unravelling politics in the federal polity, the book makes a concerted attempt to look at (and beyond) the states by exploring the specificities of the regions within these states. It does so through a comparative study from the vantage point of democratic politics as it unfurls in recent India. Emphasising that regions within the states are not merely politico-administrative instituted constructs but are also imagined or constituted, among others, in historical, geographic, economic, sociological or cultural terms, it argues that any meaningful comparative study of the regions would naturally straddle the disciplinary boundaries of social sciences. The book attempts to go beyond the states and look at the regions within them as a distinctive analytical category for an in-depth study of the democratic politics of identity and development unfolding at the state level.

*In Search of the Perfect Citizen?* Sergio Carrera, 2009-05-20 This book studies the normative intersection between integration, immigration and nationality in the European Union (EU). It examines the relationship between integration and the legal frameworks of admission, stay and access to nationality by third country nationals at national and European levels. Integration is being subject to multifaceted processes transforming its traditional policy and legal settings, as well as its classical theoretical premises and approaches. The Europeanisation of immigration policy has provoked the emergence of distinctive European approaches on integration. The legal elements of integration are being developed through two parallel settings: the EU Framework on Integration and European immigration law. These venues constitute two of the main pillars upon which the common EU immigration policy is being constructed, and their nexus raises several elements in need of reflection and study. This book examines the processes through which integration becomes a norm in nationality and immigration law and policy at the national and EU levels, and the implications of these processes for the legal status of third country nationals and the overall coherency of the common EU immigration policy.

**ICTs and Sustainable Solutions for the Digital Divide: Theory and Perspectives** Steyn, Jacques, Johanson, Graeme, 2010-09-30 *ICTs and Sustainable Solutions for the Digital Divide: Theory and Perspectives* focuses on Information and Communication Technologies for Development (ICT4D), which includes any technology used for communication and information. This publication researches the social side of computing, the users, and the design of systems that meet the needs of ordinary users.

*The EU in the 21st Century* David Ramiro Troitiño, Tanel Kerikmäe, Ricardo Martín de la Guardia, Guillermo Á. Pérez Sánchez, 2020-03-06 In the light of Brexit, the migration crisis, and growing scepticism regarding the European integration process, this book offers a comprehensive overview of the most pressing problems facing the European Union in the 21st century. Written by experts from various disciplines, the contributions cover a wide range of economic, legal, social and political challenges, including populism, migration, Brexit, and EU defence, foreign policy and enlargements. Each paper includes a historical account, insights into the problems and challenges confronting the EU, and an assessment of the institutions and policy instruments applied by the EU in response. Discussing each of the problems as part of a process – including the historical roots, current situation and potential solutions – the book allows readers to gain an understanding of the European Union as a living project.
