Epidemiology and Diagnosis of Acute Hepatitis C Virus Infection Joseph Wilhelm Vanhommerig, 2016 In several studies presented in this thesis, epidemiological and molecular approaches were combined to gain insight into possible linkage between HCV infections. This gives an extra dimension to the outcomes measured in our studies, as the phylogenetic profile of the HCV infections could be added to the analyses. Other studies included longitudinal data from observational cohorts, in which incident HCV (re)infection and possible predictors for HCV infection could be evaluated. Blood samples collected during multiple cross-sectional studies were used to evaluate the utility of an HCV antigen test for screening purposes. The studies in this thesis were initiated with the ultimate goal to increase our understanding of primary and recurrent acute HCV infection among two risk groups in the Netherlands: PWID and HIV-infected MSM. The results of these studies in particular may contribute to improved prevention programs, and may inform clinical decision making and testing policies (e.g., whom to test, and which test(s) should be used). In part I the current state of the HCV epidemic among MSM and PWID is illustrated. Part II focuses on sexual transmission of HCV among HIV-infected MSM. Part III describes the possible use of assays for screening and diagnosis of acute HCV (re) infection in various settings. Finally, chapter 10 discusses the main findings of this thesis, relates these to recent literature, and gives recommendations for future studies..

**In scene** Gorrry Cleven, 2003-08-06 In dit boek staan de ervaringsgerichte werkvormen vanuit drama, dans en beweging centraal. Deze werkvormen worden toegepast in diverse begeleidingssituaties, zoals vaktherapie, psychotherapie, training en supervisie, met als doel het bewust stilstaan bij de ervaring en de beleving, het bewust ervaren van mogelijkheden en het zich bewust worden van lichaamssignalen en verborgen gevoelens. In scène stelt de praktijk van de gezondheidszorg centraal en beschrijft - als handboek - op heldere wijze het proces van observeren, indiceren en beantwoorden van de hulpvraag. Vanuit de dramatherapeutische praktijk worden theoretische achtergronden uit de dramatherapie, de psychologie, de orthopedagogiek en de psychiatrie belicht. Het boek beschrijft de theorie vanuit de praktijk.

**Biocatalytic Membrane Reactors** Enrico Drioli, Lidietta Giorno, 2020-10-07 This research level reference book has been co-written by Enrico Drioli, perhaps one of the world's best known researchers into membrane technology. The application of membrane technology to chemical transformation and molecular separation are beginning to be exploited in the pharmaceutical science and biotechnology industries, but there is a need for researchers and students to have up-to-date literature - and this book provides it. The book will be of interest to students of chemistry, chemical engineering, pharmacy and biotechnology.

**Public Governance as Co-creation** Christopher Ansell, Jacob Torfing, 2021-06-10 We need new governance solutions to help us improve public policies and services, solve complex societal problems, strengthen social communities and reinvigorate democracy. By changing how government engages with citizens and stakeholders, co-creation provides an attractive and feasible approach to governance that goes beyond the triptych of public bureaucracy, private markets and self-organized communities. Inspired by the successful use of co-creation for product and service design, this book outlines a broad vision of co-creation as a strategy of public governance. Through the construction of platforms and arenas to facilitate co-creation, this strategy can empower local communities, enhance broad-based participation, mobilize societal resources and spur public innovation while building ownership for bold solutions to pressing problems and challenges. The book details how to use co-creation to achieve goals. This exciting and innovative study combines theoretical argument with illustrative empirical examples, visionary thinking and practical recommendations.

**Overcoming Barriers to Eliminate Hepatitis C, An Issue of Infectious Disease Clinics of North America, E-Book** Camilla S. Graham, Stacey B. Trooskin, 2018-05-23 The field of HCV has changed perhaps faster than any other field in medicine. The Guest Editors have strived to create an issue that is a state-of-the-art analysis of solutions to specific challenges faced in the United States and globally in implementing HCV elimination strategies. They believe that clinicians now have the tools and road maps needed to accomplish this goal. The clinical review articles in this issue accomplish that: Using Existing Health Care Infrastructure To Expand HCV Care; Creating A Reproducible Health Economic Model To Describe The Burden Of HCV And Cost Of Treatment In Any Country; The Best Uses Of Cost-Effectiveness Models In HCV; Increasing Access To HCV Care In Corrections; Cure As Prevention Strategies For HCV In People Who Inject Drugs; Australia Will Eliminate HCV – How It Works; New York Is The First State In The US To Develop An HCV Elimination Strategy; When HCV Diagnostics Are The Barrier To Care; Key Findings From The Checs HCV Cohort Study; Strategies To Reduce HCV Reinfection Rates In People Who Inject Drugs; Strategies To Reduce HCV Reinfection Rates In Men Who Have Sex With Other Men; The Value Of Curing HCV From A Payer's Perspective; How To Expand Care Capacity In HCV; Strategies To Eliminate HCV In The HIV Coinfected Population; and The US Veteran's Administration: Lessons Learned And Best Practices For HCV Elimination.

*Adipose Tissue Development* C. Levy-Marchal, L. Pénicaud, 2010-06-17 Nowadays, adipose tissue is not only regarded as an organ of storage related to fuel metabolism but also as an endocrine organ involved in the regulation of insulin sensitivity, lipids and energy metabolism. These proceedings cover the nervous regulation of both white and brown adipose tissue mass. Different physiological parameters such as metabolism (lipolysis and thermogenesis) and secretory activity (leptin and other adipokines) are reviewed. The plasticity of adipose tissue (proliferation, differentiation and apoptosis) showing the presence of a neural feedback loop between adipose tissue and the brain, which plays a major role in the regulation of energy homeostasis, is discussed. Merging basic knowledge and various clinical conditions, this thorough review is of great interest to both scientists and physicians, in particular pediatricians, interested in obesity, endocrinology and nutrition.

Enhancing Public Innovation by Transforming Public Governance Jacob Torfing, Peter Triantafyllou, 2016-08-04 Drawing on theoretical research and empirical studies, this book examines how public governance can be transformed in order to enhance innovation. It scrutinizes the need for public sector reforms and analyzes how the gradual transition towards New Public Governance can stimulate the exploration and exploitation of new ideas.

**Brook's Clinical Pediatric Endocrinology** Mehul T. Dattani, Charles G. D. Brook, 2019-09-04 Die 7. Auflage von Brook's Clinical Pediatric Endocrinology wurde von einem erfahrenen Herausgaberteam erarbeitet und enthält Beiträge international erfahrener Experten. Präsentiert werden die wissenschaftlichen Grundlagen und das klinische Management von Hormonstörungen bei Kindern und Jugendlichen. Dieses Fachbuch stellt die Behandlungsoptionen für eine Vielzahl von hormonellen Störungen vor, darunter Diabetes und Hypoglykämie, Wachstumsstörungen, Schilddrüsenerkrankungen, Pubertätsstörungen, sexuelle Differenzierung, Störung des Kalzium-

und Steroidstoffwechsels und Hypophyseninsuffizienz.

**Genes and Obesity**, 2010-12-17 A number of genes have been identified that are associated with an increased body mass index (BMI), the standard measurement of obesity. By analyzing these genes, researchers hope to gain a better understanding of what causes obesity and develop ways to tackle the problem. The study of genes and obesity could lead to new treatments. *Genes and Obesity* reviews the latest developments in the field. This series provides a forum for discussion of new discoveries, approaches, and ideas Contributions from leading scholars and industry experts Reference guide for researchers involved in molecular biology and related fields

**Brown Adipose Tissue** Alexander Pfeifer, Martin Klingenspor, Stephan Herzig, 2019-04-02 The main focus of this book is on brown adipose tissue and its metabolic function. The book provides a timely update on the latest research and shows where the field is heading. Brown adipose tissue (BAT) dissipates energy and has received considerable attention in the last few years, having been re-discovered in adult humans in 2007/9. Moreover, BAT might offer a target for novel therapies to address obesity, a health condition that has reached pandemic dimensions.

**Molecular and Cellular Regulation of Adaptation to Exercise** Claude Bouchard, 2015-11-16 *Molecular Aspects of Exercise Biology and Exercise Genomics*, the latest volume in the *Progress in Molecular Biology and Translational Science* series includes a comprehensive summary of the evidence accumulated thus far on the molecular and cellular regulation of the various adaptations taking place in response to exercise. Changes in the cellular machinery are described for multiple tissues and organs in terms of signaling pathways, gene expression, and protein abundance. Adaptations to acute exercise as well as exposure to regular exercise are also discussed and considered. Includes a comprehensive summary of the evidence accumulated thus far on the molecular and cellular regulation of the various adaptations taking place in response to exercise Contains contributions from leading authorities Informs and updates on all the latest developments in the field of exercise biology and exercise genomics

*Hepatitis C Virus: The Next Epidemic, An issue of Gastroenterology Clinics of North America*, K. Rajender Reddy, 2016-01-07 There are over 180 million people with chronic HCV infection worldwide with between 2.7 and 3.9 million in the United States. Hepatitis C most significantly affects Asia and Africa, with rates up to 15% in countries such as Egypt and up to 30% in certain regions such as Punjab, Pakistan. Hepatitis C places a significant burden on the public health infrastructure, as it remains the leading cause of chronic liver disease, accounting for 50-75% of primary liver cancers and is responsible for 30% of all liver transplantations. It is estimated to have cost the United States \$5.5 billion in 1997, comparable to the national cost of asthma, \$5.8 billion in 1994. This number is only expected to grow as the current HCV population ages, increasing overall rates of compensated cirrhosis/end-stage liver disease. The evolution of directly acting anti-virals has ushered in a new era for chronic hepatitis C. Ongoing drug development strategy has involved targeting several replication steps of the virus and the hope is to see all oral therapies by late 2014 or early 2015. Thus we are at an exciting cross roads with regard to new information and challenges with HCV: rising disease burden with associated high costs, the challenges globally and in multiple patient populations, and the impending availability of effective and well tolerated treatments. Therefore there is a need to commission an exclusive issue of GCNA for HCV.

**The Oxford Handbook of Public Accountability** Mark Bovens, Robert E. Goodin, Thomas Schillemans, 2014-05-15 Over the past two decades public accountability has become not only an icon in political, managerial, and administrative discourse but also the object

of much scholarly analysis across a broad range of social and administrative sciences. This handbook provides a state of the art overview of recent scholarship on public accountability. It collects, consolidates, and integrates an upsurge of inquiry currently scattered across many disciplines and subdisciplines. It provides a one-stop-shop on the subject, not only for academics who study accountability, but also for practitioners who are designing, adjusting, or struggling with mechanisms for accountable governance. Drawing on the best scholars in the field from around the world, The Oxford Handbook of Public Accountability showcases conceptual and normative as well as the empirical approaches in public accountability studies. In addition to giving an overview of scholarly research in a variety of disciplines, it takes stock of a wide range of accountability mechanisms and practices across the public, private and non-profit sectors, making this volume a must-have for both practitioners and scholars, both established and new to the field.

*Yearbook of Pediatric Endocrinology 2009* J. -C. Carel,Z. Hochberg,2009-08-26 The body of knowledge in most medical specialties is rapidly expanding, making it virtually impossible to follow all advances in clinical and basic sciences that are relevant to a given field. This is particularly true in pediatric endocrinology, at the cross-road of pediatrics, endocrinology, development and genetics. Providing abstracts of articles that report the year's breakthrough developments in the basic sciences and evidence-based new knowledge in clinical research and clinical practice that are relevant to the field, the 'Yearbook of Pediatric Endocrinology 2009' keeps busy clinicians and scientists, pediatric endocrinologists, and also pediatricians and endocrinologists informed on new advances.Twelve Associate Editors and their co-authors selected from several thousand papers those that brought the most meaningful new information, summarized them and provided comments to put them into perspective. The papers are classified into those that identify new genes involved in diseases, new hormones, concepts revised or re-centered, important observations for clinical practice, large-scale clinical trials, new mechanisms, new paradigms, important review articles, new fears and new hopes. Because the Yearbook is endorsed by the European Society for Paediatric Endocrinology (ESPE), its publication is linked to the annual meeting of the ESPE. The 'Yearbook of Pediatric Endocrinology 2009' covers the medical and scientific literature from June 2008 through May 2009.

Williams Textbook of Endocrinology E-Book Shlomo Melmed,Ronald Koenig,Clifford J. Rosen,Richard J. Auchus,Allison B. Goldfine,2019-11-14 Expertly bridging the gap between basic science and clinical information, Williams Textbook of Endocrinology, 14th Edition, brings together an outstanding collection of world-renowned authors to provide authoritative discussions of the full spectrum of adult and pediatric endocrine system disorders. New chapters and significant revisions throughout keep you up to date with recent advances in medications, therapies, clinical trials, and more. This essential reference is a must-have resource for endocrinologists, endocrine surgeons, gynecologists, internists, pediatricians, and other clinicians who need current, comprehensive coverage of this multifaceted field. Up to date with recent advances in medications, therapies, and clinical trials. Provides state-of-the-art coverage of diabetes, metabolic syndrome, metabolic bone disorders, obesity, thyroid disease, testicular disorders, newly defined adrenal disorders and much more - all designed to help you provide optimal care to every patient. Contains new chapters on Global Burden of Endocrine Disease, Navigation of Endocrine Guidelines, and Transgender Endocrinology. Includes significant updates to the Diabetes section, including a new chapter on Physiology of Insulin Secretion and greater coverage of Type 2 Diabetes. Presents current information in a highly illustrated, user-friendly format for quick reference.

*MicroRNA in Regenerative Medicine* Chandan K. Sen,2014-11-26 This work encapsulates the uses of miRNA across stem cells, developmental biology, tissue injury and tissue regeneration. In particular contributors provide focused coverage of methodologies,

intervention and tissue engineering. Regulating virtually all biological processes, the genome's 1048 encoded microRNAs appear to hold considerable promise for the potential repair and regeneration of tissues and organs in future therapies. In this work, 50 experts address key topics of this fast-emerging field. Concisely summarizing and evaluating key findings emerging from fundamental research into translational application, they point to the current and future significance of clinical research in the miRNA area. Coverage encompasses all major aspects of fundamental stem cell and developmental biology, including the uses of miRNA across repair and regeneration, and special coverage of methodologies and interventions as they point towards organ and tissue engineering Multi-colour text layout with 150 colour figures to illustrate important findings Take home messages encapsulate key lessons throughout text Short chapters offer focused discussion and clear 'voice'
