*Managing the University Campus* Alexandra Cornelia den Heijer, 2011 This book summarizes the results of ten years of research on a wide range of topics on campus management: from generating references for planning purposes - like current replacement costs and new space standards for the changing academic workplace - to strategies for the sustainable campus and new models that merge the campus and the knowledge city. The book includes profiles of fourteen campuses and forty campus projects to illustrate trends. The content of this book combines insights from theory - adding to new real estate management theories and the required management information for real estate decisions - and lessons for practice. The book can support the decisions of the policy makers, architects, campus and facility managers about the campus of the future.

**European Metropolitan Commercial Real Estate Markets** Ed F. Nozeman, Arno J. Van der Vlist, 2014-07-16 Metropolitan commercial real estate markets are highly influenced by global forces, the regional economy, and institutional behaviour. While descriptions of regional commercial real estate markets are well known and widespread in academic literature, this monograph goes beyond that in explaining the dynamics in and variations between European metropolitan markets. By comparing those markets on relevant indicators and through extensive data analysis, a number of explaining factors is revealed. Contributions on specific metropolitan markets with different positions within the real estate cycle illustrate not only the characteristics of the local economy and its institutions, but also urgent issues such as battling vacancy, changing retail hierarchy or managing obsolescence. □

*Management of Urban Development Processes* Agnes Franzen, 2011 In Europe, urban area development has witnessed an increased role and influence of the private sector, and is no longer dominated by the public sector. This book discusses the changes and describes different approaches for governance, design and feasibility. The shift to a global economy and new relations between public and private has brought the need for a more integral approach of current practices. The book is written for students and practitioners who want to familiarize themselves with the current practice of urban area development. It draws on many years of research and experience from the Real Estate and Housing Department of the Technical University of Delft, and from well-known practitioners in the field, all consolidated and re-written in this book.

*The City at Eye Level* Meredith Glaser, 2012 Although rarely explored in academic literature, most inhabitants and visitors interact with an urban landscape on a day-to-day basis is on the street level. Storefronts, first floor apartments, and sidewalks are the most immediate and common experience of a city. These “plinths” are the ground floors that negotiate between inside and outside, the public and private spheres. The City at Eye Level qualitatively evaluates plinths by exploring specific examples from all over the world. Over twenty-five experts investigate the design, land use, and road and foot traffic in rigorously researched essays, case studies, and interviews. These pieces are supplemented by over two hundred beautiful color images and engage not only with issues in design, but also the concerns of urban communities. The editors have put together a comprehensive guide for anyone concerned with improving or building plinths, including planners, building owners, property and shop managers, designers, and architects.

**Red Love** Maxim Leo, 2013-09-12 Winner of the European Book Prize The East isn't far away at all. It clings to me, it goes with me everywhere. It's like a big family that you can't shake off ... Tender, acute and utterly absorbing Anna Funder, author of *Stasiland* A wry and unheroic witness... an unofficial history of a country that no longer exists Julian Barnes Growing up in East Berlin, Maxim Leo knew not to ask questions. All he knew was that his rebellious parents, Wolf and Anne, with their dyed hair, leather jackets and insistence he call them by their first names, were a bit embarrassing. That there were some places you couldn't play; certain things you didn't say. Now, married with two children and the Wall a distant memory, Maxim decides to find the answers to the questions he couldn't ask. Why did his parents, once passionately in love, grow apart? Why did his father become so angry, and his mother quit her career in journalism? And why did his grandfather Gerhard, the Socialist war hero, turn into a stranger? The story he unearths is, like his country's past, one of hopes, lies, cruelties, betrayals but also love. In *Red Love* he captures, with warmth and unflinching honesty, why so many dreamed the GDR would be a new world and why, in the end, it fell apart. Tender, acute and utterly absorbing. In fine portraits of his family members Leo takes us through three generations of his family, showing how they adopt, reject and survive the fierce, uplifting and ultimately catastrophic ideologies of 20th-century Europe. We are taken on an intimate journey from the exhilaration and extreme courage of the French Resistance to the uncomfortable moral accommodations of passive resistance in the GDR. He describes these 'ordinary lies' and contradictions, and the way human beings have to negotiate their way through them, with great clarity, humour and truthfulness, for which the jury of the European Book Prize is delighted to honour *Red Love* . His personal memoir serves as an unofficial history of a country that no longer exists... He is a wry and unheroic witness to the distorting impact - sometimes frightening, sometimes merely absurd - that ideology has upon the daily life of the individual: citizens only allowed to dance in couples, journalists unable to mention car tyres or washing machines for reasons of state. Julian Barnes, European Book Prize With wonderful insight Leo shows how the human need to believe and to belong to a cause greater than ourselves can inspire a person to acts of heroism, but can then ossify into loyalty to a cause that long ago betrayed its people. Anna Funder, author of *Stasiland* Heartbreaking... This very personal account allows us to better understand the reality of a kafkaesque regime, and the blindness of its elite that allowed it to survive for so long. La Tribune The great charm of this book, about the gradual disintegration of the GDR, lies in the level-headed but loving attitude with which it investigates the interweaving of the private and political [in Communist East Germany], revisiting a child's-eye view of the era. Frankfurter Allgemeine Zeitung A crucial book ... poignant ... a tragedy reminiscent of the great narrative poets, Dostoevsky or Koestler. Maxim Leo has earned his place alongside them. Sud Ouest A lyrical story about a family in a divided city Hamburger Abendblatt Maxim Leo was born in 1970 in East Berlin. He studied Political Science at the Free University in Berlin and at the Institut d'Etudes Politiques de Paris. Since 1997 he is Editor of the Berliner Zeitung . In 2002 he was nominated for the Egon-Erwin-Kisch Prize, and in the same year won the German-French Journalism Prize. He won the Theodor Wolff Prize in 2006. He lives in Berlin.

**The Hackable City** Michiel de Lange, Martijn de Waal, 2018-12-05 This open access book presents a selection of the best contributions to the Digital Cities 9 Workshop held in Limerick in 2015, combining a number of the latest academic insights into new collaborative modes of city making that are firmly rooted in empirical findings

about the actual practices of citizens, designers and policy makers. It explores the affordances of new media technologies for empowering citizens in the process of city making, relating examples of bottom-up or participatory practices to reflections about the changing roles of professional practitioners in the processes, as well as issues of governance and institutional policymaking.

**Contemporary Perspectives on Jane Jacobs** Dirk Schubert,2016-05-13 Jane Jacobs's famous book *The Death and Life of Great American Cities* (1961) has challenged the discipline of urban planning and led to a paradigm shift. Controversial in the 1960s, most of her ideas became generally accepted within a decade or so after publication, not only in North America but worldwide, as the articles in this volume demonstrate. Based on cross-disciplinary and transnational approaches, this book offers new insights into her complex and often contrarian way of thinking as well as analyses of her impact on urban planning theory and the consequences for planning practice. Now, more than 50 years after the initial publication, in a period of rapid globalisation and deregulated approaches in planning, new challenges arise. The contributions in this book argue that it is not possible simply to follow Jane Jacobs's ideas to the letter, but instead it is necessary to contextualize them, to look for relevant lessons for cities and planners, and critically to re-evaluate why and how some of her ideas might be updated. Bringing together an international team of scholars and writers, this volume develops conclusions based on new research as to how her work can be re-interpreted under different circumstances and utilized in the current debate about the proclaimed 'millennium of the city', the 21st century.

**Transformatie van kantoorgebouwen** D. J. M. van der Voordt,2007 Op initiatief van de Technische Universiteit Delft, afdeling Real Estate & Housing van de Faculteit Bouwkunde, geven experts hun mening over de architectonische, stedenbouwkundige, functionele, emotionele, financiële, technische en juridische aspecten rond transformatieprojecten van kantoorgebouwen in Nederland.

*Building Cycles* Richard Barras,2009-08-13 The global economic crisis of 2008 was precipitated by a housing market crash, thus highlighting the destabilizing influence of the property cycle upon the wider economy. This timely book by a world authority explores why cycles occur and how they affect the behaviour of real estate markets. The central argument put forward is that growth and instability are inextricably linked, and that building investment acts both as a key driver of growth and as the source of the most volatile cyclical fluctuations in an economy. The role of building cycles in both economic growth and urban development is explored through a theoretical review and a comparative historical analysis of UK and US national data stretching back to the start of the nineteenth century, together with a case study of the development of London since the start of the eighteenth century. A simulation model of the building cycle is presented and tested using data for the City of London office market. The analysis is then broadened to examine the operation of property cycles in global investment markets during the post-war period, focussing on their contribution to the diffusion of innovation, the accumulation of wealth and the propagation of market instability. *Building Cycles: growth & instability* concludes by synthesizing the main themes into a theoretical framework, which can guide our understanding of the operation and impact of building cycles on the modern economy. Postgraduate students on courses in property and in urban development as well as professional property researchers, urban economists and planners will find this a stimulating read – demanding but accessible.

**Essays in Honor of James A. Graaskamp: Ten Years After** James R. DeLisle,Elaine Worzala,2012-12-06 As the title indicates, *Essays in Honor of James A. Graaskamp: Ten Years After*, is a collection of essays written to honor Graaskamp's major contributions to the field of real estate education and practice over the course of three decades. Upon his death in 1988, the industry lost a major influence for advancing the real estate discipline, both as an academic field and a professional field. The authors in this volume seek to extend Graaskamp's contributions and move the real estate discipline forward. The papers address the challenges posed by the market to return our attention to real estate fundamentals, and to strike a proper balance between Main Street and Wall Street. The authors and editors hope that this book will influence the industry to incorporate many of Graaskamp's ideas into mainstream real estate education and practice. Over the course of his career, Graaskamp made many noteworthy contributions to real estate theory and practice, ideas that if resurrected could offset some of the pressure in the industry to move away from market fundamentals. The authors try to capture the essence of Graaskamp's messages, and intend that the papers serve as a point of departure for discussing the future role and nature of real estate education. Part I focuses on the major contributions to the real estate discipline made by Graaskamp and the Wisconsin Real Estate Program. Part II contains some personal recollections and photos of Graaskamp, and also a summary of the groups that make up the Wisconsin Real Estate Program, a major co-sponsor of this volume. The rest of the book's three main parts are structured around major topics that reflect the multidisciplinary nature of real estate as espoused by Graaskamp. Part III treats real estate feasibility and development, Part IV concentrates on real estate valuation, and Part V discusses institutional economics.

**De economie van de woningmarkt** Erik Buyst ,Frank Vastmans ,Roel Helgers,Sven Damen ,Geert Goeyvaerts,2016-05-30 Dit boek is het resultaat van 10 jaar Vlaams woningmarktonderzoek en de toepassingen ervan in de praktijk. Het geeft een overzicht van de recente internationale wetenschappelijke literatuur en de toepassing hiervan op Vlaanderen. Die combinatie zorgt ervoor dat zowel de invloed van lokale kenmerken als de algemene macro- economische en internationale tendensen aan bod komen. We zoomen in op diverse deelmarkten: de koop-, huur-, nieuwbouw- en hypotheekmarkt. De onderlinge verwevenheid tussen deze markten heeft implicaties voor de woonfiscaliteit en de samenhang tussen regionale markten. Bovendien is de waarde van iedere woning uniek en bepaald door een aantal liggings-, grootte- en

kwaliteitskenmerken, wat in hedonische prijzenmodellen geanalyseerd wordt. Voor beleidsmedewerkers, vastgoedmakelaars en -ontwikkelaars, maar ook voor beleggers, onderzoekers, studenten en iedereen met een interesse voor vastgoed, biedt dit boek toepasselijke inzichten: Vastgoed vormt een alsmaar groeiend deel van het vermogen van huishoudens. Hoe is dit te verklaren? Wat is de rol van de interestvoet? Zijn langetermijnvooruitzichten mogelijk? Welke rol spelen demografische evoluties in dit verhaal? Welke beleidsmaatregelen zorgen voor een ‘gezonde’ woningmarkt? Loont het om te shoppen bij banken voor een lagere hypotheekrente?

**Money Laundering in the Real Estate Sector** Brigitte Unger,Joras Ferwerda,2011 In many countries, the real estate sector is vulnerable to money laundering due to a high number of factors including; the high value of assets, price fluctuations and speculation within the market, difficulties in assessing the true value of a house, and the fact that the legal owner is not necessarily the economic owner. In this book, the authors identify a total of 25 characteristics which render a property susceptible to money laundering. The more such characteristics a property exhibits, the more suspicious it becomes. The authors also discover that some of these characteristics weigh heavier than others. Combining economic, econometric and criminological analysis, this multidisciplinary approach shows how to detect criminal investment in the real estate sector. This well-researched book will appeal to government authorities responsible for combating money laundering, international organizations such as the IMF, the UN, the Worldbank and the EU, as well as financial intelligence units in all countries. Real estate associations, real estate research centers, criminologists and economists will also find this book invaluable.

Syrian Episodes John Borneman,2007-02-26 When Princeton anthropologist John Borneman arrived in Syria's second-largest city in 2004 as a visiting Fulbright professor, he took up residence in what many consider a rogue state on the frontline of a clash of civilizations between the Orient and the West. Hoping to understand intimate interactions of religious, political, and familial authority in this secular republic, Borneman spent much time among different men, observing and becoming part of their everyday lives. Syrian Episodes is the striking result. Recounting his experience of living and lecturing in Aleppo, Syria's second-largest city, John Borneman offers deft, first-person stories of the longings and discontents expressed by Syrian sons and fathers, as well as a prescient analysis of the precarious power held by the regime, its relation to domestic authority, and the conditions of its demise. Combining literary imagination and anthropological insight, the book's discrete narratives converge in an unforgettable portrait of contemporary culture in Aleppo. We read of romantic seductions, rumors of spying, the play of light in rooms, the bargaining of tourists in bazaars, and an attack of wild dogs. With unflinching honesty and frequent humor, Borneman describes his encounters with students and teachers, customers and merchants, and women and families, many of whom are as intrigued with the anthropologist as he is with them. Refusing to patronize those he meets or to minimize his differences with them, Borneman provokes his interlocutors, teasing out unexpected confidences, comic responses, and mutual misunderstandings. He engages the curiosity and desire of encounter and the possibility of ethical conduct that is willing to expose cultural differences. Combining literary imagination and anthropological insight, Syrian Episodes offers an unforgettable portrait of contemporary culture in Aleppo.
