Estimating the Base of the Value-Added Tax (VAT) in Developing Countries Mr. George A. Mackenzie, 1991-02-01 Developing countries with VATs typically exempt a large number of goods and services. Following a brief discussion of the rationale for exemptions, this paper presents a formula for the base of a VAT with exemptions. Two basic adjustments must be made to the base without exemptions: subtraction of the value of sales to consumers of exempt industries and addition of intermediate sales of taxable inputs to exempt industries. The paper concludes with a derivation of the elasticity of a VAT with exemptions with respect to aggregate consumption and a discussion of the implications of technological change for the VAT base.

The Multilingual Lexicon Jasone Cenoz, Britta Hufeisen, U. Jessner, 2007-05-28 This book is unique because it explores the multilingual lexicon by providing insights from research studies conducted in psycholinguistics, applied linguistics and neurolinguistics. It goes beyond the use of two languages and thus concentrates on a new and developing area in linguistic research. The different perspectives provide a link to the mainstream work on the lexicon and vocabulary acquisition and will stimulate further debate in these areas and in the study of multilingualism.

Place-Name Politics in Multilingual Areas Peter Jordan, Přemysl Mácha, Marika Balode, Luděk Krtička, Uršula Obrusník, Pavel Pilch, Alexis Sancho Reinoso, 2021-07-31 This book explores the role of place names in the formation and maintenance of individual and group identities in multilingual and multi-ethnic situations. Using examples from Austria and Czechia as case studies, the authors examine the power of place names through an interdisciplinary and multi-methods approach that draws from the fields of anthropology, geography, sociolinguistics and toponomastics. The book contextualises both places within their social and political histories, and probes recent debates in the social sciences relating to place names, identity and power. It will be of interest to scholars and students focusing on place names and naming practices, minority communities and languages, and linguistic landscapes.

Multilingual Hong Kong: Languages, Literacies and Identities David C.S. Li, 2017-01-12 This volume gives an up-to-date account of the language situation and social context in multilingual Hong Kong. After an in-depth, interpretive analysis of various language contact phenomena, it shows why it is such a tall order for Hongkongers to live up to the Special Administrative Region government's language policy goalpost, 'bilingualism and trilingualism'. A detailed contrastive analysis between Cantonese and (a) English, (b) Modern Written Chinese, and (c) Putonghua helps explain the nature of the linguistic and acquisitional challenges involved. Economic forces and sociopolitical realities helped shape the 'mother tongue education' or 'dual MoI streaming' policy since September 1998. The book provides a critical review of the significant milestones and key policy documents from the early 1990s, and outlines the concerns of stakeholders at the receiving end. Another MoI debate concerns the feasibility and desirability of teaching Chinese in Putonghua (TCP). Based on a critical review of the TCP literature and recent psycholinguistic and neuroscience research, the language-in-education policy implications are discussed, followed by a few recommendations. Hongkongers of South Asian descent saw their life chances curtailed as a result of the post-1997 changes in the language requirements for gaining access to civil service positions and higher education. Based on a study of 15 South Asian undergraduate students' prior language learning experiences, recommendations are made to help redress that social inequity problem.

Dominant Language Constellations Joseph Lo Bianco, Larissa Aronin, 2020-09-07 This volume is dedicated to the concept and several applications of Dominant Language Constellations (DLC), by which it advances understanding of current multilingualism through addition of a novel perspective from which to view contemporary language use and acquisition. The term Dominant Language Constellation denotes the set of a person's or group's most expedient languages, functioning as an entire unit and enabling an individual or group to meet their needs in a multilingual environment. The volume presents pioneering contributions that employ DLC as the lens for analysing a wide array of issues. These include multilingual syntactic development, cross-linguistic interaction and multilingual production in formal and informal educational contexts, as well as linguistic profiles of multilingual groups used in elementary school and higher education. Other DLC issues include discussions of how identity, emotions and attitudes operate in various minority and majority contexts. Because the DLC concept does not assume any inherent hierarchy of languages it can serve as a framework public policy in multilingual countries/communities faced with challenging policy determinations regarding choice of languages for use in education settings and more widely in social institutions and the economy. Some chapters develop and extend the DLC concept, others adapt and apply it to a variety of contexts, both global and local. Many chapters feature educational and social settings across large parts of the world— Africa, Australia, Europe, North America (Canada and the USA) and Southeast Asia. The volume can serve as supplementary reading for courses on multilingualism, sociolinguistics, language policy and planning, educational linguistics, Second and Third Language Acquisition.

Cross-linguistic Influences in Multilingual Language Acquisition Danuta Gabrys-Barker, 2012-05-22 This volume depicts the phenomenon of cross-linguistic influences in the specific context of multilingual language acquisition. It consists of articles on various issues relating to the syntactic and lexical development of foreign language learners from different L1 backgrounds, in many cases involving languages which are typologically distant from English, such as Russian, Croatian, Greek and Portuguese. Individual chapters highlight different areas expected to be especially transfer-prone at the level of grammatical and lexical transfer in particular contexts of language contact.

Comdex Tally 9 Course Kit (With Cd) Namrata Agrawal, 2007-11 This book aims to upgrade the accounting skills of professionals through the latest computer software Tally 9. They can begin from the very basics of manual accounting and then easily go on to learn computerized accounting.

Emotions in Multiple Languages J. Dewaele, 2010-08-11 A large-scale investigation on how multilinguals feel about their languages and use them to communicate emotion. Combining quantitative and qualitative approaches, the author looks at the factors that affect multilinguals' self-perceived competence, attitudes, communicative anxiety, language choice and code-switching.

Multi-source, Multilingual Information Extraction and Summarization Thierry Poibeau, Horacio Saggion, Jakub Piskorski, Roman Yangarber, 2012-08-14 Information extraction (IE) and text summarization (TS) are powerful technologies for finding relevant pieces of information in text and presenting them to the user in condensed form. The ongoing information explosion makes IE and TS critical for successful functioning within the information society. These technologies face particular challenges due to the inherent multi-source nature of the information explosion. The technologies must now handle not isolated texts or individual narratives, but rather large-scale repositories and streams—in general, in multiple languages—containing a multiplicity of perspectives, opinions, or commentaries on particular topics, entities or events. There is thus a need to adapt existing techniques and develop new ones to deal with these challenges. This volume contains a selection of papers that present a variety of methodologies for content identification and extraction, as well as for content fusion and regeneration. The chapters cover various aspects of the challenges, depending on the nature of the information sought—names vs. events,— and the nature of the sources—news streams vs. image captions vs. scientific research papers, etc. This volume aims to offer a broad and representative sample of studies from this very active research field.

Mathematics Education and Language Diversity Richard Barwell, Philip Clarkson, Anjum Halai, Mercy Kazima, Judit Moschkovich, Nélia Planas, Mamokgethi Setati-Phakeng, Paola Valero, Martha Villavicencio Ubillús, 2015-11-25 *THIS BOOK WILL SOON BECOME AVAILABLE AS OPEN ACCESS BOOK* This book examines multiple facets of language diversity and mathematics education. It features renowned authors from around the world and explores the learning and teaching of mathematics in contexts that include multilingual classrooms, indigenous education, teacher education, blind and deaf learners, new media and tertiary education. Each chapter draws on research from two or more countries to illustrate important research findings, theoretical developments and practical strategies. This open access book examines multiple facets of language diversity

Taxation, Virtual Currency and Blockchain Aleksandra Bal, 2018-11-29 The emergence of convertible decentralized virtual currency schemes confronts tax authorities with unprecedented questions, among them are the status of virtual currency for tax purposes, which virtual transactions may benefit from a VAT exemption and determining the most optimal method of tax regulation. This first book-length treatment of this major current topic provides an in-depth and comprehensive analysis of the tax implications of virtual currency transactions. Seeking to ascertain whether virtual

currency requires additional regulation or whether the law as it stands is adequate to administer its usage, the analysis not only thoroughly explains the nature of the underlying blockchain technology and its regulatory and judicial treatment so far but also identifies best practices for virtual currency transactions and makes recommendations for the improvement of the existing tax systems. Among the aspects of the phenomenon covered are the following: - particular aspects of virtual currency use such as smart contracts and initial coin offerings; - comparative review of income tax consequences of virtual currency transactions in Germany, the Netherlands, the United Kingdom and the United States; - VAT/sales tax treatment of transactions involving virtual currency in the European Union and the United States; - methodology for creating an effective regulatory framework for the taxation of virtual currency; and - the future of blockchain. The book has three parts and an annex that describes tax regulations, administrative rulings and court decisions concerning virtual currency in twenty countries. In its in-depth analysis of tax implications of virtual currency transactions in major economies, detailed overview of recent tax developments that affect virtual currency transactions and evaluation of tax policies related to virtual currencies, this book has no peers. Especially in view of the OECD's examination of the tax challenges presented by the digital economy as part of its base erosion and profit shifting (BEPS) project, this clear and comprehensive explanation of the functioning of virtual currency and blockchain technology will be welcomed by tax administration officials and by persons mining and transacting in virtual currencies needing to know their compliance obligations.

Studying Second Language Acquisition from a Qualitative Perspective Danuta Gabryś-Barker,Adam Wojtaszek,2014-09-18 This book presents a selection of empirical papers dealing with second and multiple language acquisition, in which qualitative research methodology is employed. Each of the studies reported in individual chapters is based on a solid theoretical background and an overview of studies in a given area. Although the main focus is on qualitative methods, some of the papers demonstrate the complementarity of quantitative and qualitative approaches in studying language acquisition.

Essential Topics in Applied Linguistics and Multilingualism Mirosław Pawlak,Larissa Aronin,2013-09-18 This book brings together papers dealing with essential issues in applied linguistics and multilingualism that have been contributed by leading figures in these two fields and present state-of-the-art developments in theory and research. The first part includes articles touching on various aspects of multiple-language acquisition, with a particular emphasis on the role of affordances, the interfaces between language and thought, and factors influencing the process of language learning. Part Two deals with individual variations in the acquisition of additional languages, focusing in particular on the impact of such variables as age, aptitude, motivation and learning deficits. Finally, Part Three presents contributions illuminating key issues in the acquisition of different subsystems and skills, such as grammar, phonology, lexis and writing systems. Thanks to the diversity of perspectives on applied linguistics and multilingualism, as well as the cutting-edge nature of some of the proposals, this edited collection will be an important reference work and a source of inspiration for theorists and researchers.

Naming Game Guanrong Chen,Yang Lou,2018-12-05 This book provides a gradual introduction to the naming game, starting from the minimal naming game, where the agents have infinite memories (Chapter 2), before moving on to various new and advanced settings: the naming game with agents possessing finite-sized memories (Chapter 3); the naming game with group discussions (Chapter 4); the naming game with learning errors in communications (Chapter 5) ; the naming game on multi-community networks (Chapter 6) ; the naming game with multiple words or sentences (Chapter 7) ; and the naming game with multiple languages (Chapter 8). Presenting the authors’ own research findings and developments, the book provides a solid foundation for future advances. This self-study resource is intended for researchers, practitioners, graduate and undergraduate students in the fields of computer science, network science, linguistics, data engineering, statistical physics, social science and applied mathematics.

Laudato Si Pope Francis,2015-07-18 “In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively to our earth, and his love constantly impels us to find new ways forward. Praise be to him!” – Pope Francis, *Laudato Si’* In his second encyclical, *Laudato Si’*: On the Care of Our Common Home, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. We as human beings are united by the concern for our planet, and every living thing that dwells on it, especially the poorest and most vulnerable. Pope Francis’ letter joins the body of the Church’s social and moral teaching, draws on the best scientific research, providing the foundation for “the ethical and spiritual itinerary that follows.” *Laudato Si’* outlines: The current state of our “common home” The Gospel message as seen through creation The human causes of the ecological crisis Ecology and the common good Pope Francis’ call to action for each of us Our Sunday Visitor has included discussion questions, making it perfect for individual or group study, leading all Catholics and Christians into a deeper understanding of the importance of this teaching.

Red Gas P. Högselius,2012-12-28 This book applies a systems and risk perspective on international energy relations, author Per Högselius investigates how and why governments, businesses, engineers and other actors sought to promote – and oppose– the establishment of an extensive East-West natural gas regime that seemed to overthrow the fundamental logic of the Cold War.
