Preparation of Catalysts VI G. Poncelet,J. Martens,B. Delmon,P. Grange,P.A. Jacobs,1995-03-24 The organizers of this Sixth Symposium maintained their initial objectives, namely to gather experts from both industries and universities to discuss the scientific problems involved in the preparation of heterogeneous catalysts, and to encourage as much as possible the presentation of research work on catalysts of real industrial significance. Another highlight of these symposia is to reserve a substantial part of the program to new developments in catalyst preparation, new preparation methods and new catalytic systems. The fact that chemical reactions which were hardly conceivable some years ago have become possible today through the development of appropriate catalytic systems proves that catalysis is in constant progress. The papers in this volume deal with preparation of new catalysts and supports, catalyst preparation via sol-gel methods, supported catalysts and synthesis of nanometer size catalysts.

*Racism and Human Ecology* Katharina Loeber,2019-01-21 The apartheid era in South Africa lasted more than 40 years. It was marked by political repression and the attempt to create a homogeneous white South Africa, which meant excluding the non-white majority population. The establishment and maintenance of white supremacy in South Africa by colonialism and, since 1948, grand apartheid was not only the result of racist regulations and laws, but also followed a scientific logic to justify the resettlement and expulsion of South African blacks.The history of South Africa from 1948 to 1994 can also be seen as the history of a major society-spanning project; an attempt to build a modern state on the basis of racial segregation. This work investigates the factors that make it possible to stabilize a policy based on virtually impossible prerequisites over four decades: Ethnic categorization, territorial planning and environmental protection measures.
