Les signaux faibles et la veille anticipative pour les décideurs Humbert

Lesca, Nicolas Lesca, 2011-05-18 Après avoir étudié le concept paradoxal de signal faible et analysé des exemples concrets, l'ouvrage propose une méthodologie et des outils (création collective de sens, méthode Puzzle, Codexi, processus Vasic, etc.) permettant de rechercher, de reconnaître et d'interpréter ces signaux d'alerte précoces. (extrait de la 4e de couv.)

Continuing Professional Development: Pathways to Leadership in the Library and Information World Ann Ritchie,Clare Walker,2008-11-03 These papers focus on the topic of leadership in the library and information professions, providing an overview of institutes, programs and activities occurring around the world. Some are described in detail, outlining learning objectives, structure, recruitment and evaluation strategies; others summarise national and international initiatives. They will provide valuable insights to anyone interested in workforce planning strategies aimed at addressing current shortages of library leaders, as well as those who may have experienced difficulties recruiting to leadership positions and now want to explore the best ways of developing and equipping their own staff with skills to enable them to become the leaders of the future.

Rapport d'information sur les nuisances aéroportuaires. Jacques Alain

Bénisti,Christophe Bouillon,commission du développement durable,2016-03-16 Force est de constater que depuis plusieurs années les nuisances aéroportuaires ne cessent de se développer dans notre pays.Des centaines de milliers de personnes vivent au quotidien, jour et nuit, des nuisances aéroportuaires de toute nature. Celles-ci impactent leur santé et leur cadre de vie. Face à ces enjeux, la commission du développement durable et de l'aménagement du territoire a pris l'initiative de lancer une mission d'information sur les nuisances aériennes, dont nous sommes les rapporteurs. Son objectif est de formuler des propositions réalistes qui tendront à mieux concilier les intérêts environnementaux avec

les enjeux économiques. Malgré les efforts incontestables des différents acteurs aéronautiques ces dernières années, ces nuisances ne demeurent pas leur priorité absolue, que ce soit les constructeurs d'avions ou de moteurs, la DGAC ou même les gouvernements successifs qui, malheureusement, n'y ont prêté que peu d'importance. Concernant les premiers, la diminution des consommations de kérosène passe largement avant la réduction du bruit ou les émanations de particules. Les principaux constructeurs réalisent avant tout des aéronefs en fonction des priorités du cahier des charges qui leur sont imposées par leurs clients. Même si, désormais, certaines compagnies, notamment européennes ou asiatiques, ont, depuis très peu de temps, inscrit en seconde position des critères de choix, la diminution des nuisances environnementales. Airbus et Boeing, en raison d'une concurrence soutenue et de leurs contraintes commerciales, n'inscrivent dans leurs premières exigences que l'économie énergétique et les performances des avions. Quant à la DGAC, pour laquelle les nuisances ne sont pas non plus LA priorité, elle se concentre sur ses missions de prédilection, le bon fonctionnement de la circulation aérienne, la sûreté et la sécurité du trafic. Sous couvert de ces deux derniers points, elle change, modifie et quelquefois intervertit les configurations de survol et d'approche des aéronefs sans se soucier un seul instant de la densification des zones impactées et des conséquences de nuisances pour les populations survolées ou nouvellement survolées. Sous l'apparence d'enquêtes publiques réalisées (ou non) dans la plus grande opacité, la DGAC fait fi de tous les textes de loi régissant les règles urbanistiques et environnementales en vigueur. L'ACNUSA, organisme spécifiquement créé pour lutter contre ces nuisances, n'apporte que peu de remèdes, si ce n'est quelques amendes pour

non-respect du couvre-feu ou des trajectoires d'approche. Ce rapport retrace ces différentes problématiques, mais surtout le manque de prise de conscience et l'absence de vision à long terme de nos gouvernants durant ces dernières décennies. Et pourtant ce ne sont pas les solutions qui manquent et les rapporteurs Jacques Alain Bénisti et Christophe Bouillon en exposent un certain nombre, toutes différentes, mais réduisant pour certaines considérablement les nuisances pour les populations survolées.
