Nikolay Kuposov, Nikolai Evgen'evich Kuposov

Creating the Empress Vera Proskurina, 2018-05-30 In *Creating the Empress, Vera Proskurina* examines the interaction between power and poetry in creating the imperial image of Catherine the Great, providing a detailed analysis of a wide range of Russian literary works from this period, particularly the main Classical myths associated with Catherine (Amazon, Astraea, Pallas Athena, Felicitas, Fortune, etc.), as well as how these Classical subjects affirmed imperial ideology and the monarch's power. Each chapter of the book revolves around the major events of Catherine's reign (and some major literary works) that give a broad framework to discuss the evolution of important recurring motifs and images.

Globalisation and Historiography of National Leaders Joseph Zajda, Tatyana Tsyrlina-Spady, Michael Lovorn, 2016-12-23 *Globalisation and Historiography of National Leaders: Symbolic Representations in School Textbooks*, the 18th book in the 24-volume book series *Globalisation, Comparative Education and Policy Research*, explores the interrelationship between ideology, national identity, national history and historical heroes, setting it in a global context. Based on this focus, the chapters represent hand-picked scholarly research on major discourses in the field of history textbooks and symbolic representations of national heroes, and draw upon recent studies in the areas of globalisation, history textbooks, and national leaders. A number of researchers have written on the importance of teaching national history in order to foster national identity and a sense of belonging to a certain society, state, and people among the younger generation. Some nations prefer to create national heroes out of their political leaders who are still in power, and

whose lives and reputation are portrayed as being eminently spotless. Using diverse comparative education paradigms from critical theory, social semiotics, and historical-comparative research, the authors analyse the unpacking of the ideological agenda hidden behind the choice and lionization (or silencing) of the preferred national heroes. They provide an informed critique of various historical narratives depicting national leaders and national heroes. The book provides an easily accessible, practical yet scholarly source of information on international concerns in the field of globalisation, history education and policy research. Offering an essential sourcebook of ideas for researchers, history educators, practitioners and policymakers in the fields of globalisation and history education, it also provides a timely overview of current changes in politically correct history education narratives in history textbooks.

The Myth of the Khazars and Intellectual Antisemitism in Russia, 1970s-1990s Viktor Aleksandrovich

Shnirel'man, 2002 Deals with antisemitic propaganda in the late Soviet and post-Soviet periods, when the term Khazars was used as a euphemism for Jews. Explores the image of the Jewish Khazars in the rhetoric and worldview of contemporary Russian nationalists and their ethnocentric myths of the past and the Russian idea. Clarifies these antisemites' view of a world Jewish conspiracy, explaining the resort to the Khazars as symbols of supposed Jewish domination of Russia from the time of Kievan Rus through the epoch of the Russian Revolution and Bolshevik dictatorship (with Stalin seen as a pawn of the Jew Kaganovich) until the breakup of the Soviet Union - the Jews are blamed for all these calamities. The Khazar version of Russian history was touted by patriotic nationalists in periodicals, by such archaeologists as Gumilev, and by nationalistic writers of science fiction and belles lettres. Some of these writers highlighted the role of the Khazars in subjugating the Slavs; others stressed world Zionism as a new Khazar plot. These ideas even penetrated

the Russian educational system. The myth of the Khazars also attracted Ukrainian nationalists (pp. 148-159).

The Chief Culprit Viktor Suvorov, 2013-03-15 Bestselling author Victor Suvorov probes newly released Soviet documents and reevaluates existing material to analyze Stalin's strategic design to conquer Europe and the reasons behind his controversial support for Nazi Germany. A former Soviet army intelligence officer, the author explains that Stalin's strategy leading up to World War II grew from Vladimir Lenin's belief that if World War I did not ignite the worldwide Communist revolution, then a second world war would be needed to achieve it. Stalin saw Nazi Germany as the power that would fight and weaken capitalist countries so that Soviet armies could then sweep across Europe. Suvorov reveals how Stalin conspired with German leaders to bypass the Versailles Treaty, which forbade German rearmament, and secretly trained German engineers and officers and provided bases and factories for war. He also calls attention to the 1939 nonaggression pact between the Soviet Union and Germany that allowed Hitler to proceed with his plans to invade Poland, fomenting war in Europe. Suvorov debunks the theory that Stalin was duped by Hitler and that the Soviet Union was a victim of Nazi aggression. Instead, he makes the case that Stalin neither feared Hitler nor mistakenly trusted him. Suvorov maintains that after Germany occupied Poland, defeated France, and started to prepare for an invasion of Great Britain, Hitler's intelligence services detected the Soviet Union's preparations for a major war against Germany. This detection, he argues, led to Germany's preemptive war plan and the launch of an invasion of the USSR. Stalin emerges from the pages of this book as a diabolical genius consumed by visions of a worldwide Communist revolution at any cost—a leader who wooed Hitler and Germany in his own effort to conquer the world. In contradicting traditional theories about Soviet planning, the book is certain to provoke debate among historians throughout the world.

Globalisation and National Identity in History Textbooks

Joseph Zajda, 2017-07-06 *Globalisation and National Identity in History Textbooks: The Russian Federation*, the 16th book in the 24-volume book series *Globalisation, Comparative Education and Policy Research*, discusses trends in dominant discourses of identity politics, and nation-building in school history textbooks in the Russian Federation (RF). The book addresses one of the most profound examples of the re-writing of history following a geo-political change. Various book chapters examine debates pertaining to national identity, patriotism, and the nation-building process. The book discusses the way in which a new sense of patriotism and nationalism is documented in prescribed Russian history textbooks, and in the Russian media debate on history textbooks. It explores the ambivalent and problematic relationship between the state, globalisation and the construction of cultural identity in prescribed school history textbooks. By focusing on ideology, identity politics, and nation-building, the book examines history teachers' responses to the content of history textbooks and how teachers depict key moments in modern Russian history. This book, an essential sourcebook of ideas for researchers, practitioners and policymakers in the fields of globalisation and history education, provides timely information on history teachers' attitudes towards historical knowledge and historical understanding in prescribed Russian history textbooks.

Reconstruction and Interaction of Slavic Eurasia and Its Neighboring Worlds Osamu Ieda, Tomohiko Uyama (ed), 2006

Bosnia and Herzegovina in the Second World War Enver Redzic, 2023-05-09 Five major groups fought one another in Bosnia and Herzegovina during the Second World War: The German and Italian occupiers, the Serbian Chetniks, the Ustasha of the Independent State of Croatia, the Bosnian Muslims, and the Tito-led Partisans. The aims, policies, and actions of each group are examined in light of their own documents and those of rival

groups. This work shows how the Partisans prevailed over other groups because of their ideological appeal, superior discipline, and success in winning the support of large numbers of uncommitted Bosnians, particularly the Bosnian Muslims.

The Byzantine World Paul Stephenson, 2010-12-20 The Byzantine World presents the latest insights of the leading scholars in the fields of Byzantine studies, history, art and architectural history, literature, and theology. Those who know little of Byzantine history, culture and civilization between AD 700 and 1453 will find overviews and distillations, while those who know much already will be afforded countless new vistas. Each chapter offers an innovative approach to a well-known topic or a diversion from a well-trodden path. Readers will be introduced to Byzantine women and children, men and eunuchs, emperors, patriarchs, aristocrats and slaves. They will explore churches and fortifications, monasteries and palaces, from Constantinople to Cyprus and Syria in the east, and to Apulia and Venice in the west. Secular and sacred art, profane and spiritual literature will be revealed to the reader, who will be encouraged to read, see, smell and touch. The worlds of Byzantine ceremonial and sanctity, liturgy and letters, Orthodoxy and heresy will be explored, by both leading and innovative international scholars. Ultimately, readers will find insights into the emergence of modern Byzantine studies and of popular Byzantine history that are informative, novel and unexpected, and that provide a thorough understanding of both.

A People's Tragedy Orlando Figes, 2014 Vast in scope, based on exhaustive original research, and written with passion, narrative skill and human sympathy, this book offers an account of the Russian Revolution for a new generation.

The Memoirs of Catherine the Great Catherine the Great,2007-12-18 Empress Catherine II brought Europe to Russia, and Russia to Europe, during her long and eventful reign (1762—96). She fostered the culture of the Enlightenment and greatly expanded the immense empire created by Czar Ivan the Terrible, shifting the balance of power in Europe eastward. Famous for her will to power and for her dozen lovers, Catherine was also a prolific and gifted writer. Fluent in French, Russian, and German, Catherine published political theory, journalism, comedies, operas, and history, while writing thousands of letters as she corresponded with Voltaire and other public figures. The Memoirs of Catherine the Great provides an unparalleled window into eighteenth-century Russia and the mind of an absolute ruler. With insight, humor, and candor, Catherine presents her eyewitness account of history, from her whirlwind entry into the Russian court in 1744 at age fourteen as the intended bride of Empress Elizabeth I's nephew, the eccentric drunkard and future Peter III, to her unhappy marriage; from her two children, several miscarriages, and her and Peter's numerous affairs to the political maneuvering that enabled Catherine to seize the throne from him in 1762. Catherine's eye for telling details makes for compelling reading as she describes the dramatic fall and rise of her political fortunes. This definitive new translation from the French is scrupulously faithful to her words and is the first for which translators have consulted original manuscripts written in Catherine's own hand. It is an indispensable work for anyone interested in Catherine the Great, Russian history, or the eighteenth century.

Ethnocentrism in Education Klaus Schleicher, Tamás Kozma, 1992 While we witness a dramatic revival of Ethnocentrism, particularly in the former socialist countries, the Global Interdependence is inexorably increasing in the face of internationalized high technology, stock-markets, pollution and migration. The comparative Reader analyses the educational implications of ethnocentrism from the perspective of different social sciences, with regard to its educational and social ramifications in four continents, and in the intention to balance ethnic identity and cultural diversity with social communication and cross-cultural cooperation. The reader encourages a Comparison at three levels: First of all, between research concepts, regional case studies and cross-cultural educational goals and means; second, between appearance, functions, and legitimacy of ethnocentrism in education; and thirdly, between the efficacy of subtle socialization procedures and the possibilities of formal education and educational policy.

The Last Descendant of Aeneas Marie Tanner, 1993-01-01 From antiquity to the eve of the modern era, rulers of Western empires inspired hero worship by proclaiming their divine origins. In this fascinating original study, Marie Tanner presents the history of the emperor's mythic image and its continuing influence on Western political thought. She shows that these pretensions to divinity were based on the Trojan legend and the myth of Rome as developed in Vergil's Aeneid and that later Christian emperors expanded these claims by tracing their lineage not only to the pagan gods but also to the priest-kings of the Old Testament. Through this amalgam of heritages each successive Holy Roman emperor proclaimed that he was the last descendant of Aeneas, destined to yield the terrestrial rule of

Rome to Christ and thereby inaugurate millennial peace. By examining a wide range of literary, artistic, and historical sources plus a corpus of new illustrations, Tanner discovers remarkable chains of evidence for this process, one that culminates with the Renaissance Hapsburgs who imbued the holiest symbols of the faith with dynastic meaning as they attempted to consolidate all priestly and secular powers in their grip. On these foundations Philip II of Spain, son of the Holy Roman Emperor Charles V and the first monarch to rule the four known continents, created a new concept of absolute monarchy that shaped the principles of modern statecraft and determined the dominant form of government in Europe for the next two centuries.
