Gold Laundering Mark Pieth,2019-07-01 In this eye-opening book, Mark Pieth gives an in-depth insight into how the global gold market works, what role Switzerland plays in it, where the hidden abuses lie and how human rights in the gold industry can be protected in a credible way. This hard-hitting, exclusively researched depiction of a key area of economic policy takes us both to the glittering world of gold refining and to the world's worst mining regions. Mark Pieth illuminates the historical roots of the gold trade before turning his attention to today's supply chains, from mines to refineries and clandestine intermediaries to consumers: central banks, investors, jewellers and watchmakers. He reveals some of the horrific problems caused by gold mining that still receive little attention due to a lack of binding regulations: severe environmental destruction, forced labour and human trafficking, land grabbing, stolen assets and money laundering. The author manages to make these complex topics easy to understand and hard to ignore. Switzerland is not only a major power in the financial sector and commodity market - whose scandalous workings were revealed by the Swiss NGO Berne Declaration (now Public Eye) in the book Rohstoff, also published by Salis. Switzerland is also a leader in global gold trading. But while the EU, for example, has recently turned existing OECD guidelines into binding law, Switzerland continues to rely on voluntary self-regulation.

The Eye John V. Forrester,Andrew D. Dick,Paul G McMenamin,Fiona Roberts,Eric Pearlman, BSc, PhD,2015-06-01 The Eye: Basic Sciences in Practice provides highly accessible, concise coverage of all the essential basic science required by today's ophthalmologists and optometrists in training. It is also essential reading for those embarking on a career in visual and ophthalmic science, as well as an invaluable, current refresher for the range of practitioners working in this area. This new fourth edition has now been fully revised and updated in line with current curricula, key research developments and clinical best practice. It succinctly incorporates the massive strides being made by genetics and functional genomics based on the Human Genome Project, the new understanding of how the microbiome affects all aspects of immunology, the remarkable progress in imaging technology now applied to anatomy and neurophysiology, as well as exciting new molecular and other diagnostic methodologies now being used in microbiology and pathology. All this and more collectively brings a wealth of new knowledge to students and practitioners in the fields of ophthalmology and visual science. For the first time, this (print) edition also now comes with bonus access to the complete, fully searchable electronic text - including carefully selected additional information and new video content to further explain and expand on key concepts - making The Eye a more flexible, comprehensive and engaging learning package than ever before. The only all-embracing textbook of basic science suitable for trainee ophthalmologists, optometrists and vision scientists - other books concentrate on the individual areas such as anatomy. Attractive page design with clear, colour diagrams and text boxes make this a much more accessible book to learn from than many postgraduate textbooks. Presents in a readable form an account of all the basic sciences necessary for an understanding of the eye - anatomy, embryology, genetics, biochemistry, physiology, pharmacology, immunology, microbiology and infection and pathology. More on molecular pathology. Thorough updating of the sections on pathology, immunology, pharmacology and immunology. Revision of all other chapters. More colour illustrations Comes with complete electronic version

Encyclopedia of Cancer Manfred Schwab,2011-10-14 The merging of different basic and clinical science disciplines towards the common goal of fighting against cancer has long ago called for the establishment of a comprehensive reference source both as a tool to close the language gap between clinical and basic science investigators and as a platform of information for students and informed laymen alike. The Encyclopedia of Cancer provides rapid access to focused information on all topics of cancer research for clinicians, research scientists and advanced students. Given the overwhelming success of the Second Edition, which appeared in 2009, and fast recent development in the different fields of cancer research, it has been decided to publish a third fully revised and expanded edition, following the principal concept of the first edition that has proven so successful. Recent developments are seeing a dynamic progress in basic and clinical cancer science, with translational research increasingly becoming a new paradigm in cancer research. In particular, new approaches to both Personalized Cancer Medicine and Targeted Therapies have made promising progress. While the Second Edition featured scholarly contributions from approximately 1.000 scientists/clinicians in four Volumes, the Third Edition includes 1.300 contributors in 7 Volumes with an A-Z format of approx. 7000 entries. It provides definitions of common acronyms and short definitions of related terms and processes in the form of keyword entries. In addition, there are detailed essays, which provide comprehensive information on syndromes, genes and molecules, and processes and methods. Each essay is well-structured, with extensive cross-referencing between all entries. In the Third Edition, topical Essays present a comprehensive picture of major cancers, such as Breast Cancer, Colorectal Cancer, Prostate Cancer, Ovarian Cancer, Renal Cancer, Lung Cancer, and Hematological Malignancies, Leukemias and Lymphomas. For each of these cancers, different authoritative Essays are included that cover topics ranging from Pathology, to Clinical Oncology and Targeted Therapies. This new feature should meet the expectance that a wide community has towards a major cancer reference works. The Encyclopedia of Cancer will be accessible both in print and online, and this information source should be of value to both the clinical and basic scientific community as well as to the public.

From Genes to Personalized Healthcare Nicolas Jacq,2007 The main focus of this publication is on technologies, solutions and requirements that interest the grid and the life-science communities to foster the integration of grids into health. The proceedings are especially interesting for grid middleware and grid application developers, biomedical and health informatics users, and security and policy makers with a common focus on the application in the health domain. Topics in this publication are: State-of-the-art of the grid research and use at molecule, cell, organ, individual and population levels; and security and imaging. In security, data protection and pseudonymization are being discussed. In imaging, there's Globus MEDICUS, which federates DICOM devices through a grid architecture and KnowARC on facilitating grid networks for the biomedical research community. Finally, there's a report on the successful use of multimodal workflows in diabetic retinopathy research.

The Town and Country Magazine, Or, Universal Repository of Knowledge, Instruction, and Entertainment ,1781

Neuro-oncology Wolfgang Grisold,Riccardo Soffietti,2012 Volume 2: This volume provides unique insights into the field of neuro-oncology by presenting new advancements and research in the study and treatment of tumors of the nervous system, their progression, side effects, and the adverse effects of some therapies. An in-depth exploration of the management of tumors and new therapeutic strategies is extensively covered, including groundbreaking research on gene therapy and molecularly targeted treatments. Clinicians will gain a better understanding of the many neurological manifestations of tumors through a thorough analysis of recent developments in the field, including new diagnostic imaging techniques. In addition, fresh attention to molecular biology, immunology, and other clinical aspects of these types of tumors is presented. [Ed.].
