**Wireless Horizon** Dan Steinbock,2003 Steinbock (a senior advisor for the Institute for Mobile Market Research) provides a global overview of successful strategies, policies, and innovations in the most developed (i.e. globalized) wireless technologies markets since the 1980s. After identifying globalization drivers and technology innovators, he analyzes recent industry evolution. He discusses the strategies of the leading equipment manufacturers, as well as enablers and service providers. Annotation copyrighted by Book News, Inc., Portland, OR

*The Internationalisation of Mobile Telecommunications* Peter J. Curwen,Jason Whalley,2009-01-01 . . . the authors have a pleasant approach to arranging and commenting on their facts, which makes the book readable. . . readers wanting quantitative data about mobile networks, on which qualitative theories can be based, will be very well satisfied. Robert Milne, Info The Journal of Policy, Regulation and Strategy for Telecommunications As a source of information on the mobile sector, the book is highly valuable. . . we should commend the authors for making a wealth of information accessible, and in my view, even for the most seasoned industry expert, the book will shed light on a dimension or aspect that has previously been overlooked or under valued. Wolter Lemstra, Competition and Regulation of Network Industries The Internationalisation of Mobile Telecommunications is a comprehensive look at the rapidly-changing market structure, the alternative technologies, the extent of globalization, and the ownership of firms in increasingly competitive mobile telecommunications markets around the world. This is an exceptionally valuable book for anyone interested in understanding current and future developments in mobile telecommunications. Stanford L. Levin, Southern Illinois University, Edwardsville, US Peter Curwen and Jason Whalley review the strategic operations of, and technological options available to, the 30 most prominent international mobile operators. This review is initially based upon the Asia-Pacific, African, European, Latin American and North American regions before moving on to take a worldwide perspective. The authors place these mobile operators within a wider business context via a broad ten-year appraisal of the companies involved in the entire telecommunications, media and technology (TMT) sector. The issue as to whether there truly is such a thing as a global mobile operator is addressed; the answer, in practice, is negative. Based upon the very latest data available, the underlying premise of the book is that mobile telecommunications is such a fast-moving sector that operators are obliged to alter their international strategies as circumstances unravel without necessarily having a long-term master plan, and hence that opportunism is a hallmark of operators international strategies. This state-of-the-art overview of the internationalisation of mobile telecommunications will prove essential reading for academics and practitioners with a vested interest in technology, telecommunications and strategic management.

Mobile Internet For Dummies Michael J. O'Farrell,John R. Levine,Jostein Algroy,James Pearce,Daniel Appelquist,2008-06-23 You're on the go all the time -- maybe for business, maybe because it's a byproduct of your busy lifestyle. **Fourth Generation Mobile Communication** Peter Curwen,Jason Whalley,2013-12-02 This book deals with the development of so-called fourth generation mobile communications or 4G. It covers all aspects of the technology in a form comprehensible to the general reader, a history of its implementation on a worldwide basis and information on how it will be used to improve business transactions. It is up-to-date, comprehensive, and is based upon information acquired from well over one thousand individual sources. All of the data are set up in a manner that simplifies comparisons between countries and service providers. Based on the extensive analysis of the different contexts and progress of 4G technology, future prospects for high-speed mobile communications are also presented.

**Seduction by Contract** Oren Bar-Gill,2012-08-23 Consumers routinely enter into long-term contracts with providers of goods and services - from credit cards, mortgages, cell phones, insurance, TV, and internet services to household appliances, theatre and sports events, health clubs, magazine subscriptions, transportation, and more. Across these consumer markets certain design features of contracts are recurrent, and puzzling. Why do sellers design contracts to provide short-term benefits and impose long-term costs? Why are low introductory prices so common? Why are the contracts themselves so complex, with numerous fees and interest rates, tariffs and penalties? Seduction by Contract explains how consumer contracts emerge from the interaction between market forces and consumer psychology. Consumers are short-sighted and optimistic, so sellers compete to offer short-term benefits, while imposing long-term costs. Consumers are imperfectly rational, so

sellers hide the true costs of products and services in complex contracts. Consumers are seduced by contracts that increase perceived benefits, without actually providing more benefits, and decrease perceived costs, without actually reducing the costs that consumers ultimately bear. Competition does not help this behavioural market failure. It may even exacerbate it. Sellers, operating in a competitive market, have no choice but to align contract design with the psychology of consumers. A high-road seller who offers what she knows to be the best contract will lose business to the low-road seller who offers what the consumer mistakenly believes to be the best contract. Put bluntly, competition forces sellers to exploit the biases and misperceptions of their customers. Seduction by Contract argues that better legal policy can help consumers and enhance market efficiency. Disclosure mandates provide a promising avenue for regulatory intervention. Simple, aggregate disclosures can help consumers make better choices. Comprehensive disclosures can facilitate the work of intermediaries, enabling them to better advise consumers. Effective disclosure would expose the seductive nature of consumer contracts and, as a result, reduce sellers' incentives to write inefficient contracts. Developing its explanation through a general framework and detailed case studies of three major consumer markets (credit cards, mortgages, and cell phones), *Seduction by Contract* is an accessible introduction to the law and economics of consumer contracts, and a powerful critique of current regulatory policy.

*Security and the Networked Society* Mark A. Gregory,David Glance,2014-07-08 This book examines technological and social events during 2011 and 2012, a period that saw the rise of the hacktivist, the move to mobile platforms, and the ubiquity of social networks. It covers key technological issues such as hacking, cyber-crime, cyber-security and cyber-warfare, the internet, smart phones, electronic security, and information privacy. This book traces the rise into prominence of these issues while also exploring the resulting cultural reaction. The authors' analysis forms the basis of a discussion on future technological directions and their potential impact on society. The book includes forewords by Professor Margaret Gardner AO, Vice-Chancellor and President of RMIT University, and by Professor Robyn Owens, Deputy Vice-Chancellor (Research) at the University of Western Australia. *Security and the Networked Society* provides a reference for professionals and industry analysts studying digital technologies. Advanced-level students in computer science and electrical engineering will also find this book useful as a thought-provoking resource.

*Television and New Media* Jennifer Gillan,2010-10-18 We watch TV on computers, phones, and other mobile devices; television is now online as much as it is on air. *Television and New Media* introduces readers to the ways that new media technologies have transformed contemporary broadcast television production, scheduling, distribution, and reception practices. Drawing upon recent examples including *Lost*, *24*, and *Heroes*, this book examines the ways that television programming has changed—transforming nearly every TV series into a franchise, whose on-air, online, and on-mobile elements are created simultaneously and held together through a combination of transmedia marketing and storytelling. Television studios strive to keep their audiences in constant interaction with elements of the show franchise in between airings not only to boost ratings, but also to move viewers through the different divisions of a media conglomerate. Organized around key industrial terms—platforming, networking, tracking, timeshifting, placeshifting, schedule-shifting, micro-segmenting, and channel branding this book is essential for understanding how creative and industrial forces have worked together to transform the way we watch TV.
