

# Verizon Thought Leadership

Denny F. Strigl, Frank Swiatek

**Verizon Untethered** Ivan Seidenberg, 2018-05-01 The Verizon leadership team stands apart from most leadership teams today in their willingness repeatedly to put the enterprise before the individual. At first blush, this might look like a hopelessly old-fashioned notion in the age of the selfie. Yet, I would argue this is a trait that future leaders and boards of directors across industries would do well to understand and embrace. Seidenberg not once but twice in the service of company shareholders and employees subordinated himself and put off taking sole leadership of the company to advance the enterprise's odds of success. And many others in this story exhibited the same trait to help build this industry-leading enterprise. They understood that the risk of not acting and thereby destroying value during a period of accelerating technological change and industry consolidation—a situation faced by leadership teams around the world today—was much greater than the risk of stepping in as No. 2 or co-CEO. In my 50 years of experience, it is a rare leadership team that will subordinate itself for the benefit of the industry, customers and the company. That principle, that the company comes first, the individual second, is what will define successful leadership teams of the future. Multiple leadership principles, some new, some timeless, emerge from this narrative and will be of great use to the next generation of leaders across industries and around the world. By taking a look at a company that successfully executed exponential transformation, we can take the

strategies of Verizon leaders and apply them to our own experiences.—Ram Charan

**Boost Your Business Through Thought Leadership** Wyndi Hill,2023-08-11 A thought leader is seen as the authority on any given subject. He or she is the go-to person within a specific niche. Their opinions are trusted because they are the authority. They inspire others with innovative ideas and provide the guidance to turn ideas into reality. Because of their expertise, thought leaders are respected by both peers and competitors. Their followers value and trust the thought leader's opinions to the degree that they incorporate those opinions into their lives. Because they are so respected and such importance is given to their opinions and advice, thought leaders are often sought out to speak at conferences, do media interviews and write for publications relevant to their industry. Business leaders aspire to become thought leaders within their field - an endeavor which takes patience, strategy and education. Most thought leaders are passionate about their subject area and enthusiastically share their knowledge with others.

**Learning Leadership** James M. Kouzes, Barry Z. Posner, 2016-04-25 From the bestselling authors of The Leadership Challenge and over a dozen award winning leadership books, James M. Kouzes and Barry Z. Posner have written a new book that examines a fundamental question: How do people learn leadership? How do they learn to become leaders? Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader (ISBN: 978-1-119-14428-1; Wiley; May 2016) is a comprehensive guide to unleashing the inner-leader in us all and to building a solid foundation for a lifetime of leadership growth and mastery. The book offers a concrete framework to help individuals of all levels, functions, and backgrounds take charge of their own leadership development and become the best leaders they can be. Arguing that all individuals are born with the capacity to lead, Kouzes and Posner provide readers with a practical series of actions and specific coaching tips for harnessing that capacity and creating a context in which they can excel., Supported by over 30 years of research, from over seventy countries, and with examples from real-world leaders, Learning Leadership is a clarion call to unleash the leadership potential that is already present in today's society. According to Kouzes and Posner, "Leadership makes a significant difference in

levels of engagement and commitment and is perhaps the most important asset in every organization, yet recent research points to a shortage of leaders. It is a serious global concern. The world needs more exemplary leaders in order to promote high-performing workplaces and inspire feelings of greater self-worth and meaningfulness. The shortage, however, is not because of the lack of potential talent. The people are out there, the eagerness is out there, and the capability is out there. The shortage results from prevailing myths—myths about talent, strengths, position, self-reliance, and effort—that inhibit the vast majority of leaders from shining and organizations from realizing the full benefits of the talent they already have.” Learning Leadership provides readers with evidence-based strategies to ignite the habit of continuous improvement and the mindset of becoming the best leaders they can be. Emerging leaders, as well as leadership developers, internal and external coaches and trainers, and other human resource professionals will learn from first-hand stories and practical examples so that they can deeply understand and apply the fundamental for becoming the best leaders they can be. Learning Leadership: The Five Fundamentals of Becoming an Exemplary Leader is divided into digestible bite-sized chapters that encourage daily actions to becoming a better leader. Key takeaways from the book include: Believe in Yourself. Believing in oneself is the essential first step in developing leadership competencies. The best leaders are learners, and they can’t achieve mastery until and unless they truly decide that inside them

there is a person who can make a difference and learn to be a better leader than they are right now. Aspire to Excel. To become an exemplary leader, people have to determine what they care most about and why they want to lead. Leaders with values-based motivations are the most likely to excel. They also must have a clear image of the kind of leader they want to be in the future—and the legacy they want to leave for others. Challenge Yourself. Challenging oneself is critical to learning leadership. Leaders have to seek new experiences and test themselves. There will be inevitable setbacks and failures along the way that require curiosity, grit, courage, and resilience in order to persist in learning and becoming the best. Engage Support. One can't lead alone, and one can't learn alone. It is essential to get support and coaching on the path to achieving excellence. Whether it's family, managers at work, or professional coaches, leaders need the advice, feedback, care, and support of others. Practice Deliberately. No one gets better at anything without continuous practice. Exemplary leaders spend more time practicing than ordinary leaders. Simply being in the role of a leader is insufficient. To achieve mastery, leaders must set improvement goals, participate in designed learning experiences, ask for feedback, and get coaching. They also put in the time every day and make learning leadership a daily habit. Kouzes and Posner offer unrivaled insights into what it means to become an exemplary leader in today's world with their original research and over 30 years of experience studying the practices of extraordinary

leadership. They show that anyone can become a better leader if they believe in themselves, aspire to excel, challenge themselves, to grow, engage the support of others, and practice deliberately. Learning Leadership challenges readers to do the meaningful and disciplined work necessary to becoming the best they can, using a new mindset and toolkit that can make extraordinary things happen. It's not the once-in-a-while transformational acts that demonstrate leadership. It's the little things that one does day in and day out that pave the path to greatness.
