Cold Horizon Kristy McCaffrey, 2019-06-11 What

will it take to survive the Savage Mountain? Lindsey and Ty are about to find out. The wind blasted Lindsey, threatening to rip her off the mountain and throw her into the abyss far below. It was blisteringly obvious that K2 wasn't going to give up her summit without a fight. Lindsey Coulson likes to scale mountains. With her sister, Alison, she has made a name for herself climbing the tallest and most treacherous peaks in the world. But when Alison dies on a K2 expedition—the second highest mountain on earth—Lindsey stops climbing. Unable to shed her heartache, it becomes clear she must return to the wilderness and only one place will do—K2, the Savage Mountain. And to get there, she'll need handsome, enigmatic Tyler Galloway. Ty Galloway welcomes Lindsey to his small crew with one hitch—to help with funding he wants to write about her for a magazine feature. In climbing circles, Lindsey and her sister had been famous for their mountain exploits, and her comeback story would be compelling. But he didn't account for how captivating the woman herself would be. Tackling K2 will test Ty's limits, but Lindsey Coulson will test his heart. YORK TIMES BESTSELLER • "A breathless read" (USA Today) featuring "some of the most ingenious military-techno twists this side of Tom Clancy" (San Francisco Chronicle). David Elliot is about to have a very bad day at the office. Each morning in his forty-fifth floor executive suite, David savors the quiet moments before the workday begins. Until today, when his boss walks in and aims a gun at him, murder glinting in his eye. For the rest of the day, David will be trapped in a midtown tower with a team of ruthless and professional mercenaries. Everyone he meets—and knows—will try to kill him. They expect him to be dead by lunchtime. But they're wrong. This is the "killer" workday redefined, a high-stakes and whiplash-paced drama that plays out with an electrifying intensity. You'll never see the office the same way again.

Routledge Library Editions: Political Geography
Various,2021-06-23 From votes to strikes to street violence, politics is intrinsically geographical. Many of the books in this set, originally published between 1964 and 1990, illustrate that the social contexts provided by localities are crucial in defining distinctive political identities and subsequent political activities.

Defining the Limits of Outer Space for Regulatory Purposes Olavo de Oliveira Bittencourt Neto,2015-05-14 With different countries ascribing to different theories of air space and outer space law, Dr. Bittencourt Neto proposes in this Brief a reassessment of the international law related to the extension of state territories vertically. Taking into consideration the vast number of proposals offered by scholars and diplomatic delegations on this subject matter, as well as the principles of comparative law, a compromise to

allow for peaceful development is the only way forward. The author argues for setting the delimitation of the frontier between air space and outer space at 100 km above mean sea level through an international treaty. This would also regulate passage rights for space objects during launchings and reentries, as long as those space activities are peaceful, conducted in accordance with international law and respecting the sovereign interests of the territorial State. Continuing expansion of the commercial space industry and conflicting national laws require a stable and fair legal framework best adjudicated by the United Nations, instead of allowing a patchwork system to persist. The proper framework for developing such regulation is carefully discussed from all angles with a practical recommendation for policy-makers in the field.

Behind and Beyond the Chicago Convention Pablo Mendes De Leon, Niall Buissing, 2019-08-21 Behind and Beyond the Chicago Convention The Evolution of Aerial Sovereignty Edited by Pablo Mendes de Leon & Niall Buissing The Convention on International Civil Aviation which was concluded in Chicago on 7 December 1944, commonly referred to as the Chicago Convention, is one of the most ratified multilateral agreements currently in force, with 193 States parties. In this deeply informative book celebrating its 75th birthday, thirty-three of the most distinguished authors in aviation law offer perspectives on the quality of the Convention's achievements, which principally address the promotion of safety and security. Emphasising the Convention's flexibility in the accommodation of social and technological changes, the authors investigate such topics and issues as the following: environmental protection measures such as abatement of noise and reduction of the damaging effects of gaseous emissions; effect of new methods of communication such as Global

Navigation Satellite Systems (GNSS); distinction between civil and State aircraft; economic regulation as established under air services agreements between States; cybersecurity measures; compensation for damages; liberalisation of air services; role of regional aviation organisations, in particular, that of the European Union; position of airlines, airports, and providers of air navigation services; and territorial jurisdiction with respect to areas lacking a universally accepted sovereign status. Annexes include the original texts of the Paris Convention 1919 and the Chicago Convention 1944. With its incisive perceptions put forward by distinguished aviation lawyers - including an exploration of the absolute character of sovereignty - this book is without peer in its analysis of how the Chicago Convention affects the regulation of international civil aviation and the operation of air services. Its multifaceted approach towards the current state of affairs from a legal and policy perspective will be welcomed by practitioners and law firms in the field and civil aviation authorities, as well as by academics and business persons with a stake in aviation.

My Vertical World Jerzy Kukuczka, 1992 My Vertical World is the story of a quiet family man from Silesia who was also a single-minded schemer, sailing close to the bureaucratic wind in Poland as well as Pakistan and Nepal, painting factory chimneys and thinking of Lhotse, juggling for most of the time with meagre hard currency, scarce food and indifferent gear to achieve the starting point western climbers took for granted. Slow to acclimatise, once he had done, Kukuczka's stamina and drive were formidable. Preferring where possible to climb alpine-style with one companion, among his more remarkable achievements are his solo ascent of a new route on Makalu; a first traverse of the North and Middle Summits of Broad

Peak; climbing two 8000-metre peaks over 3000 kilometres apart in winter within twenty-five days; and making a new route up the middle of the South Face of K2 as a two-man team. His narrative takes the reader behind the catalogue of achievements to discover a diffident man, anxious for his good name, sobered by loss of friends, who can still view the antics of the international climbing circus with good humour, and climbed because his passion for his vertical world was an enveloping as it was infectious.
