**Efficient Strategy to Support Renewable Energy** Helge Næss-Schmidt, 2013-05 This report reviews how the Nordic countries can develop a strategy for renewable energy that delivers efficiently on the two underlying policy objectives of climate change and energy security challenges. The overarching elements in the evaluation of existing policies and the policy recommendations that follows from the analysis falls into three main parts: (i) Expanding renewable energy is not an end in itself, but a tool to deliver on the two real policy targets: climate change and energy security; (ii) Too much policy focus at the Nordic and EU level is dedicated to boost renewable energy share of energy production in the near term, and insufficient resources are allocated to develop future low carbon technologies, which are

required when CO2 abatement targets become more ambitious;  
(iii) The long term nature of the challenges and huge investments in low carbon technologies required to deliver on long term targets puts a very high premium on policies that reduces policy risks as perceived by investors.

### **The Handbook of Research on Energy Entrepreneurship**

Rolf W\_stenhagen,Robert Wuebker,2011-01-01 This timely Handbook provides an excellent overview of our knowledge on the drivers, influencing factors and outcomes of energy entrepreneurship. As the world grapples with global resource crunches and fights to reap the rewards of new energy technologies, a wide space for entrepreneurialopportunity has emerged. The Handbook of Research on Energy Entrepreneurship offers critical insight on how nations the world over can make full use of those opportunities.

### Sustainable Operations and Supply Chain Management

Melanie E. Kreye,2023-01-31 This book takes as its starting point the need to improve sustainability performance across the triple bottom line and reach global sustainable development goals. As such, it places sustainability at the heart of developing and explaining relevant theory, concepts and models in operations and supply chain management. Whereas previous textbooks on operations and supply chain management have focused on augmenting existing models of operations and supply chain management by simply adding on selected sustainability issues, this textbook places sustainability at the heart of operations and supply chain management. Sustainable Operations and Supply Chain Management consolidates the tools, concepts and methods of operations and supply chain management relevant for reaching

sustainable development goals. This book includes not only descriptions of the theories and models but also practical cases based on the most recent developments in different industry sectors, including user electronics, healthcare, fashion and energy. Relevant student exercises are also included for use in the classroom or in personal study. This book provides an ideal introduction for Bachelor or Masters-level students, whether they are on general management and business degrees, or are focused on areas such as engineering management, technology management or sustainability management. Furthermore, university-level teachers and lecturers will find the material presented in this book a valuable basis for structuring their courses on operations and supply chain management in the context of sustainability.

*Sustainable Energy Mix in Fragile Environments* Mary-Ellen Tyler,2018-02-14 The purpose of this book is to present a range of cases and comparison of the issues, insights and cases emerging from the Sustainable Energy Mix Summit in the Galapagos that offer a better understanding of energy mix in fragile environments from a variety of International locations and contexts including the Galapagos.

Atomic Layer Deposition of Zinc Based Transparent Conductive Oxides. Sanjeev Kumar Gurram,2017-01-20 In this work Atomic Layer deposition of niobium and titanium doped ZnO based Transparent Conductive Oxide (TCO) coatings were developed. The fundamentals required for the deposition and doping of ZnO TCOs are discussed. The various opto-electronic properties of the niobium and titanium doped ZnO films were determined and compared. A model was proposed to explain the various changes

in the opto-electronic properties of these films.

**Electricity Market Transparency Provisions of Section 220 of the Federal Power Act (Us Federal Energy Regulatory Commission Regulation) (Ferc) (2018 Edition)**

The Law The Law Library, 2018-10-07 Electricity Market Transparency Provisions of Section 220 of the Federal Power Act (US Federal Energy Regulatory Commission Regulation) (FERC) (2018 Edition) The Law Library presents the complete text of the Electricity Market Transparency Provisions of Section 220 of the Federal Power Act (US Federal Energy Regulatory Commission Regulation) (FERC) (2018 Edition). Updated as of May 29, 2018 The Commission is revising its regulations pursuant to section 220 of the Federal Power Act (FPA), as enacted by section 1281 of the Energy Policy Act of 2005 (EPAAct 2005), to facilitate price transparency in markets for the sale and transmission of electric energy in interstate commerce. In doing so, the Commission revises its regulations to require market participants that are excluded from the Commission's jurisdiction under FPA section 205 and have more than a de minimis market presence to file Electric Quarterly Reports (EQR) with the Commission. New Political Economy of Energy in Europe Jakub M.

Godzimirski, 2018-09-21 This edited collection details and analyses the dramatic changes that the international political economy of energy has undergone in the past decade. This change began with the increasing assertiveness of Russia when the oil price rose above the \$100 mark in 2008. This, combined with the rise of shale oil and gas, made the USA all but self-sufficient in terms of fossil fuels. The collapse of the oil price in 2014-15, Saudi Arabia's new strategy of defending its market share and the increasingly tense and controversial relationship between the West and Russia

all worked to further strengthen the geopolitical dimension of energy in Europe. The global result is a world in which geopolitics play a bigger part than ever before; the central question the authors of this volume grapple with is how the EU – and European small states – can deal with this. **Wind Power** Ben Backwell, 2014-09-23 Wind Power – The Struggle for Control of a New Global Industry looks at the nations, companies and people fighting for control of one of the world's fastest growing new industries and how we can harness one of the planet's most powerful energy resources – wind power. The book also examines the challenges the sector faces as it competes for influence and investment with the fossil fuel industry across the globe. The wind power business has grown from a niche sector within the energy industry to a global industry attracting substantial investment in recent years. In Europe wind has become the biggest source of new power generation capacity, while wind is successfully competing with the gas, coal and nuclear sectors in China and the US. The specialist wind turbine companies that pioneered the business have gone global over the last decade, while big industrial conglomerates have entered the fray. European companies are struggling to maintain their technological and market lead in the sector, in a three cornered battle with China and the US. Meanwhile, the industry is fighting to drive down costs in the face of a fossil fuel generation industry bolstered by the onset of cheap shale gas. And wind companies continue to wrestle with a stop-go cycle of investment across the world, with some traditional markets stuttering under the impact of the financial crisis and fiscal austerity, while new power hungry

markets in Asia and South America emerge. Wind Power – The Struggle for Control of a New Global Industry analyses the industry climbers, the investment trends and the technological advancements that will define the future of wind energy.

**The Multidimensional Agency** Jamie Parfitt, 2012-07-06 Why was understanding Starbucks' purpose crucial to the coffee company's financial health? Why did a US-based cosmetics company establish a business partnership with an Amazonian tribe? How did Bing increase the usage of its search engine by inspiring people to search offline? And how did the beverage giant Coca-Cola end up producing a chart-topping song and accompanying music video? Advertising strategist Jamie Parfitt answers all of these questions and more in *The Multidimensional Agency*, in which he examines the causes, implications and consequences of the latest trends in marketing and their effects on today's advertising industry. Taking note of the rise in human-centric marketing and corporate social responsibility, the increasing disposition of businesses towards collaboration, as well as the shifting role of marketing communication, Parfitt provides guidelines for how the advertising industry can adapt its practices to meet the changing landscapes of technology, media and society at large.

The Law Library, 2018-10-16 *Uplift Cost Allocation and Transparency in Markets Operated by Regional Transmission Organizations and Independent System Operators (US Federal Energy Regulatory Commission Regulation) (FERC) (2018 Edition)*  
The Law Library presents the complete text of the *Uplift Cost Allocation and Transparency in Markets Operated by Regional Transmission Organizations and Independent System Operators (US Federal Energy Regulatory Commission Regulation) (FERC)*

(2018 Edition). Updated as of May 29, 2018 The Federal Energy Regulatory Commission is revising its regulations to improve transparency practices for regional transmission organizations (RTO) and independent system operators (ISO). The Commission requires that each RTO/ISO establish in its tariff: Requirements to report, on a monthly basis, total uplift payments for each transmission zone, broken out by day and uplift category; requirements to report, on a monthly basis, total uplift payments for each resource; requirements to report, on a monthly basis, for each operator-initiated commitment, the size of the commitment, transmission zone, commitment reason, and commitment start time; and the transmission constraint penalty factors used in its market software, as well as the circumstances under which those factors can set locational marginal prices, and any process by which they can be changed. The Commission is withdrawing its proposal to require that each RTO/ISO that currently allocates the costs of real-time uplift to deviations allocate such real-time uplift costs only to those market participants whose transactions are reasonably expected to have caused the real-time uplift costs. **Materials and Sustainable Development** Michael F.

Ashby, 2015-01-19 This book, from noted materials selection authority Mike Ashby, provides a structure and framework for analyzing sustainable development and the role of materials in it. The aim is to introduce ways of exploring sustainable development to readers in a way that avoids simplistic interpretations and approaches complexity in a systematic way. There is no completely right answer to questions of sustainable development – instead, there is a thoughtful, well-researched response that recognizes concerns of stakeholders, the conflicting priorities and

the economic, legal and social aspects of a technology as well as its environmental legacy. The intent is not to offer solutions to sustainability challenges but rather to improve the quality of discussion and enable informed, balanced debate. Winner of a 2016 Most Promising New Textbook Award from the Textbook and Academic Authors Association Describes sustainable development in increasingly detailed progression, from a broad overview to specific tools and methods Six chapter length case studies on such topics as biopolymers, electric cars, bamboo, and lighting vividly illustrate the sustainable development process from a materials perspective Business and economic aspects are covered in chapters on corporate sustainability and the circular materials economy Support for course use includes online solutions manual and image bank
