How to Change Your Mind Michael Pollan, 2019-05-14 Now on Netflix as a 4-part documentary series! “Pollan keeps you turning the pages . . . clear-eyed and assured.” —New York Times A #1 New York Times Bestseller, New York Times Book Review 10 Best Books of 2018, and New York Times Notable Book A brilliant and brave investigation into the medical and scientific revolution taking place around psychedelic drugs--and the spellbinding story of his own life-changing psychedelic experiences When Michael Pollan set out to research how LSD and psilocybin (the active ingredient in magic mushrooms) are being used to provide relief to people suffering from difficult-to-treat conditions such as depression, addiction and anxiety, he did not intend to write what is undoubtedly his most personal book. But upon discovering how these remarkable substances are improving the lives not only of the mentally ill but also of healthy people coming to grips with the challenges of everyday life, he decided to explore the landscape of the mind in the first person as well as the third. Thus began a singular adventure into various altered states of consciousness, along with a dive deep into both the latest brain science and the thriving underground community of psychedelic therapists. Pollan sifts the historical record to separate the truth about these mysterious drugs from the myths that have surrounded them since the 1960s, when a handful of psychedelic evangelists inadvertently catalyzed a powerful backlash against what was then a promising field of research. A unique and elegant blend of science, memoir, travel writing, history, and medicine, *How to Change Your Mind* is a triumph of participatory journalism. By turns dazzling and edifying, it is the gripping account of a journey to an exciting and unexpected new frontier in our understanding of the mind, the self, and our place in the world. The true subject of Pollan's mental travelogue is not just psychedelic drugs but also the eternal puzzle of human consciousness and how, in a world that offers us both suffering and joy, we can do our best to be fully present and find meaning in our lives.

Edible Insects and Human Evolution Julie J. Lesnik, 2019-02-13 Researchers who study ancient human diets tend to focus on meat eating because the practice of butchery is very apparent in the archaeological record. In this volume, Julie Lesnik highlights a different food source, tracing evidence that humans and their hominin ancestors also consumed insects throughout the entire course of human evolution. Lesnik combines primatology, sociocultural anthropology, reproductive physiology, and paleoanthropology to examine the role of insects in the diets of hunter-gatherers and our nonhuman primate cousins. She posits that women would likely spend more time foraging for and eating insects than men, arguing that this pattern is important to note because women are too often

ignored in reconstructions of ancient human behavior. Because of the abundance of insects and the low risk of acquiring them, insects were a reliable food source that mothers used to feed their families over the past five million years. Although they are consumed worldwide to this day, insects are not usually considered food in Western societies. Tying together ancient history with our modern lives, Lesnik points out that insects are highly nutritious and a very sustainable protein alternative. She believes that if we accept that edible insects are a part of the human legacy, we may have new conversations about what is good to eat—both in past diets and for the future of food.

The Art of Thinking Clearly Rolf Dobelli,2014-05-06 A world-class thinker counts the 100 ways in which humans behave irrationally, showing us what we can do to recognize and minimize these “thinking errors” to make better decisions and have a better life Despite the best of intentions, humans are notoriously bad—that is, irrational—when it comes to making decisions and assessing risks and tradeoffs. Psychologists and neuroscientists refer to these distinctly human foibles, biases, and thinking traps as “cognitive errors.” Cognitive errors are systematic deviances from rationality, from optimized, logical, rational thinking and behavior. We make these errors all the time, in all sorts of situations, for problems big and small: whether to choose the apple or the cupcake; whether to keep retirement funds in the stock market when the Dow tanks, or whether to take the advice of a friend over a stranger. The “behavioral turn” in neuroscience and economics in the past twenty years has increased our understanding of how we think and how we make decisions. It shows how systematic errors mar our thinking and under which conditions our thought processes work best and worst. Evolutionary psychology delivers convincing theories about why our thinking is, in fact, marred. The neurosciences can pinpoint with increasing precision what exactly happens when we think clearly and when we don’t. Drawing on this wide body of research, *The Art of Thinking Clearly* is an entertaining presentation of these known systematic thinking errors--offering guidance and insight into everything why you shouldn’t accept a free drink to why you SHOULD walk out of a movie you don’t like it to why it’s so hard to predict the future to why shouldn’t watch the news. The book is organized into 100 short

chapters, each covering a single cognitive error, bias, or heuristic. Examples of these concepts include: Reciprocity, Confirmation Bias, The It-Gets-Better-Before-It-Gets-Worse Trap, and the Man-With-A-Hammer Tendency. In engaging prose and with real-world examples and anecdotes, *The Art of Thinking Clearly* helps solve the puzzle of human reasoning.

Roanoke, Virginia, 1882-1912 Rand Dotson, 2008 Tells the story of a city that for a brief period was widely hailed as a regional model for industrialization as well as the ultimate success symbol for the rehabilitation of the former Confederacy. In a region where modernization seemed to move at a glacial pace, those looking for signs of what they were triumphantly calling the New South pointed to Roanoke. No southern city grew faster than Roanoke did during the 1880s. A hardscrabble Appalachian tobacco depot originally known by the uninspiring name of Big Lick, it became a veritable boomtown by the end of the decade as a steady stream of investment and skilled manpower flowed in from north of the Mason-Dixon line. The first scholarly treatment of Roanoke's early history, the book explains how native businessmen convinced a northern investment company to make their small town a major railroad hub. It then describes how that venture initially paid off, as the influx of thousands of people from the North and the surrounding Virginia countryside helped make Roanoke - presumptuously christened the Magic City by New South proponents - the state's third-largest city by the turn of the century. Rand Dotson recounts what life was like for Roanoke's wealthy elites, working poor, and African American inhabitants. He also explores the social conflicts that ultimately erupted as a result of well-intended reforms initiated by city leaders. Dotson illustrates how residents mediated the catastrophic Depression of 1893 and that year's infamous Roanoke Riot, which exposed the facade masking the city's racial tensions, inadequate physical infrastructure, and provincial mentality of the local populace. Dotson then details the subsequent attempts of business boosters and progressive reformers to attract the additional investments needed to put their city back on track. Ultimately, Dotson explains, Roanoke's early struggles stemmed from its business leaders' unwavering belief that economic development would serve as the panacea for all of the town's problems.

Southland Nina Revoyr, 2003-04-01 I'm an LA native with a lot of love for LA crime fiction, but instead of preaching to the noir choir about *The Long Goodbye*, I'd like to gush about *Southland* by Nina Revoyr. It's a brilliant, ambitious, moving literary crime novel about two families in South Los Angeles and their tangled history between the 1930s and the 1990s. The central mystery is the death of four black boys in a Japanese-American man's store during the Watts Rebellion of 1965. It's a powerful book, one that I think about often, as well as a huge influence on my work. Right up there

with Chandler. --Stephanie Cha (of the LARB) in GQ on The Greatest Crime Novelists on Their Favorite Crime Novels Ever A story about injustice dressed up as a detective novel, *Southland* reminds us that activism is both an ongoing project and a deeply personal choice. --Vallaire Wallace in Electric Lit on The Novel That Shows Us How to Face our Past to Change Our Future Jackie Ishida's grandfather had a store in Watts where four boys were killed during the riots in 1965, a mystery she attempts to solve. --New York Times Book Review, Ross MacDonald on Where Noir Lives in the City of Angels It is the kind of saga that often epitomizes and shocks LA--friction and violence between races and cultures. --Los Angeles Times, named one of the 20 Essential LA Crime Books When I started working on *Your House Will Pay*, I hoped to write something that was half as smart and affecting as *Southland*. Revoyr's novel takes place in the Crenshaw district of Los Angeles, following two families--one black, one Japanese--over several decades. It's a character-driven saga with the engine of a crime novel, unravelling a horrific multiple murder that took place in the chaotic days of the Watts Rebellion in 1965. --The Guardian (UK), one of Steph Cha's Top 10 Books About Trouble in Los Angeles [A]n absolutely compelling story of family and racial tragedy. Revoyr's novel is honest in detailing southern California's brutal history, and honorable in showing how families survived with love and tenacity and dignity. --Susan Straight, author of *Highwire Moon* *Southland* brings us a fascinating story of race, love, murder and history, against the backdrop of an ever-changing Los Angeles. A young Japanese-American woman, Jackie Ishida, is in her last semester of law school when her grandfather, Frank Sakai, dies unexpectedly. While trying to fulfill a request from his will, Jackie discovers that four African-American boys were killed in the store Frank owned during the Watts Riots of 1965. Along with James Lanier, a cousin of one of the victims, Jackie tries to piece together the story of the boys' deaths. In the process, she unearths the long-held secrets of her family's history. *Southland* depicts a young woman in the process of learning that her own history has bestowed upon her a deep obligation to be engaged in the larger world. And in Frank Sakai and his African-American friends, it presents characters who find significant common ground in their struggles, but who also engage each other across grounds--historical and cultural--that are still very much in dispute. Moving in and out of the past--from the internment camps of World War II, to the barley fields of the Crenshaw District in the 1930s, to the streets of Watts in the 1960s, to the night spots and garment factories of the 1990s--*Southland* weaves a tale of Los Angeles in all of its faces and forms.

The Art of Thinking Clearly Rolf Dobelli, 2013-04-11 *OVER 3 MILLION COPIES SOLD* This book will change the way you think about decision-making. If you want to lead a happier, more prosperous

life, you don't need shiny gadgets, complicated ideas or frantic activity. You just need to make better choices. From why you should not accept a free drink to why you should keep a diary, from dealing with a personal problem to negotiating at work, *The Art of Thinking Clearly* is a simple, straightforward and always surprising guide to a better, smarter you. Making better choices will transform your life at work, at home, forever. Towns and Villages of the Lower Ohio Darrel E. Bigham, 2015 No other region in America is so fraught with projected meaning as Appalachia. Many people who have never set foot in Appalachia have very definite ideas about what the region is like. Whether these assumptions originate with movies like *Deliverance* (1972) and *Coal Miner's Daughter* (1980), from Robert F. Kennedy's widely publicized Appalachian Tour, or from tales of hiking the Appalachian Trail, chances are these suppositions serve a purpose to the person who holds them. A person's concept of Appalachia may function to reassure them that there remains an authentic America untouched by consumerism, to feel a sense of superiority about their lives and regions, or to confirm the notion that cultural differences must be both appreciated and managed. In *Selling Appalachia: Popular Fictions, Imagined Geographies, and Imperial Projects, 1878-2003*, Emily Satterwhite explores the complex relationships readers have with texts that portray Appalachia and how these varying receptions have created diverse visions of Appalachia in the national imagination. She argues that words themselves not inherently responsible for creating or destroying Appalachian stereotypes, but rather that readers and their interpretations assign those functions to them. Her study traces the changing visions of Appalachia across the decades from the Gilded Age (1865-1895) to the present and includes texts such as John Fox Jr.'s *Trail of the Lonesome Pine* (1908), Harriet Arnow's *Hunter's Horn* (1949), and Silas House's *Clay's Quilt* (2001), charting both the portrayals of Appalachia in fiction and readers' responses to them. Satterwhite's unique approach doesn't just explain how people view Appalachia, it explains why they think that way. This innovative book will be a noteworthy contribution to Appalachian studies, cultural and literary studies, and reception theory.

Ross-Ade Robert C. Kriebel, 2019-07-15 Dave Ross (1871-1943) and George Ade (1866-1944)

were trustees, distinguished alumni and benefactors of Purdue University. Their friendship began in 1922 and led to their giving land and money for the 1924 construction of Ross-Ade Stadium, now a 70,000 seat athletic landmark on the West Lafayette campus. Their life stories date to 1883 Purdue and involve their separate student experiences and eventual fame. Their lives crossed paths with U.S. First Lady Eleanor Roosevelt, Henry Ford, Amelia Earhart, and Will Rogers among others. Gifts or ideas from Ross or Ade led to creation of the Purdue Research Foundation, Purdue Airport, Ross Hills Park, and Ross Engineering Camp. They helped Purdue Theater, the Harlequin Club and more. Ade, renowned author and playwright, did butt heads with Purdue administrators at times long ago, but remains a revered figure. Ross's ingenious mechanical inventions of gears still steer millions of motorized vehicles, boats, tractors, even golf carts the world over.

Xtremus: A Bionican Quest in the Wake of Cybergeddon Peter Wiesner,2015-04-27 Xtremus is a dystopian satire about the aftermath of a cataclysmic demise of technology that takes place in post-apocalyptic Southern California. Eco terrorists have unleashed a computer virus killing the ruling class whose power and life force were dependent on sophisticated brain implants through which they communicated and held sway. The story follows the quest of Condor, leader of a group of hackers who survived Cybergeddon because of the immunities they received, albeit without the firepower of the halcyon days of techno splendor. Condor and other hackers are sworn to protect The Well, the only remaining database from the high-technology past that now resides in brains of the Bionicans. Condor's mission is to determine whether The Well's secret database could be hacked by other

survivors outside of Bionica to develop weapons of mass destruction and wreak havoc again. Condor's quest obliges him to deal with all three surviving clans in Southern California, each bent on imposing their unique ideology in this post-apocalyptic world: his fellow Bionicans, a drug besotted lot who communicate telepathically through The Well; the crude and romantic Goths, who love gladiatorial combat and motorcycles, and treat bad poetry as a capital crime; and the decadent Greeks whose work to revive of the Classics from Homer to Plato is supported by slavery and guided by sexual politics. Condor's quest is transformed many times by the women he conquers and manipulated by the woman who finally conquers him. His exploits turn into a power-grabbing adventure of murder, intrigue, and betrayal. By the time he learns about the true nature of his quest, it is too late for our hero to prevail. Xtremus is a morality tale and a satire of the Information Age, as we now know it. It pokes fun at the ideological melange of the 1960's that gave rise to environmental awareness, consumerism, sexual freedom, gay liberation, vegans, Eastern religion, mythology, New Age healing, motorcycle-based rebellion, and drug-induced alternate states of consciousness. It also takes on those whose blue-sky tunnel vision of technology is painting our future into a corner where wildlife and civil society cannot thrive.

A Ming Society John W. Dardess, 2023-11-10 John Dardess has selected a region of great political and intellectual importance, but one which local history has left almost untouched, for this detailed social history of T'ai-ho county during the Ming dynasty. Rather than making a sweeping, general survey of the region, he follows the careers of a large number of native sons and their relationship to Ming imperial politics. Using previously unexplored primary sources, Dardess details the rise and development of T'ai-ho village kinship, family lineage, landscape, agriculture, and economy. He follows its literati to positions of prominence in imperial government. This concentration on the history of one county over almost three centuries gives rise to an unusually sound and immediate understanding of how Ming society functioned and changed over time.
