The End of the City of Gold? Industry and Economic Crisis in an Italian Jewellery Town Michele Filippo Fontefrancesco, 2013-09-17 How does Europe's economic crisis affect the ways in which industry and entrepreneurship are experienced on a grassroots level? The book offers an answer to this question by exploring the Italian jewellery town of Valenza and the downturn of its principal industry. Through the experiences of its inhabitants, the study investigates the social role that jewellery production had in Valenza and provides an ethnographic account of the crisis the city endures. This analysis delves into the relationship between a community and its industry in order to understand the social and cultural challenges Italy and Europe will face in the future.

Jewellery Alba Cappellieri, 2018 The volume presents an extraordinary collection of jewels, jewellers and international maisons which, from the start of the twentieth century to the present day,

have mirrored changing taste worldwide. It is a global journey which takes us from France to Russia, from the United States to Italy, from Britain to Germany and from the Netherlands to Scandinavia. The book closes with the new millennium, with the intermingling of art and design and the introduction of new goldsmithery techniques like 3D printing and wearable technologies.
