- Feature and Narrative Storytelling for Multimedia Journalists** Duy Linh Tu, 2015-01-09 Feature and Narrative Storytelling for Multimedia Journalists is the first text that truly focuses on the multimedia and documentary production techniques required by professional journalists. Video and audio production methods are covered in rich detail, but more importantly, various storytelling techniques are explored in depth. Likewise, author Duy Linh Tu tackles the latest topics in multimedia storytelling, including mobile reporting, producing, and publishing, while also offering best practices for using social media to help promote finished products. Whether you're a student, a professional seeking new techniques, or simply looking to update your skills for the new digital newsroom, this book will provide you with the information and tools you need to succeed as a professional journalist. Integrated: The lessons in this book deftly combine traditional media production principles with storytelling craft. It is written with the perspective of modern professional journalists in mind. Practical: While rich with theory, this text is based on the real-world work of the author and several of his colleagues. It features Q&As with some of the best editors and video producers from top publications, including NPR, Vice, and Detroit Free Press, as well as profiles of leading video news organizations such as Frontline, Mediastorm, and Seattle Times. Proven: The author uses pedagogy from the world-renowned Columbia Journalism School as well as case studies from his own award-winning work. Interactive: The text is exercise- and drill-based, and the companion website provides multimedia examples and lesson files, as well as tutorials, case studies, and video interviews.
- Slides for Students** Gary D. Fisk, 2018-10-16 300 million Powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of Powerpoint and a mediocre student learning experience. To unleash the full potential of Powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that. Slides for Students is an open and honest discussion about Powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about Powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of Powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by Powerpoint.
- Pictures from a Drawer** Bruce Jackson, 2009-08-21 For more than forty years Bruce Jackson has been documenting—in books, photographs, audio recording, and film—inmates' lives in American prisons. In November, 1975, he acquired a collection of old ID photos while he was visiting the Cummins Unit, a state prison farm in Arkansas. They are published together for the first time in this remarkable book. The 121 images that appear here were likely taken between 1915 and 1940. As Jackson describes in an absorbing introduction, the function of these photos was not portraiture—their function was to “fold a person into the controlled space of a dossier.” Here, freed from their prison “jackets,” and printed at sizes far larger than their originals, these one-time ID photos have now become portraits. Jackson's restoration transforms what were small bureaucratic artifacts into moving images of real men and women. Pictures from a Drawer also contains an extraordinary description of everyday life at Cummins Prison in the 1950s, written originally by hand and presented to Jackson in 1973 by its author, a long-time inmate.

- 7 Rules of Achievement** Tom Terwilliger, 2010-03-01 “Terwilliger's latest personal growth and development system . . . will help you program for success the most important piece of equipment you own—your brain!” (Flex Magazine). “Tell me your goal and I will tell you why you are likely not to achieve it! The way in which you have pursued goals in the past has very likely created the exact opposite blueprint of the one needed to achieve what you want. Those negative blueprints may be exactly what are keeping you from living your dreams.” With these words, motivational speaker and author Tom Terwilliger lays out his success philosophy and challenges you to fulfill your long-held desires. 7 Rules of Achievement is a life-changing book that will help you finally create the new and empowering architecture needed to achieve whatever you want—including abundant wealth, a joyful and fulfilling relationship, a sexy, strong and healthy body, and the ability to lead and inspire. - Demoralized** Doris A. Santoro, 2021-02-09 Demoralized: Why Teachers Leave the Profession They Love and How They Can Stay offers a timely analysis of professional dissatisfaction that challenges the common explanation of burnout. Featuring the voices of educators, the book offers concrete lessons for practitioners, school leaders, and policy makers on how to think more strategically to retain experienced teachers and make a difference in the lives of students. Based on ten years of research and interviews with practitioners across the United States, the book theorizes the existence of a “moral center” that can be pivotal in guiding teacher actions and expectations on the job. Education philosopher Doris Santoro argues that demoralization offers a more precise diagnosis that is born out of ongoing value conflicts with pedagogical policies, reform mandates, and school practices. Demoralized reveals that this condition is reversible when educators are able to tap into authentic professional communities and shows that individuals can help themselves. Detailed stories from veteran educators are included to illustrate the variety of contexts in which demoralization can occur. Based on these insights, Santoro offers an array of recommendations and promising strategies for how school leaders, union leaders, teacher groups, and individual practitioners can enact and support “re-moralization” by working to change the conditions leading to demoralization.
- Info We Trust** Rj Andrews, 2019-01-03 How do we create new ways of looking at the world? Join award-winning data storyteller Rj Andrews as he pushes beyond the usual how-to, and takes you on an adventure into the rich art of informing. Creating Info We Trust is a craft that puts the world into forms that are strong and true. It begins with maps, diagrams, and charts — but must push further than dry defaults to be truly effective. How do we attract attention? How can we offer audiences valuable experiences worth their time? How can we help people access complexity? Dark and mysterious, but full of potential, data is the raw material from which new understanding can emerge. Become a hero of the information age as you learn how to dip into the chaos of data and emerge with new understanding that can entertain, improve, and inspire. Whether you call the craft data storytelling, data visualization, data journalism, dashboard design, or infographic creation — what matters is that you are courageously confronting the chaos of it all in order to improve how people see the world. Info We Trust is written for everyone who straddles the domains of data and people: data visualization professionals, analysts, and all who are enthusiastic for seeing the world in new ways. This book draws from the entirety of human experience, quantitative and poetic. It teaches advanced techniques, such as visual metaphor and data transformations, in order to create more human presentations of data. It also shows how we can learn from print advertising, engineering, museum curation, and mythology archetypes. This human-centered approach works with machines to design information for people. Advance your understanding beyond by learning from a broad tradition of putting things “in formation” to create new and wonderful ways of opening our eyes to the world. Info We Trust takes a thoroughly original point of attack on the art of informing. It builds on decades of best practices and adds the creative enthusiasm of a world-class data storyteller. Info We Trust is lavishly illustrated with hundreds of original compositions designed to illuminate the craft, delight the reader, and inspire a generation of data storytellers.
- Resonate** Nancy Duarte, 2013-07-02 Reveals the underlying story form of all great presentations that will not only create impact, but will move people to action. Presentations are meant to inform, inspire, and persuade audiences. So why then do so many audiences leave feeling like they've wasted their time? All too often, presentations don't resonate with the audience and move them to transformative action. Just as the author's first book helped presenters become visual communicators, Resonate helps you make a strong connection with your audience and lead them to purposeful action. The author's approach is simple: building a presentation today is a bit like writing a documentary. Using this approach, you'll convey your content with passion, persuasion, and impact. Author has a proven track record, including having created the slides in Al Gore's Oscar-winning An Inconvenient Truth. Focuses on content development methodologies that are not only fundamental but will move people to action. Upends the usual paradigm by making the audience the hero and the presenter the mentor. Shows how to use story techniques of conflict and resolution. Presentations don't have to be boring ordeals. You can make them fun, exciting, and full of meaning. Leave your audiences energized and ready to take action with Resonate.
