*Food and Urbanism* Susan Parham, 2015-02-26 Cities are home to over fifty percent of the world's population, a figure which is expected to increase enormously by 2050. Despite the growing demand on urban resources and infrastructure, food is still often overlooked as a key factor in planning and designing cities. Without incorporating food into the design process - how it is grown, transported, and bought, cooked, eaten and disposed of - it is impossible to create truly resilient and convivial urbanism. Moving from the table and home garden to the town, city, and suburbs, *Food and Urbanism* explores the connections between food and place in past and present design practices. The book also looks to future methods for extending the 'gastronomic' possibilities of urban space. Supported by examples from places across the world, including the UK, Norway, Germany, France, Spain, Portugal, Greece, Romania, Australia and the USA, the book offers insights into how the interplay of physical design and socio-spatial practices centred around food can help to

maintain socially rich, productive and sustainable urban space. Susan Parham brings together the latest research from a number of disciplines – urban planning, food studies, sociology, geography, and design – with her own fieldwork on a range of foodscapes to highlight the fundamental role food has to play in shaping the urban future.

**Legends of Vietnam** Nghia M. Vo, 2014-01-10 Legends are a mirror of the culture that creates them, a revealing lens through which to observe society, religion, history, and traditions. This volume explores Vietnamese legends from 1321 to today—tales of gods, spirits, ghosts, giants, extraordinary individuals, heroes, common people, and animals. It explains the mores, thought processes, and religions that formed the genesis of Vietnamese legends, traces the development of legends through time and space, and highlights the historical and social differences between northern and southern legends. Over time, this work shows, Vietnamese legends have evolved from a 14th century means of government propaganda to become a form of news, entertainment, and thought for the masses.

**Grand Expectations** James T. Patterson, 1996-04-18 Beginning in 1945, America rocketed through a quarter-century of extraordinary economic growth, experiencing an amazing boom that soared to unimaginable heights in the 1960s. At one point, in the late 1940s, American workers produced 57 percent of the planet's steel, 62 percent of the oil, 80 percent of the automobiles. The U.S. then had three-fourths of the world's gold supplies. English Prime Minister Edward Heath later said that the United States in the post-War era enjoyed the greatest prosperity the world has ever known. It was a boom that produced a national euphoria, a buoyant time of grand expectations and an unprecedented faith in our government, in our leaders, and in the American dream—an optimistic spirit which would be shaken by events in the '60s and '70s, and particularly by the Vietnam War. Now, in *Grand Expectations*, James T. Patterson has written a highly readable and balanced work that weaves the major political, cultural, and economic events of the period into a superb portrait of America from 1945 through Watergate. Here is an era teeming with memorable events—from the bloody campaigns in Korea and the bitterness surrounding McCarthyism to the assassinations of the Kennedys and Martin Luther King, to the Vietnam War, Watergate, and Nixon's resignation. Patterson excels at portraying the amazing growth after World War II—the great building boom epitomized by Levittown (the largest such development in history) and the baby boom (which exploded literally nine months after V-J Day)—as well as the resultant buoyancy of spirit reflected in everything from streamlined toasters, to big, flashy cars, to the soaring, butterfly roof of TWA's airline terminal in New York. And he shows how this upbeat, can-do mood spurred grander and grander expectations as the era progressed. Of course, not all Americans shared in this economic growth, and an important thread running through the book is an informed and gripping depiction of the civil rights movement—from the electrifying *Brown v. Board of Education* decision, to the violent confrontations in Little Rock, Birmingham, and Selma, to the landmark civil rights acts of 1964 and 1965. Patterson also shows how the Vietnam War—which provoked LBJ's growing credibility gap,

vast defense spending that dangerously unsettled the economy, and increasingly angry protests--and a growing rights revolution (including demands by women, Hispanics, the poor, Native Americans, and gays) triggered a backlash that widened hidden rifts in our society, rifts that divided along racial, class, and generational lines. And by Nixon's resignation, we find a national mood in stark contrast to the grand expectations of ten years earlier, one in which faith in our leaders and in the attainability of the American dream was greatly shaken. The Oxford History of the United States The Oxford History of the United States is the most respected multi-volume history of our nation. The series includes three Pulitzer Prize winners, a New York Times bestseller, and winners of the Bancroft and Parkman Prizes. The Atlantic Monthly has praised it as the most distinguished series in American historical scholarship, a series that synthesizes a generation's worth of historical inquiry and knowledge into one literally state-of-the-art book. Conceived under the general editorship of C. Vann Woodward and Richard Hofstadter, and now under the editorship of David M. Kennedy, this renowned series blends social, political, economic, cultural, diplomatic, and military history into coherent and vividly written narrative.

*Combat Talons in Vietnam* John Gargus, 2017-03-15 *Combat Talons in Vietnam* is a personal account of the first use of C-130s in the Vietnam War. It provides an insider's view of crew training and classified missions for this technologically advanced aircraft. Many covert missions over North Vietnam were successful, but one night, John Gargus, a mission planner, oversaw an operation in which the aircraft—carrying eleven crewmembers—failed to return from a nighttime mission. For thirty years, a search for the missing aircraft remained in progress. In the late 1990s, the Combat Talon veteran community at Hurlburt Field in Florida, still uncertain of the full story, decided to dedicate a memorial to the lost crew. When wartime mission records were declassified, Gargus embarked on a long journey of inquiry, research, and puzzle-solving to reconstruct the events of that mission and the fate of its crew. He discovered that the wreckage of the plane had been found in 1992 and that the remains of the crew were being held in Hawaii. Through numerous Freedom of Information Act requests, interviews, and site visits, Gargus sought to answer the question of why it took so long to find the wreckage and, more importantly, why the special operations command units were left uninformed. By 2000, the remains were relocated to a common grave at Arlington National Cemetery at last providing a measure of closure to family, friends, and comrades.

**Entwined with Vietnam** Theodore M. Hammett, 2022-07-26 In 1968, Theodore Hammett entered a war he believed was wrong, pressured by his father's threat to disown him if he withdrew from a Marine Corps officer candidate program. He hated the Vietnam War and soon grew to hate Vietnam and its people. As a supply officer at a field hospital uncomfortably near the DMZ, he employed thievery, bargaining and lies to secure supplies for his unit and retained his sanity with the help of alcohol, music and the promise of going home. In 2008, he returned to Vietnam for a five-year second tour to assist in improving HIV/AIDS policies and prevention programs in Hanoi. His memoir recounts his service at the height of the war, and how the country he detested became his second home.

*Culture, Ritual and Revolution in Vietnam* Shaun Kingsley Malarney, 2020-01-10 Originally published in 2002 *Culture, Ritual and Revolution in Vietnam* is a study of the history and consequences of the revolutionary campaign to transform culture and ritual in northern Vietnam. Based upon official documents and several years of field research in Thinh Liet Commune, a Red River delta community near Hanoi, it provides the first detailed account of the nature of revolutionary cultural reforms in Vietnam as how those reforms continue to animate contemporary socio-cultural life. The study examines the key foci of revolutionary cultural change, such as the articulation of a new moral system, the attempts to eliminate explanations that invoke supernatural causality, the creation of socialist weddings and funerals, and the development of innovation ties to commemorate war dead. By examining debates over culture, ritual, and morality that have emerged between residents, notably between men and women, and party members and non-party members, the study shows how ideas and values that preceded the revolution have entered into a creative

dialogue with those that were articulated by the revolution, and how this has produced an innovative set of ritual and other practices, particularly since the relaxation of the cultural reform agenda in the post-1986 period.
