The Health of Vietnam Anna G. Shillabeer,2015-09-30 This book presents a detailed overview of the healthcare environment in Viet Nam. Given the general lack of understanding of healthcare in the Vietnamese context, it discusses the background and history, current status and the future of healthcare in the country. The first part of the book provides a summary of the current state of Vietnamese healthcare, incorporating discussions on the training and professional practice environment and the development, implementation and impact of national insurance policies. In addition, it highlights the cultural aspects of health provision and behaviours, technology integration and health trends from a number of angles based on standard global reporting dimensions. The second part elaborates on the 5-year strategic plan for national healthcare management and the top 5 barriers to meeting these planned objectives. It documents key investors and project objectives and outcomes, as well as the top 10 health issues in Vietnam including an overview of national and international initiatives to tackle these issues, addressing financial and social burdens in the process. In the third part, the book outlines the opportunities and barriers for improvement in healthcare outcomes for Viet Nam, providing evidence to support future work by local or international researchers. It is a fundamental text for anyone looking to work or research in the Vietnamese healthcare environment and provides an outline for project planning and targeted programs of work to achieve measureable improvements in Viet Nam.

The Measure of America Sarah Burd-Sharps,Kristen Lewis,Eduardo Borges Martins,2008 Introduces the American Human Development Index, which provides a single measure of well-being for all Americans, disaggregated by state and congressional district, as well as by gender, race, and ethnicity. The Index rankings of the 50 states and 436 congressional districts reveal disparities in the health, education, and living standards of different groups.

Clinical Epidemiology of Chronic Liver Diseases Robert J. Wong,Robert G. Gish,2018-10-24 This book emphasizes the clinical epidemiology of chronic liver diseases with a specific focus on the methodology of the discussed studies. The whole spectrum of liver diseases is covered, from chronic hepatitis B and C, to hepatocellular carcinoma, alcoholic and non-alcoholic fatty liver diseases and autoimmune and cholestatic liver diseases. Readers will find the most up-to-date information on clinical epidemiology of hepatology, and will also be able to learn about important methodology and biostatistics information. Each chapter contains a summary table at the end of each chapter that highlights the most relevant landmark studies, their main outcomes and the unique features of the methodology. The book will appeal to both practicing clinicians as well as clinical research investigators. In addition, this would likely be of interest to medical school or public health school students to learn about hepatology epidemiology, but also some specific fundamentals of clinical research and clinical epidemiology.

Clinical Virology Douglas D. Richman,Richard J. Whitley,Frederick G. Hayden,2016-12-01 The essential reference of clinical virology Virology is one of the most dynamic and rapidly changing fields of clinical medicine. For example, sequencing techniques from human specimens have identified numerous new members of several virus families, including new polyomaviruses, orthomyxoviruses, and bunyaviruses. Clinical Virology, Fourth Edition, has been extensively revised and updated to incorporate the latest developments and relevant research. Chapters written by internationally recognized experts cover novel viruses, pathogenesis, epidemiology, diagnosis, treatment, and prevention, organized into two major sections: Section 1 provides information regarding broad topics in virology, including immune responses, vaccinology, laboratory diagnosis, principles of antiviral therapy, and detailed considerations of important organ system manifestations and syndromes caused by viral infections. Section 2 provides overviews of specific etiologic agents and discusses their biology, epidemiology, pathogenesis of disease causation, clinical manifestations, laboratory diagnosis, and management. Clinical Virology provides the critical information scientists and health care professionals require about all aspects of this rapidly evolving field.

Comprehensive coverage of individual toxic elements, including Asbestos Alar Lead Mercury Coverage of hazardous material groups, such as Pesticides Food additives Nitrogen compounds More general articles, such as Evaluation and testing of carcinogens Transport of pollutants Inhalation toxicology

Innovations in Land, Water and Energy for Vietnam's Sustainable Development Mariano Anderle,2020-11-28 This book presents recent innovative trends in land, water and energy management in Vietnam. Presenting the main projects and outcomes of a close collaboration between Italian and Vietnamese researchers in the last three

years, the book is divided into three main sections: environment, climate change and land management in Vietnam; energy for Vietnam; and cities and utilities in Vietnam. The first section focuses on water systems, including rivers and seacoasts, and on new growing methods for more sustainable agriculture. The second section addresses energy and wastewater. The country's rapid growth is a major challenge in terms of reinforcing the electrical infrastructures, and as such this section offers an overview of the government's planned measures and their impact on the Vietnamese power system. The third section highlights cities and utilities in the context of increasing urbanization, exploring the urban morphology of the Vietnamese metropolis, particularly Hanoi and Ho Chi Minh City.

Socialist Economic Development in the 21st Century Alberto Gabriele, Elias Jabbour, 2022-03-03 Over a hundred years after the first socialist revolution broke the global monopoly of capitalism, a new class of socialist-oriented socioeconomic development is coming to the fore. Capitalism is still dominant worldwide, although its hegemony is no longer undisputed, and humankind is now faced with a key existential challenge. This book proposes an alternative path to overcoming the worldwide crisis of globalized capitalism. It offers a novel, balanced and historically rooted interpretation of the successes and failures of socialist economic construction throughout the last century. The authors apply a multidisciplinary, holistic and purpose-based methodology to draw basic lessons from stylized facts, emerging in different areas of knowledge, ranging from political economy to biology, and from key national socioeconomic experiences, with a particular focus on China. The book is divided into three parts. The first is mainly theoretical and general in nature, identifying the major contributions bequeathed by the hard sciences to their social counterparts. Consistent with these findings, the authors offer a stylized interpretation of the contemporary state-of-the-art of the debate on the core concepts of economic science and advance a few elementary theories about what socialism in the 21st century could look like. The second and third parts analyze and discuss the core features of a few select experiences, which have evolved in certain countries since 1917, some of which are still unfolding. The book will find an audience among academics, researchers and students in the fields of economics, political science, history, and geography, as well as, policy makers, particularly in developing countries.

MANAGING SEVA (SELFLESS SERVICE) IN TIMES OF GREAT CHANGE Rahul M. Jindal, MD, Ph.D, 2015-11-13 The first part of the book gives practical aspects of performing seva in the USA, India and Guyana, South America. I give case histories from my own experience and how I navigated the turbulent waters to deliver what we set out to accomplish. I hope that our team's work will motivate others to understand the difficulties and find solutions to fulfilling the goal of seva. At the end, we could not achieve anything without the help of dedicated team members many of whom gave up their vacations and willingly gave their money and energy to make a difference. The second part of the book examined 5 case studies of our work dealing with kidney and corneal transplants in Guyana, blood and bone marrow drives in the USA under the auspices of the Hindu Mandir Executive Committee, distance learning in the UK and the Global Energy Parliament, Kerala, India. The third part of the book gives cautionary lessons in managing seva projects across the world. The fourth part of the book gives theoretical aspects of seva, which include social networks in management of complex missionary projects, the use of social networking technology in the promotion and scaling up of complex global health initiatives, the growing phenomenon of "voluntourism" and Distance Learning. Our case histories represent a variety of situations across continents. Having initiated and carried these projects from scratch to fruition has given us an insight into the many issues others may face when they initiate their own projects. We experienced frustration at many points in the trajectory of our projects; however, we persevered and perhaps achieved modest success. We should confess that we thought of abandoning and giving up at multiple stages of our projects, however, we were reminded of the beneficiaries and continued against many odds and obstacles. Some of these could have been prevented but others were inevitable.

Democracy, Dictatorship and Development Georg Sørensen, 2016-07-27 Questions regarding the economic consequences of various forms of regime have puzzled development researchers for many years. This book examines the theoretical debate as a starting-point for in-depth case-studies of four countries: India, China, Taiwan and Costa Rica. The case studies are used as a basis for a number of new conclusions about the circumstances under which a specific form of regime has certain consequences for economic development. The implications of these results for other third-world countries, democratic and authoritarian, are addressed in the final chapter.

High Definition Television Philip J. Cianci, 2014-01-10 The 40-year history of high definition television technology is traced from initial studies in Japan, through its development in Europe, and then to the United States, where the first all-digital systems were implemented. Details are provided about advances in HDTV technology in Australia and Japan, Europe's introduction of HDTV, Brazil's innovative use of MPEG-4 and China's terrestrial standard. The impact of HDTV on broadcast facility conversion and the influx of computer systems and information technology are described, as well as the contributions of the first entrepreneurial HD videographers and engineers. This thoroughly researched volume highlights several of the landmark high-definition broadcasts from 1988 onward, includes input gathered from more than 50 international participants, and concludes with the rollout of consumer HDTV services throughout the world.

Economic Management and Transition Towards a Market Economy Anthony T.H. Chin, 1996 Much attention has been focused in recent years on the transformation of the economies of Eastern and Central Europe and the former Soviet Union. However, a growing demand for policy advice, technical assistance and expertise is also coming from Asian reforming countries such as China, Mongolia, Vietnam, Laos and Cambodia. In addition, business communities abroad are increasingly interested in exploring investment and marketing opportunities in these reforming countries. Such developments are too important to overlook or ignore. The transformation of socialist economies towards market-based systems entails an unusually wide range of problems. Studies of related topics are complicated by the speed of the changes and the lack of clear historical precedents. Although the structural features of Asian reforming economies are in important ways different from those of the Eastern European economies, all socialist economies share similar fundamental conditions on the eve of economic reform which raise a similar set of reform issues. This volume brings together a rich collection of expertise and information in an attempt to shed some light on the transitional process in Asia. The contributions are by no means exhaustive. However, they provide the reader and analyst with an excellent starting point to the problems and prospects which are specific to Asian transforming

economies.
