The Mind of a Journalist Jim Willis, 2009-07-30 Written by veteran journalist and noted professor Jim Willis, with an epilogue by Marilyn Thomsen, this book introduces journalistic decision-making into the classroom, alongside discussion of reporting and writing techniques. Students peer inside the minds of a cross-section of print, broadcast, and online journalists by way of exclusive interviews and additional research that provide a deep, broad glimpse into how they perceive themselves, their world, and their craft. Ultimately, this provocative text provides added insights into how journalists think and why they do what they do. Features and Benefits Original interviews with contemporary journalists at varying career stages. Offers a rarely seen, inside look at the world of journalists from media outlets such as the Los Angeles Times, the Boston Globe, CNN, the Memphis Commercial-Appeal, KUSA Television in Denver, and The Oklahoman. Anecdotes involving how journalists work. Translates abstract thinking into the reality of everyday journalism. Interviews with several war reporters. Portrays the impact of covering war on those reporting from the field. An example of how different journalists approach traumatic stories such as 9/11, the Oklahoma City bombing, and Hurricane Katrina. Illuminates different orientations to conveying truth and dealing with ethical dilemmas involved in such disaster coverage. Seasoned journalists examine the following areas Factors that lure young people into journalism as a career The stance journalists take toward the world they are assigned to cover Ethical dilemmas How close to get to a story or how far to distance themselves from it The socialization of journalists and the role their own personal ideologies may play in their work as reporters and editors How one's faith might influence the coverage of a story The mixing of news and entertainment The Mind of a Journalist is an appropriate and innovative supplement for a variety of media studies courses, including Introduction to Journalism, News Writing and Reporting, Advanced Reporting, Journalism and Society, and Ethics, among many others.

In the News Jerry W. Knudson, 2000 This book provides rare and candid insights by those who experienced the reality of meeting a deadline and the pressures of space limitations and access to information. Knudson has crafted a seamless narrative of journalism in America by tying together his own keen commentary on the evolution of news reporting with brief excerpts from those who actually did the reporting, from colonial times through the Monica Lewinsky scandal. Students will hear what the following notable journalists had to say about their craft and the coverage of contemporary events: Benjamin Franklin's ambivalence about the colonial press: extolling the 'watchdog' concept of newspapers, while abhorring the rough-and-tumble personal journalism of his day; Frederick Douglass's vivid and literary description of his 1847 interview with John Brown; Ida B. Wells' account of how her small newspaper, a beacon for many African Americans, was destroyed by an angry mob in 1892; Ida Tarbell's description of her meeting with John D. Rockefeller; Richard Harding Davis's 1911 Collier's excerpt, in which he laments the shift from the resourceful and ingenious traditional correspondent to the thundering mob of reporters who descended on any event of significance; Martha Gellhorn's experiences as a journalist who covered World War II for Collier's; Ernie Pyle's portrait of what it was like to be a correspondent slogging with the troops through the Italian campaign in World

War II; David Brinkley recounting what it was like to be a veteran reporter during the JFK assassination and funeral; The Washington Post's Vice President and Executive Editor Ben Bradlee discussing the impact of Watergate on news reporting; Molly Ivins, a Texas journalist whose first collection of columns remained on The New York Times bestseller list for over 12 months, writes about media critics

My View of the World Erwin Schrödinger, 2008-11-27 A Nobel prize winner, a great man and a great scientist, Erwin Schrödinger has made his mark in physics, but his eye scans a far wider horizon: here are two stimulating and discursive essays which summarize his philosophical views on the nature of the world. Schrödinger's world view, derived from the Indian writings of the Vedanta, is that there is only a single consciousness of which we are all different aspects. He admits that this view is mystical and metaphysical and incapable of logical deduction. But he also insists that this is true of the belief in an external world capable of influencing the mind and of being influenced by it. Schrödinger's world view leads naturally to a philosophy of reverence for life.

The Economist's View of the World Steven E. Rhoads, 1985-05-23 This book explains and assesses the ways in which micro, welfare and benefit-cost economists view the world of public policy. In general terms, microeconomic concepts and models can be seen to appear regularly in the work of political scientists, sociologists and psychologists. As a consequence, these and related concepts and models have now had sufficient time to influence strongly and to extend the range of policy options available to government departments. The central focus of this book is the 'cross-over' from economic modelling to policy implementation, which remains obscure and uncertain. The author outlines the importance of a wider knowledge of microeconomics for improving the effects and orientation of public policy. He also provides a critique of some basic economic assumptions, notably the 'consumer sovereignty principle'. Within this context the reader is in a better position to understand the 'marvellous insights and troubling blindnesses' of economists where often what is controversial politically is not so

controversial among economists.

Asian Economic Integration Report 2021 Asian Development Bank,2021-02-01 The coronavirus disease (COVID-19) pandemic disrupted both supply and demand sides of an interconnected world economy in 2020. Asia and the Pacific was not immune as lockdowns and travel and trade restrictions affected nearly all aspects of cross-border economic activity. This publication examines the initial impact on trade, investment, finance, and people's mobility across the region as the pandemic struck. It looks at how regional economies individually or collectively respond to the crisis by, for example, leveraging rapid technological progress and digitalization as well as increasing services trade to reconnect and recover. The theme chapter focuses on digital platforms and how they can accelerate digital transformation across the region.

Standard Handbook of Video and Television Engineering Jerry C. Whitaker,K. Blair Benson,2003-02-24 Since its publication in February of 2000, the Standard Handbook of Video and Television Engineering has become its field's standard reference, the one book every engineer and technician in broadcasting needs to own. By carefully tracking the field's movement from monolithic broadcast stations into a complex web of smaller stations and video producers, this book has stayed relevant while its competition has fallen by the wayside. This new edition features over 50% new material, most crucially multiple chapters on video networking technologies, new digital television and data broadcast standards (for both the US and Europe), and updates on every aspect of video and broadcast equipment and protocols.

The Global Findex Database 2017 Asli Demirguc-Kunt,Leora Klapper,Dorothe Singer,Saniya Ansar,2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-

level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalindex.
