Strange Country Mark Dapin, 2008-11-01 This book is about the people I met as I crisscrossed Australia by train and plane and L-plated car: the undefeated dreamers and wild-hearted romantics, the obsessed hobbyists and beautiful failures. It is about heroes and legends, illusions, delusions and hope, and one or two men with shit for brains who ought to be locked up. As anyone who's ever read Mark Dapin's column and features in Good Weekend knows, he's an immensely funny, acute and vivid observer of Australian life. In *Strange Country*, he takes us on a journey through a very different Australia - a country that's eccentric, puzzling, big-hearted, small-minded, nostalgic and sometimes just plain mad. From the last travelling boxing tent to feral urban sewer rats to Vietnam Veteran bikies and the annual Parkes Elvis Festival, his writing illuminates the stranger side of Australian life in a travel book like no other.

The Fables of La Fontaine Jean de La Fontaine, 2021-01-01 First published in the year 1886, the present book titled 'The Fables of La Fontaine' is a collection of Jean de La Fontaine's stories accompanied by his short bio and a few essays about him.

Car Business 101 Max Zanan, 2018-12-24 Automotive retail is at crossroads--either it gets better or becomes extinct. Consumers are dissatisfied with the sales process in brick and mortar dealerships and that is the driving force behind the rise of Carvana and other industry disrupters. However, it is not too late to fix the way car dealerships operate and improve their reputation. *Car Business 101* highlights irrational and counterproductive behavior that car dealers engage in on a daily basis. If you own or work in a car dealership it will be easy to recognize insanity that goes on in Sales, F&I, BDC, HR, and Parts

& Service departments. This book offers a fresh perspective and plenty of practical solutions that should be implemented as soon as possible. It is informative and entertaining at the same time. It is a must read for dealer principals, dealership employees, and vendors that service car dealers.

Algebra Through Practice: Volume 4, Linear Algebra T. S. Blyth,E. F. Robertson,1985-08-15 Problem-solving is an art central to understanding and ability in mathematics. With this series of books, the authors have provided a selection of worked examples, problems with complete solutions and test papers designed to be used with or instead of standard textbooks on algebra. For the convenience of the reader, a key explaining how the present books may be used in conjunction with some of the

major textbooks is included. Each volume is divided into sections that begin with some notes on notation and prerequisites. The majority of the material is aimed at the students of average ability but some sections contain more challenging problems. By working through the books, the student will gain a deeper understanding of the fundamental concepts involved, and practice in the formulation, and so solution, of other problems. Books later in the series cover material at a more advanced level than the earlier titles, although each is, within its own limits, self-contained.
