Space Utopia Vincent Fournier,2019-03-12 This unique collection of photographs features over ten years of collaborations with the most important space and research centers in the world, resulting in a one-of-a-kind story of the human race to the stars. Vincent Fournier's visionary photographs provide an imaginative look at space exploration by merging fantasy with reality in images of rockets, otherworldly landscapes, research facilities, and cosmonauts. To produce these extraordinary images, Fournier has collaborated with the world's major space centers and astronomical observatories, including NASA, the European Space Agency, the Russian space agency, and the European Southern Observatory. Readers are given access to confidential locations and projects such as the NASA SLS rocket. Fournier's artistic vision creates a unique look at the history of space exploration, from the early Sputnik and Apollo programs to the future Mission on Mars. The images invite us to focus on our perceptions of space and time. Fournier questions our past and future utopias--what are our expectations for the future and has the future already happened? The evocative images document and archive while also exploring humankind's myths and fantasies about the future.

On the Origin of Species Illustrated Charles Darwin,2020-09-30 On the Origin of Species (or, more completely, On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life), [3] published on 24 November 1859, is a work of scientific literature by Charles Darwin which is considered to be the foundation of evolutionary biology.[4] Darwin's book introduced the scientific theory that populations evolve over the course of generations through a process of natural selection. It presented a body of evidence that the diversity of life arose by common descent through a branching pattern of evolution. Darwin included evidence that he had gathered on the Beagle expedition in the 1830s and his subsequent findings from research, correspondence, and experimentation

Visions of Savage Paradise Rebecca Parker Brienon,2006 Visions of Savage Paradise is the first major book-length study of seventeenth-century Dutch artist Albert Eckhout to be published in nearly seventy years. Eckhout, who was court painter to the colonial governor of Dutch Brazil, created life-size paintings of Amerindians, Africans, and Brazilians of mixed race in support of the governor's project to document the people and natural history of the colony. In this study, Rebecca Parker Brienon provides a detailed analysis of Eckhout's works, framing them with discussions of both their colonial context and contemporary artistic practices in the Dutch republic.
