Demography: Analysis and Synthesis, Four Volume Set Graziella Caselli,Jacques Vallin,Guillaume Wunsch,2006-01-03 This four-volume collection of over 140 original chapters covers virtually everything of interest to demographers, sociologists, and others. Over 100 authors present population subjects in ways that provoke thinking and lead to the creation of new perspectives, not just facts and equations to be memorized. The articles follow a theory-methods-applications approach and so offer a kind of one-stop shop that is well suited for students and professors who need non-technical summaries, such as political scientists, public affairs specialists, and others. Unlike shorter handbooks, *Demography: Analysis and Synthesis* offers a long overdue, thorough treatment of the field. Choosing the analytical method that fits the data and the situation requires insights that the authors and editors of *Demography: Analysis and Synthesis* have explored and developed. This extended examination of demographic tools not only seeks to explain the analytical tools themselves, but also the relationships between general population dynamics and their natural, economic, social, political, and cultural environments. Limiting themselves to human populations only, the authors and editors cover subjects that range from the core building blocks of population change--fertility, mortality, and migration--to the consequences of demographic changes in the biological and health fields, population theories and doctrines, observation systems, and the teaching of demography. The international perspectives brought to these subjects is vital for those who want an unbiased, rounded overview of these complex, multifaceted subjects. Topics to be covered: * Population Dynamics and the Relationship Between Population Growth and Structure * The Determinants of Fertility * The Determinants of Mortality * The Determinants of Migration * Historical and Geographical Determinants of Population * The Effects of Population on Health, Economics, Culture, and the Environment * Population Policies * Data Collection Methods and Teaching about Population Studies * All chapters share a common format * Each chapter features several cross-references to other chapters * Tables, charts, and other non-text features are widespread * Each chapter contains at least 30 bibliographic citations

Minorities and Representation in American Politics Rebekah Herrick, 2016-01-29 Minorities and Representation in American Politics is the first book of its kind to examine underrepresented minorities with a framework based on four types of representation—descriptive, formalistic, symbolic, and substantive. Through this lens, author Rebekah Herrick looks at race, ethnic, gender, and sexual minorities not in isolation but synthesized within every chapter. This enables readers to better recognize both the similarities and differences of groups' underrepresentation. Herrick also applies her unique and constructive approach to intergroup cooperation and intersectionality, highlighting the impact that groups can have on one another.

The Futures of Legal Education and the Legal Profession Hilary Sommerlad, Sonia Harris-Short, Steven Vaughan, Richard Young, 2015-03-26 We are currently witnessing an unprecedented transformation in the legal profession and legal education. The Legal Services Act 2007 and the Legal Aid, Sentencing and Punishment of Offenders Act 2012 have both enabled and necessitated dramatic structural changes to the profession, as well as impacting on its ethos and ethicality. The recent Legal Education and Training Review (LETR) promises similarly dramatic change to the provision of legal education, reflecting the shifting landscape of both the legal professional market and Higher Education in general. These transformative changes bring both exciting opportunities and challenges with which everyone involved in the law – from University lecturers, to Senior Partners in leading law firms, to the judiciary – must grapple. This edited collection comprises a selection of papers presented at the 2nd conference of CEPLER, Birmingham Law School's Centre for Professional Legal Education and Research. The aim of the Conference, and thus this collection, was to bring together leading academic scholars, senior figures from professional practice, policy-makers, and representatives of the regulatory authorities, to reflect on the key issues arising from this transformative moment. As such, this volume of essays covers diverse ground, from curriculum development to professional theory, enriched and enhanced by the range of backgrounds and perspectives of its contributors.
