**Carolinian-English Dictionary** Frederick H. Jackson, Jeffrey C.

Marck, 2019-03-31 Carolinian is a member of the Trukic subgroup of the Micronesian group of Oceanic languages. This is the first English dictionary of the three Carolinian dialects spoken by descendants of voyagers who migrated from atolls in the Central Caroline Islands to Saipan in the Northern Mariana Islands. This dictionary provides English definitions for almost 7,000 Carolinian entries and an English-Carolinian finder list. A special effort was made to include culturally important words, particularly those related to sailing, fishing, cooking, house building, traditional religion, and family structure. With this work, the compilers also establish an acceptable standard writing system with which to record the Carolinian language.

Friction Anna Lowenhaupt Tsing, 2011-10-23 A wheel turns because of its encounter with the surface of the road; spinning in the air it goes nowhere. Rubbing two sticks together produces heat and light; one stick alone is just a stick. In both cases, it is friction that produces movement, action, effect. Challenging the widespread view that globalization invariably signifies a clash of cultures, anthropologist Anna Tsing here develops friction in its place as a metaphor for the diverse and conflicting social interactions that make up our contemporary world. She focuses on one particular zone of awkward engagement--the rainforests of Indonesia--where in the 1980s and the 1990s capitalist interests increasingly reshaped the landscape not so much through corporate design as through awkward chains of legal and illegal entrepreneurs that wrested the land from previous claimants, creating resources for distant markets. In response, environmental movements arose to defend the rainforests and the communities of people who live in them. Not confined to a village, a province, or a nation, the social drama of the Indonesian rainforest includes local and national environmentalists, international science, North American investors, advocates for Brazilian rubber tappers, UN funding agencies, mountaineers, village elders, and urban students, among others--all combining in unpredictable, messy misunderstandings, but misunderstandings that sometimes work out.

Providing a portfolio of methods to study global interconnections, Tsing shows how curious and creative cultural differences are in the grip of worldly encounter, and how much is overlooked in contemporary theories of the global.

**The Roman Empire and the Indian Ocean** Raoul McLaughlin, 2014-09-11 This study of ancient Roman shipping and trade across continents reveals the Roman Empire's far-reaching impact in the ancient world. In ancient times, large fleets of Roman merchant ships set sail from Egypt on voyages across the Indian Ocean. They sailed from Roman ports on the Red Sea to distant kingdoms on the east coast of Africa and southern Arabia. Many continued their voyages across the ocean to trade with the rich kingdoms of ancient India. Along these routes, the Roman Empire traded bullion for valuable goods, including exotic African products, Arabian incense, and eastern spices. This book examines Roman commerce with Indian kingdoms from the Indus region to the Tamil lands. It investigates contacts between the Roman Empire and powerful

African kingdoms, including the Nilotic regime that ruled Meroe and the rising Axumite Realm. Further chapters explore Roman dealings with the Arab kingdoms of southern Arabia, including the Saba-Himyarites and the Hadramaut Regime, which sent caravans along the incense trail to the ancient rock-carved city of Petra. The first book to bring these subjects together in a single comprehensive study, *The Roman Empire and the Indian Ocean* reveals Rome's impact on the ancient world and explains how international trade funded the legions that maintained imperial rule.

**The Treasure Of The Lake** Sir H Rider Haggard, 2020-03-03 Now when I grow old it becomes every day more clear to me, Allan Quatermain, that each of us is a mystery living in the midst of mysteries, bringing these with us when we are born and taking them away with us when we die; doubtless into a land of other and yet deeper mysteries. At first, while we are quite young, everything seems very clear and simple. There is a male individual called Father and a female called Mother who, between them, have made us a present to the world, or of the world to us, whichever way you like to put it, apparently by arrangement with the kingdom of heaven; at least that is what we are taught. There are the sun, the moon, and the stars above us and the solid earth beneath, there are lessons and dinner and a time to get up and a time to go to bed-in short there are a multitude of things, all quite obvious and commonplace, which may be summed up in three words, the established order, in which, by the decree of Papa and Mamma and the heavens above, we live and

move and have our being. Then the years go by, the terrible, remorseless years that bear us as steadily from the cradle to the grave as a creeping glacier bears a stone. With every one of them, after the first fifteen or so when we become adult, or in some instances earlier if we chance to be what is called rather unusual, a little piece of the curtain is rolled up or a little hole is widened in the veil, and beneath that curtain, or through that enlarging hole, we see the mysteries moving in the dusk beyond. So swiftly do they come and go, and so dark is the background, that we never discern them clearly. There, if time is given to us to fix them in our minds, they appear; for a moment they are seen, then they are gone, to be succeeded by others even yet more wondrous, or perhaps more awful.
