**The New California Wine** Jon Bonné, 2013-11-05 A comprehensive guide to the must-know wines and producers of California's new generation, and the story of the iconoclastic young winemakers who have changed the face of California viniculture in recent years. The New California Wine is the untold story of the California wine industry: the young, innovative producers who are rewriting the rules of contemporary winemaking; their quest to express the uniqueness of California terroir; and the continuing battle to move the state away from the overly-technocratic, reactionary practices of its recent past. Jon Bonné writes from the front lines of the California wine revolution, where he has access to the stories, philosophies, and techniques of top producers. In this groundbreaking debut, Bonné paints an unflinching portrait of the current state of the industry: its strengths and shortcomings, its essential wines and those not worth pursuing. Lush full-color photographs, as well as a region-by-region tour of some of California's lesser-known growing areas, reveal the people and places behind the bottles. Finally, a comprehensive purchasing reference lists all the must-know producers and their

best wines, making The New California Wine an essential resource for finding and buying the very best the state has to offer.

**Royal Taste** Ms Daniëlle De Vooght,2013-07-28 The explicit association between food and status was, academically speaking, first acknowledged on the food production level. He who owned the land,

possessed the grain, he who owned the mill, had the flour, he who owned the oven, sold the bread. However, this conceptualization of power is dual; next to the obvious demonstration of power on the production level is the social significance of food consumption. Consumption of rich food—in terms of quantity and quality —was, and is, a means to show one's social status and to create or uphold power. This book is concerned with the relationship between food consumption, status and power. Contributors address the 'old top' of society, and consider the way kings and queens, emperors and dukes, nobles and aristocrats wine and dine in the rapidly changing world of the late eighteenth and nineteenth centuries, where the bourgeoisie and even the 'common people' obtained political rights, economic influence, social importance and cultural authority. The book questions the role of food consumption at courts and the significance of particular foodstuffs or ways of cooking, deals with the number of guests and their place at the table, and studies the way the courts under consideration influenced one another. Topics include the role of sherry at the court of Queen Victoria as a means of representing middle class values, the use of the truffle as a promotional gift at the Savoy court, and

the influence of European culture on banqueting at the Ottoman Palace. Together the volume addresses issues of social networks, prestige, politics and diplomacy, banquets and their design, income and spending, economic aims, taste and preference, cultural innovations, social hierarchies, material culture, and many more social and cultural issues. It will provide a useful entry into food history for scholars of court culture and anyone with an interest in modern cultural history.
