Wine Markets Michael T. Hannan, Giacomo Negro, 2022-02-01 The world of wine encompasses endless variety. Consumers want to understand what makes one bottle of wine different from another; vintners need to know how to communicate what makes their product distinctive. Drawing on a decade of fieldwork in Italy and France as well as interviews with critics and analysis of market data, Giacomo Negro, Michael T. Hannan, and Susan Olzak provide an unprecedented sociological account of the dynamics of wine markets. They demonstrate how the concepts of genre and collective identity illuminate producers' choices, whether they are selling traditional or nonconventional wines. Winemakers face a fundamental choice: produce an existing style and develop an identity as a proponent of tradition or embrace foreign, new, or emerging categories and be seen as an innovator. To explain this dilemma, Negro, Hannan, and Olzak develop the notion of wine genres, or shared understandings among producers and the public. Genres emerge through the social structure of production, including factors such as group solidarity, social cohesion, and collective action, and become key reference points for critics and consumers. *Wine Markets* features case studies of the creation of a modern wine genre and a countermovement against modernism in Piedmont, the failure of producers of Brunello di Montalcino in Tuscany to define a clear collective identity, and the emergence of the biodynamic wine movement in Alsace. This book not only offers keen sociological insight into the wine world but also sheds new light on the logic of markets and organizations more broadly.

Native Wine Grapes of Italy Ian D'Agata, 2014-05-16 Mountainous terrain, volcanic soils, innumerable microclimates, and an ancient culture of winemaking influenced by Greeks, Phoenicians, and Romans make Italy the most diverse country in the world of wine. This diversity is reflected in the fact that Italy grows the largest number of native wine grapes known, amounting to more than a quarter of the world's commercial wine grape types. Ian D'Agata spent thirteen years interviewing producers, walking vineyards, studying available research, and tasting wines to create this authoritative guide to Italy's native grapes and their wines. Writing with great enthusiasm and deep knowledge, D'Agata discusses more than five hundred different native Italian grape varieties, from Aglianico to Zibibbo. D'Agata provides details about how wine grapes are identified and classified, what clones are available, which soils are ideal, and what genetic evidence tells us about a variety's parentage. He gives historical and anecdotal accounts of each grape variety and describes the characteristics of wines made from the grape. A regional list of varieties and a list of the best producers provide additional guidance. Comprehensive, thoroughly researched, and engaging, this book is the perfect companion for anyone who wants to know more about the vast enological treasures cultivated in Italy.

Let's Eat Italy! François-Régis Gaudry, 2021-11-09 The ultimate book on every aspect of Italian food—inspiring, comprehensive, colorful, extensive, joyful, and downright encyclopedic.

Sustainability of the Agri-food System: Strategies and Performances Bernardo De Gennaro, Gianluca Nardone, 2014-11-01 The 2013 annual conference of the Italian Society of Agricultural Economics (SIDEA) has been held in the attractive scenario of the city of Lecce under the organization of three different Universities of the Apulia Region (Università degli Studi di Bari, Università degli Studi di Foggia and Università del Salento). The scientific theme of the 50th SIDEA Conference has been “Sustainability of the agri-food system: Strategies and Performances” (Sostenibilità del Sistema Agroalimentare: strategie e performance). With such a topic, the SIDEA intended to cope with the challenges coming from a growing demand of food in a world where critical natural resources such as water, energy and land are becoming increasingly scarce and climate change is posing credible

threats. The agri-food system and the broader bio-based economy are, in fact, human activities where the classic dimensions of sustainability (ecological, economic and social) are gaining a striking weight often showing evidence of frictions. Despite a significant growth in food production over the past century, today one of the most important challenges facing agro-food system is how to feed a growing population.

Chinese for Specific and Professional Purposes Hongyin Tao, Howard Hao-Jan Chen, 2019-08-20 This book, likely the first of its kind in the English language, explores Chinese for specific and professional purposes (CSP) in terms of theorizing and developing practical applications for language teaching and learning. While research in language for specific purposes is thriving for languages such as English, there has been comparatively little such research conducted for Chinese. This volume attempts to fill the gap by bringing together practitioners from a broad international scholarly community, who share common interests yet diverse orientations. Seventeen papers are included, and address four broad thematic categories: (1) academic Chinese, (2) business Chinese, (3) Chinese for medicine and health care, and (4) Chinese for other broadly defined services and industries (diplomacy, tourism, wine-tasting, etc.). Representing the state of the art in CSP research, the book offers an indispensable guide for anyone interested in theoretical and practical issues in this area of applied Chinese language studies.

Slow Food Carlo Petrini, 2012-05-18T06:00:00+02:00 Nessun altro che non fosse Petrini poteva raccontare con altrettanta precisione di dati e documenti avvio e ascesa del fenomeno dello Slow Food, ormai internazionalmente consolidato. Questo libro in realtà è un manuale di sopravvivenza umana. Folco Portinari, Tuttolibri «Contro la follia universale della Fast Life, bisogna scegliere la difesa del tranquillo piacere materiale. Contro coloro, e sono i più, che confondono l'efficienza con la frenesia, proponiamo il vaccino di un'adeguata porzione di piaceri sensuali assicurati, da praticarsi in lento e prolungato godimento. Iniziamo proprio a tavola con lo Slow Food, contro l'appiattimento del Fast Food riscopriamo la ricchezza e gli aromi delle cucine locali. Se la Fast Life in nome della produttività ha modificato la nostra vita e minaccia l'ambiente e il paesaggio, lo Slow Food è oggi la risposta d'avanguardia.» Dal Documento di fondazione del Movimento Slow Food.

Scritti di informatica e diritto - volume 2 Mario G. Losano, 2022-06-17T00:00:00+02:00 I due volumi constano di dodici capitoli ciascuno e tracciano una storia del cinquantennio fondativo dell'informatica giuridica attraverso i principali scritti sulla storia del calcolo anche meccanico e sull'informatica giuridica pubblicati da Mario G. Losano dal 1966 al 2014. La prefazione di Paolo Garbarino (che come rettore istituì in Italia il primo corso triennale di informatica giuridica presso l'Università del Piemonte Orientale) segue la storia accademica e personale di Losano, mentre la prefazione di Massimo Cavino sintetizza l'arco storico lungo cui si collocano i suoi scritti. Il primo volume traccia una storia del calcolo automatico e della "giuscibernetica" anche attraverso i progetti e le prime realizzazioni in Europa (compresa quella allora di là dalla Cortina di Ferro). Le bibliografie documentano il progressivo affermarsi dell'informatica nel mondo giuridico e nella pubblica amministrazione. Il secondo volume approfondisce (anche per il Giappone) l'innovazione introdotta dall'informatica nelle tecniche legislative, nonché la trasformazione socio-giuridica connessa con le leggi sulla privacy. È concluso dalla bibliografia degli oltre 300 scritti pubblicati da Losano sull'informatica giuridica.
