*The Well of Ascension* Brandon Sanderson,2010-04-01 Now with over 10 million copies sold, The Mistborn Series has the thrills of a heist story, the twistiness of political intrigue, and the epic scale of a landmark fantasy saga. The impossible has been accomplished. The Lord Ruler -- the man who claimed to be god incarnate and brutally ruled the world for a thousand years -- has been vanquished. But Kelsier, the hero who masterminded that triumph, is dead too, and now the awesome task of building a new world has been left to his young protégé, Vin, the former street urchin who is now the most powerful Mistborn in the land, and to the idealistic young nobleman she loves. As Kelsier's protégé and slayer of the Lord Ruler she is now venerated by a budding new religion, a distinction that makes her intensely uncomfortable. Even more worrying, the mists have begun behaving strangely since the Lord Ruler died, and seem to harbor a strange vaporous entity that haunts her. Stopping assassins may keep Vin's Mistborn skills sharp, but it's the least of her problems. Luthadel, the largest city of the former empire, doesn't run itself, and Vin and the other members of Kelsier's crew, who lead the revolution, must learn a whole new set of practical and political skills to help. It certainly won't get easier with three armies -- one of them composed of ferocious giants -- now vying to conquer the city, and no sign of the Lord Ruler's hidden cache of atium, the rarest and most powerful allomantic metal. As the siege of Luthadel tightens, an ancient legend seems to offer a glimmer of hope. But even if it really exists, no one knows where to find the Well of Ascension or what manner of power it bestows. *Making Good Wine* Bryce Rankine,2007-11-10 Making Good Wine has become the classic text on Australian and New Zealand winemaking, read and treasured by professional and amateur winemakers, students, wine lovers and buffs alike who want to know more about wine. Clearly and expertly it explains the principles as well as the practices

of winemaking, and highlights the remarkable nature of the product. Written by Bryce Rankine, long-time head of oenology at South Australia's famous Roseworthy College, this the definitive work on winemaking in Australia and New Zealand.

Mistborn Brandon Sanderson, 2010-04-01 Now with over 10 million copies sold, The Mistborn Series has the thrills of a heist story, the twistiness of political intrigue, and the epic scale of a landmark fantasy saga. For a thousand years the ash fell and no flowers bloomed. For a thousand years the Skaa slaved in misery and lived in fear. For a thousand years the Lord Ruler, the Sliver of Infinity, reigned with absolute power and ultimate terror, divinely invincible. Then, when hope was so long lost that not even its memory remained, a terribly scarred, heart-broken half-Skaa rediscovered it in the depths of the Lord Ruler's most hellish prison. Kelsier snapped and found in himself the powers of a Mistborn. A brilliant thief and natural leader, he turned his talents to the ultimate caper, with the Lord Ruler himself as the mark. Kelsier recruited the underworld's elite, the smartest and most trustworthy allomancers, each of whom shares one of his many powers, and all of whom relish a high-stakes challenge. Only then does he reveal his ultimate dream, not just the greatest heist in history, but the downfall of the divine despot. But even with the best criminal crew ever assembled, Kel's plan looks more like the ultimate long shot, until luck brings a ragged girl named Vin into his life. Like him, she's a half-Skaa orphan, but she's lived a much harsher life. Vin has learned to expect betrayal from everyone she meets, and gotten it. She will have to learn to trust, if Kel is to help her master powers of which she never dreamed. This saga dares to ask a simple question: What if the hero of prophecy fails? *The JOBS Act* William Michael Cunningham, 2012-12-20 On April 5, 2012, President Barack Obama signed the Jumpstart Our Business Startups Act, better known as the JOBS Act. The act is designed to "reopen American capital markets to small companies," defined in the act as Emerging Growth Companies. This is one of the most significant legislative initiatives in finance since the Securities and Exchange Acts of 1933 and 1934, and it opens up funding to a slew of companies previously shut out of the capital markets. Here's the good news: Small businesses and startups will be able to raise up to \$1 million in equity (or debt) funding online via what are called Crowdfunding Platforms—online communities and websites. Imagine an eBay-like site that allows you to post your idea for a commercial venture online and then allows investors to purchase equity shares or stakes in it. As one journalist put it, it's "social media meets venture capital." How can you get in on the new funding opportunities?

That's what *The JOBS Act: Crowdfunding for Small Businesses and Startups* is all about. Investment expert William Michael Cunningham shows how the new law will enable you to use the internet to raise significant amounts of capital funding for your startup. After discussing briefly the development and implementation of the law, what it means, and how it will impact the business startup marketplace, he delivers the nuts and bolts of how to take advantage of the JOBS Act to access new sources of capital for your small business or startup. As you'll see, the act has the power to unleash a new wave of innovation, increase employment, and set many more average entrepreneurs and investors on the road to wealth. Not just for entrepreneurs, *The JOBS Act: Crowdfunding for Small Businesses and Startups* will benefit investors, securities lawyers, community development specialists, educators, venture capitalists, and those offering services in the new crowdfunding arena. It is, simply, the most current and most comprehensive compendium of information on the law and its impact on this new market.

*Wine Traceability* Maria Carla Cravero, 2019-11-14 Wine traceability is a central theme in the current world market where consumers are increasingly demanding the quality and origin of food and drink. The wine production chain and wine composition are generally controlled by different laws (International Organization of Vine and Wine (OIV), European Union (EU), and national governments) and need specific documentation. Nevertheless, wine production is subject to fraud. Consequently, the improvement of the methods applied to verify the origin and quality of wines is very important to protect wine consumers and producers. In this book, eight different papers—six research papers and two reviews—address the topic from different points of view.

*Opus Vino* DK, 2010-10-18 The techniques and research that have led the world's winemaking revolution have been transported around the globe, pushing boundaries in every region. An expansive new reference is needed to embrace these changes. *Opus Vino* provides greater coverage and a more up-to-date approach to the wine world than any other illustrated wine book. Use it as an encyclopedia to look up wine-producing regions, appellations, wineries, and producers; as an atlas to find places of interest; and as a travel guide to plan winery tours. *Opus Vino* takes a new look at the new world of wine from a new generation of wine writers. It takes wine publishing to new heights, and gives both professionals and amateur enthusiasts a wine reference fit for the 21st century.

*Adaptive Business Intelligence* Zbigniew Michalewicz, Martin Schmidt, Matthew Michalewicz, Constantin Chiriac, 2006-12-02 Adaptive business intelligence systems combine prediction and optimization techniques to assist

decision makers in complex, rapidly changing environments. These systems address fundamental questions: What is likely to happen in the future? What is the best course of action? Adaptive Business Intelligence explores elements of data mining, predictive modeling, forecasting, optimization, and adaptability. The book explains the application of numerous prediction and optimization techniques, and shows how these concepts can be used to develop adaptive systems. Coverage includes linear regression, time-series forecasting, decision trees and tables, artificial neural networks, genetic programming, fuzzy systems, genetic algorithms, simulated annealing, tabu search, ant systems, and agent-based modeling.

**Dryland Forests** Purabi Bose, Han van Dijk, 2016-03-08 This volume provides new insights and conceptual understandings of the human and gender dimension of vulnerability in relation to the dynamics of tenure reforms in the dryland forests of Asia and Africa. The book analyzes the interaction between biophysical factors such as climate variability (e.g. droughts) with socio-political processes (e.g. new institutions and authority) and gender dimensions at various temporal and spatial scales. The book presents a number of case studies based on empirical research on forest tenure reform and its consequences on forest-dependent people. In particular, it highlights the interaction between legal, policy and institutional reform and the inclusion and/or exclusion of local people from deriving benefits from forest resources in the drylands. The book focuses on the questions how land tenure reform and natural resource governance impacts upon marginal groups (along individual, collective and gender dimensions); how do forest-dependent people prepare for and respond to vulnerability; and what is the effect of forest tenure policy reform on the human rights, gender and citizenship issues in relation to the use and management of forest resources and on conflict in forest zones. These issues are approached from the perspective of marginalized groups (gender and social diversity such as indigenous peoples and herders) in vulnerable dryland forests with a high risk of being exposed to climate variability.

*Why You Like the Wines You Like* Tim Hanni, Tim Hanni MW, 2013-01-10 Master of Wine and Chef Tim Hanni MW was hailed as the Wine Antisnob by the Wall Street Journal for his work in understanding consumer wine preferences and revolutionary concepts for wine and food pairing. This introductory volume for The New Wine Fundamentals wine education program is based on two decades of research by the author and many research colleagues. *Why You Like the Wines You Like*; changing the way the world thinks about wine introduces the physiological and psychological factors that shape personal wine preferences. It offers empowerment to wine drinkers at all levels and is a truly game-changing approach to the subject of the enjoyment of wine and wine with food. *Why You Like the Wine You Like* also looks at the countless myths and lore associated with wine and provides insights and information for anyone interested in wine history. Hanni's wine and food principles were adopted last year and taught as part of the Advanced Diploma curriculum for the Wine & Spirits Educational Trust. Wine and food pairing has become an imaginary and metaphorical exercise with little basis in reality, Hanni says. I am on a mission to have everyone pair wines with the diner, not the dinner. I have spent many hours with Tim wrestling with some of his ideas while they were still in the formative stage. It was both an exhilarating and an exhaustive experience. With a broad and

deep knowledge of wine and food history as well as their complexities, he is not afraid to challenge the way things are done and suggest alternatives. He's not dogmatic in his beliefs, but he demands that conventional thinkers think again. You may not agree with all his conclusions, but I promise he will make you think.
