The Philosophical Salon Patricia Vieira, Michael Marder, 2020-10-09 Through the interpretative lens of today's leading thinkers, The Philosophical Salon illuminates the persistent intellectual queries and the most disquieting concerns of our actuality. Across its three main divisions-Speculations, Reflections, and Interventions-the volume constructs a complex mirror, in which our age might be able to recognize itself with all its imperfections, shadowy spots, even threatening abysses and latent promises. On the cutting edge of philosophy, political and literary theory, and aesthetics, this book courageously tackles a wide array of topics, including climate change, the role of technology, reproductive rights, the problem of refugees, the task of the university, political extremism, embodiment, utopia, food ethics, and sexual identity. It is an enduring record of an ongoing conversation, as well as a building block for any attempt to make sense of our world's multifaceted realities. International Standard Classification of Occupations International Labour Office, 2012 The International Standard Classification of Occupations 2008 (ISCO-08) is a four-level hierarchically structured classification that covers all jobs in the world. Developed with the benefit of accumulated national and international experience as well as the help of experts from many countries and agencies, ISCO-08 is fully supported by the international community as an accepted standard for international labour statistics. ISCO-08 classifies jobs into 436 unit groups. These unit groups are aggregated into 130 minor groups, 43 sub-major groups and 10 major groups, based on their similarity in terms of the skill level and skill specialisation required for the jobs. This allows the production of relatively detailed internationally comparable data as well as summary information for only 10 groups at the highest level of aggregation. Each group in the classification is designated by a title and code number and is associated with a definition that specifies the scope of the group. The classification is divided into two volumes: Volume I presents the structure and definitions of all groups in ISCO-08 and their correspondence with ISCO-88, which it supersedes, while Volume II provides an updated and expanded index of occupational titles and associated ISCO-08 and ISCO-88 codes.

Peek,1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled Historical Painting Techniques, Materials, and Studio Practice at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

Networks of Outrage and Hope Manuel Castells,2015-06-04 Networks of Outrage and Hope is an exploration of the newforms of social movements and protests that are erupting in theworld today, from the Arab uprisings to the indignadas movement inSpain, from the Occupy Wall Street movement to the social protestsin Turkey, Brazil and elsewhere. While these and similar socialmovements differ in many important ways, there is one thing theyshare in common: they are all interwoven inextricably with thecreation of autonomous communication networks supported by theInternet and wireless communication. In this new edition of his timely and important book, ManuelCastells examines the social, cultural and political roots of thesenew social movements, studies their innovative forms ofself-organization, assesses the precise role of technology in thedynamics of the movements, suggests the reasons for the supportthey have found in large segments of society, and probes theircapacity to induce political change by influencing people'sminds. Two new chapters bring the analysis up-to-date and draw outthe implications of these social movements and protests forunderstanding the new forms of social change and politicaldemocracy in the global network society.

Normal Life Dean Spade,2015-07-13 Revised and Expanded Edition Wait—what's wrong with rights? It is usually assumed that trans and gender nonconforming people should follow the civil rights and equality strategies of lesbian and gay rights organizations by agitating for legal reforms that would ostensibly guarantee nondiscrimination and equal protection under the law. This approach assumes that the best way to address the poverty and criminalization that plague trans populations is to gain legal recognition and inclusion in the state's institutions. But is this strategy effective? In Normal Life Dean Spade presents revelatory critiques of the legal equality framework for social change, and points to examples of transformative grassroots trans activism that is raising demands that go beyond traditional civil rights reforms. Spade explodes assumptions about what legal rights can do for marginalized populations, and describes transformative resistance processes and formations that address the root causes of harm and violence. In the new afterword to this revised and expanded edition, Spade notes the rapid mainstreaming of trans politics and finds that his predictions that gaining legal recognition will fail to benefit trans

populations are coming to fruition. Spade examines recent efforts by the Obama administration and trans equality advocates to pinkwash state violence by articulating the US military and prison systems as sites for trans inclusion reforms. In the context of recent increased mainstream visibility of trans people and trans politics, Spade continues to advocate for the dismantling of systems of state violence that shorten the lives of trans people. Now more than ever, *Normal Life* is an urgent call for justice and trans liberation, and the radical transformations it will require.

The Neoliberal Age? Aled Davies,Ben Jackson,Florence Sutcliffe-Braithwaite,2021-12-07 The late twentieth and early twenty-first centuries are commonly characterised as an age of 'neoliberalism' in which individualism, competition, free markets and privatisation came to dominate Britain's politics, economy and society. This historical framing has proven highly controversial, within both academia and contemporary political and public debate. Standard accounts of neoliberalism generally focus on the influence of political ideas in reshaping British politics; according to this narrative, neoliberalism was a right-wing ideology, peddled by political economists, think-tanks and politicians from the 1930s onwards, which finally triumphed in the 1970s and 1980s. *The Neoliberal Age?* suggests this narrative is too simplistic. Where the standard story sees neoliberalism as right-wing, this book points to some left-wing origins, too; where the standard story emphasises the agency of think-tanks and politicians, this book shows that other actors from the business world were also highly significant. Where the standard story can suggest that neoliberalism transformed subjectivities and social lives, this book illuminates other forces which helped make Britain more individualistic in the late twentieth century. The analysis thus takes neoliberalism seriously but also shows that it cannot be the only explanatory framework for understanding contemporary Britain. The book showcases cutting-edge research, making it useful to researchers and students, as well as to those interested in understanding the forces that have shaped our recent past.

Stats: Data and Models, Global Edition Paul Velleman,Richard D. De Veaux,David E. Bock,2016-09-29 Richard De Veaux, Paul Velleman, and David Bock wrote *Stats: Data and Models* with the goal that students and instructors have as much fun reading it as they did writing it. Maintaining a conversational, humorous, and informal writing style, this new edition engages students from the first page. The authors focus on statistical thinking throughout the text and rely on technology for calculations. As a result, students can focus on developing their conceptual understanding. Innovative Think/Show/Tell examples give students a problem-solving framework and, more importantly, a way to think through any statistics problem and present their results.
