Balance of Payment Statistics Yearbook 2017
International Monetary Fund. Statistics
Dept.,2017-12-28 This paper analyses that the IMF
has published data on a basis that is consistent
across countries and across time periods. Such
data consistency is required to perform cross-
country data comparisons, track growth rates
across time, and produce regional or global data
aggregates. The methodologies, compiling
practices, and data sources available through
data.imf.org and DVD-ROM are based on information
provided to the IMF by reporting countries. The
descriptions are intended to enhance user
understanding of the coverage, as well as the
limitations, of individual country data. The
estimation procedure is based largely on the use
of the WEO database in BPM6 format. For a variety
of reasons, however, countries may not correctly
record some transactions, or they classify
corresponding transactions differently. Under

these circumstances, errors and omissions in the national data and asymmetries (discrepancies) in the global statistics arise.
