Fast Families, Virtual Children Ben Agger,Beth Anne Shelton,2016-01-20 The Internet, cell phones, and other technologies have changed the ways in which people conduct their family lives, raise children, and navigate the blurry boundary between work and home. Private life is colonized by employers, teachers, corporations; family time is taken up by work, homework, and shopping. What it means to be parents and children has changed dramatically. This book shows how the nurturance of family has increasingly become a willful, radical idea in an era of pervasive technology. The authors analyze important trends, including the acceleration and attenuation of childhood, and offer a children s bill of rights and accompanying parental responsibilities.

Mobile Communication and the Family Sun Sun Lim,2016-02-04 This volume captures the domestication of mobile communication technologies by families in Asia, and its implications for family interactions and relationships. It showcases research on families across a spectrum of socio-economic profiles, from both rural and urban areas, offering insights on children, adolescents, adults, and the elderly. While mobile communication diffuses through Asia at a blistering pace, families in the region are also experiencing significant changes in light of unprecedented economic growth, globalisation, urbanisation and demographic shifts. Asia is therefore at the crossroads of technological transformation and social change. This book analyses the interactions of these two contemporaneous

trends from the perspective of the family, covering a range of family types including nuclear, multi-generational, transnational, and multi-local, spanning the continuum from the media-rich to the media have-less.

COVID–19 and Schools Robert Maranto,David T. Marshall,2023-11-07 This book features contributions from leading experts who present peer reviewed research on how the unprecedented COVID-19 pandemic affected U.S. teachers, students, parents, teaching practices, enrolments, and institutional innovations, offering the first empirical findings exploring educational impacts likely to last for decades. The COVID-19 pandemic presented the greatest crisis in the history of U.S. schooling, with America's 50 states, thousands of school systems, and tens of thousands of private and charter schools responding in myriad ways. This book brings together peer reviewed, empirical research on how U.S. schools responded, and on the educational and health impacts likely to persist for many years. Contributors explore how the U.S. responses differed from those in other countries, with slower reopening, and both reopening and modes of instruction varying widely across states and school

sectors. Compared to European countries, U.S. responses to reopening schools reflected political influences more than health or educational needs, though this was less true in market-based private and charter schools. The pandemic was a catalyst for school choice movements across the U.S. Many parents reacted to school closings by exploring alternatives to traditional public schools, including an important and likely permanent innovation, small, parent-created or "pod" schools. As the papers here detail, long term student learning loss and health and socioemotional impacts of COVID-19 closings may well last for decades. The volume concludes by exploring teacher experiences across different sectors following the pandemic. COVID-19 and Schools will be a key resource for academics, researchers, and advanced students of education, education policy and leadership, educational research, research methods, economics, sociology and psychology. The chapters included in this book were originally published as a special issue of Journal of School Choice.

Exodus to the Virtual World Edward Castronova,2008-11-11 Virtual worlds have exploded out of online game culture and now capture the attention of millions of ordinary people: husbands, wives,

fathers, mothers, workers, retirees. Devoting dozens of hours each week to massively multiplayer virtual reality environments (like World of Warcraft and Second Life), these millions are the start of an exodus into the refuge of fantasy, where they experience life under a new social, political, and economic order built around fun. Given the choice between a fantasy world and the real world, how many of us would choose reality? Exodus to the Virtual World explains the growing migration into virtual reality, and how it will change the way we live--both in fantasy worlds and in the real one.

Adoption and Fosterage Practices in the Late Medieval and Modern Age Marina Garbellotti,Maria Clara Rossi,2016-02-26T00:00:00+01:00 In recent years historical studies on adoption and fosterage have greatly advanced, very likely due to the importance that such practices have acquired in our own societies. Also in the past – not only during Roman or Late Antique periods, but throughout the Middle Ages and the Modern Era as well – a rather significant number of family units went through adoption and fosterage, experiencing these kinds of ties and relationships on the daily basis. Articles collected in this volume are aimed at analysing the various forms and methods by means of which the concept of "adoption" was interpreted and practiced during the Medieval and Early Modern periods, identifying especially relevant chronological points, examples from different regional and local contexts, reciprocal influences, and family relationships shaped by adoption.
