Online Poker - Winning Strategies Revealed Alex Master, 2019-03-19 It's becoming almost as big as baseball, football, hockey, and other sporting events. Television has increased its popularity. With the Internet, it's coming into our homes at a lightning fast rate. The rage that's sweeping the nation - poker! Although the game has been around for years played in family recreation rooms, smoky bars, casinos, and even retirement homes, these days, poker has become the game of choice for hundreds of thousands of people. Family game night used to mean getting out the Monopoly board and battling over Park Place and Broadway. Now, family game night is more likely to be characterized by breaking out the poker chips and battling each other for the best hands. More and more people are talking about their bad beats, their great hands, and their prowess for play. Popular on college campuses, fraternal clubs, and even retirement homes, poker has become our new game of chance, and our new game of choice. What has led to the rise of this game? Most likely, it has been television and the media. On any given evening, the average person can flip on the TV set and find a poker game being aired. The World Series of Poker, Celebrity Poker Showdown, and Ultimate Poker Showdown are rising in the ratings as we tune in to see professionals battle it out and compare our play to theirs. Nearly every home these days has at least one computer. The Internet has become our lifeline, in ways, for information, contact with the outside world, and - yes - our portal to the world of poker beyond our kitchen table. Now ordinary people can log on and play poker with people other than our parents, kids, and friends. Many professional players sponsor online website where they are required to play allowing Average Joe to match his poker skills with the likes of Howard Lederer and Chris

Ferguson. Perhaps the biggest rise in poker popularity - specifically online poker - stems from one man's \$40 online buy-in leading to the Cinderella story of the industry. Chris Moneymaker qualified for The World Series of Poker main event through a small buy-in satellite event at Poker Stars. At the Series, he outlasted a field of 839 entrants - the largest in World Series of Poker history at the time. He pitted heads against some of the most well-known poker professionals in the world - and won! Moneymaker's first-place finish netted him \$2.5 million dollars, which wasn't bad considering it was his first live tournament. Many people looked at Moneymaker's win as monumental. After all, he was just an average guy. He could be anyone's next door neighbor or co-worker, and he went up against the pros and won. Chris Moneymaker opened the door for everyday people to dream about being the next professional poker player. In fact, the 2004 World Series featured triple the number of players over the 2003 turnout. At least four players in the WSOP final table won their entry through an online card room. Like Moneymaker, 2004 winner Greg "Fossil man" Raymer also won his entry at the Poker Stars online card room. There are a myriad of tips and tricks for playing the game of poker. Everyone seems to have an opinion on the best way to play the game. True, poker is a game of chance, and many would argue that there really is no secret to winning the game. However, there is a best way to play. As Kenny Rogers sang in "The Gambler", you've got to know when to hold 'em and know when to fold 'em. Know when to walk away, and know when to run. There are many variations on the game of poker, but the one most popular today has got to be Texas Hold 'Em. It's a relatively simple game, but like all poker, it can change with the deal of every card. In this book, we'll explore different ways to play the game online to maximize on your buy-in. We'll touch on

tournaments as well. Online poker can be fun and even profitable when you play smart and follow the advice of those in the know. Whether you're playing for fun or for money, the game can easily become an obsession, so we've also given you information about getting help with a gambling problem. We won't make you a professional - that's up to you! But we will try to give you some food for thought when the cards are dealt and it's time to bet. So, let's talk poker!

Exploring Internet Gambling Sally Gainsbury, Alex Blaszczyński, 2016-03-16 Internet gambling has emerged as the most radical change to gambling in recent years. Interactive gambling opportunities using computers and wireless devices have transformed the ways in which players engage in gambling. The technological advances that have allowed gambling to expand across physical borders and beyond venues has had a profound impact on gambling policy, regulation, research, treatment and prevention strategies. This book provides a compilation of current research findings by prominent international researchers, including the incidence of Internet gambling, how online gambling is used, sub-groups of online gamblers, and the difference between Internet and non-Internet gamblers in the general population and among treatment-seekers. This book is highly relevant for researchers, students, regulators, policy makers, gambling industry operators, treatment providers and community groups interested in research findings relevant to online gambling. It was originally published as a special issue of International Gambling Studies.

Virtual Sociocultural Convergence William Sims Bainbridge, 2016-07-06 This book explores the remarkable sociocultural convergence in multiplayer online games and other virtual worlds, through the unification of computer science, social science, and the humanities. The emergence of online media provides not only new methods for collecting social science data, but also contexts for developing theory and conducting education in

the arts as well as technology. Notably, role-playing games and virtual worlds naturally demonstrate many classical concepts about human behaviour, in ways that encourage innovative thinking. The inspiration derives from the internationally shared values developed in a fifteen-year series of conferences on science and technology convergence. The primary methodology is focused on sending avatars, representing classical social theorists or schools of thought, into online gameworlds that harmonize with, or challenge, their fundamental ideas, including technological determinism, urban sociology, group formation, freedom versus control, class stratification, linguistic variation, functional equivalence across cultures, behavioural psychology, civilization collapse, and ethnic pluralism. Researchers and students in the social and behavioural sciences will benefit from the many diverse examples of how both qualitative and quantitative science of culture and society can be performed in online communities of many kinds, even as artists and gamers learn styles and skills they may apply in their own work and play.

When should virtual world activities or augmented reality images count as protected First Amendment 'speech', and when are they instead a nuisance or trespass? When does copying them infringe intellectual property laws? When should a person

(or computer) face legal consequences for allegedly harmful virtual acts? The Research Handbook on the Law of Virtual and Augmented Reality addresses these questions and others, drawing upon free speech doctrine, criminal law, issues of data protection and privacy, legal rights for increasingly intelligent avatars, and issues of jurisdiction within virtual and augmented reality worlds.
