New Mobilities Regimes in Art and Social Sciences Susanne Witzgall, Gerlinde Vogl, 2016-04-29 New Mobilities Regimes analyses how global mobilities are changing the world of today and the role of political and economic power. Bringing together essays by leading scholars and social scientists, including Mimi Sheller and Bülent Diken with the work of well-known artists and art theorists such as Jordan Crandall, Ursula Bieman, Gülsün Karamustafa and Dan Perjovschi this book is a unique document of the cross-disciplinary mobility and power discourse. The specific design, integrating the text and art elements to create a singular dialogue makes for an exciting intellectual and aesthetic experience. Illustrated by a range of studies which examine the regulation and structure of mobility, such as the daily routines of teleworkers, Ukrainian cleaners in Western Europe, the mobility policies of global corporations, and the impact of bicycle policies on public space, New Mobilities Regimes emphasizes the routes and crossroads of migration flows as well as at the interaction of mobility and new spatial concepts. The contributors are concerned with both the positive outcomes and the disappointments of the global mobilizations in modern lives. This book is ground-breaking in that it calls for the reassessment of the figurative arts in providing independent and insightful knowledge-generating research on the nature of mobility and highlights the new appreciation of visual representations in sociology, cultural geography and anthropology.

Three Lines in a Circle Michael G. Long, 2021-08-31 One line straight down. One line to the right. One line to the left, then a circle. That was all—just three lines in a circle. This bold picture book tells the story of the peace symbol—designed in 1958 by a London activist protesting nuclear weapons—and how it inspired people all over the world. Depicting the symbol's travels from peace marches and liberation movements to the end of apartheid and the fall of the Berlin Wall, Three Lines in a Circle offers a message of inspiration to today's children and adults who are working to create social change. An author's note provides historical background and a time line of late twentieth-century peace movements.

Off and Online Journalism and Corruption Basyouni Hamada, Saodah Wok, 2020-09-09 This book provides a new theoretical framework of determinants that interact together in five hierarchical levels to restrain or produce corruption. The theory suggests a multilevel analysis that tests hypotheses regarding the relations of journalism and corruption within each level and across levels in international comparative research designs. Corruption as the abuse of power for private gain is built into the journalistic, economic, political, and cultural structures of any society and is affected by its interaction within the international system. The important questions of how differences in corruption across countries can be explained or what makes it more or less in a particular society and how press freedom and social media contribute to the fight against corruption are still unanswered. This book represents a significant contribution on the way to answer these critical questions. It discusses a variety of journalism-corruption experiences that provide a wealth of results and analyses. The cases it examines extend from Cuba to Algeria, India, Saudi Arabia, Sub-Saharan African, Gulf Cooperation Countries, Arab World, and Japan. The primary contribution of this book is both theoretical and empirical. Its details as well as the general theoretical frameworks make it a useful book for scholars, academics, undergraduate and graduate students,

journalists, and policy makers.

Our Story Vivian L. Beeler, 2012-05-07 Our Story 90 years, Looking Back... The world has changed so much in 90 years that I wanted to write about how they affected our lives. To let you know that we were real people that had the same emotions and feelings that you have. Ive included a little genealogy, a little history and how the things you read about in your history books affected us. Also, how the world has changed socially and morally and not always for the best. Of course this is your 90 year old Great Grandmas story and ideas.

Design for the Changing Educational Landscape Andrew Harrison, Les Hutton, 2013-10-15 The whole landscape of space use is undergoing a radical transformation. In the workplace a period of unprecedented change has created a mix of responses with one overriding outcome observable worldwide: the rise of distributed space. In the learning environment the social, political, economic and technological changes responsible for this shift have been further compounded by constantly developing theories of learning and teaching, and a wide acceptance of the importance of learning as the core of the community, resulting in the blending of all aspects of learning into one seamless experience. This book attempts to look at all the forces driving the provision and pedagogic performance of the many spaces, real and virtual, that now accommodate the experience of learning and provide pointers towards the creation and design of learning-centred communities. Part 1 looks at the entire learning universe as it now stands, tracks the way in which its constituent parts came to occupy their role, assesses how they have responded to a complex of drivers and gauges their success in dealing with renewed pressures to perform. It shows that what is required is innovation within the spaces and integration between them. Part 2 finds many examples of innovation in evidence across the world – in schools, the higher and further education campus and in business and cultural spaces – but an almost total absence of integration. Part 3 offers a model that redefines the learning landscape in terms of learning outcomes, mapping spatial requirements and activities into a detailed mechanism that will achieve the best outcome at the most appropriate scale. By encouraging stakeholders to creating an events-based rather than space-based identity, the book hopes to point the way to a fully-integrated learning landscape: a learning community.

God and Popular Culture [2 volumes] Stephen Butler Murray,Aimée Upjohn Light,2015-08-11 This contributed two-volume work tackles a fascinating topic: how and why God plays a central role in the modern world and profoundly influences politics, art, culture, and our moral reflection—even for nonbelievers. God—in the many ways that people around the globe conceptualize Him, Her, or It—is one of the most powerful, divisive, unifying, and creative elements of human culture. The two volumes of *God and Popular Culture: A Behind-the-Scenes Look at the Entertainment Industry's Most Influential Figure* provide readers with a balanced and accessible analysis of this fascinating topic that allows anyone who appreciates any art, music, television, film, and other forms of entertainment to have a new perspective on a favorite song or movie. Written by a collective of both believers and nonbelievers, the essays enable both nonreligious individuals and those who are spiritually guided to consider how culture approaches and has appropriated God to reveal truths about humanity and society. The book discusses the intersections of God with film, television, sports, politics, commerce, and popular culture, thereby documenting how the ongoing messages and conversations about God that occur among the general population also occur within the context of the entertainment that we as members of society consume—often without our recognition of the discussion.
